

Contents

Part I Clinical and Pre-clinical Applications and Research

1 Skeletal Deficits in Type 1 Diabetes Mellitus	3
Kathryn M. Thrailkill	
2 Type 2 Diabetes Mellitus and Skeletal Health	25
Ann V. Schwartz	
3 Fracture risk assessment in diabetes	45
William D. Leslie and Stephen Hough	
4 Diabetes-Related Conditions and Complications in Orthopaedic Surgery	71
Daniel J. Gehling and Nabil A. Ebraheim	
5 Impact of Diabetes on Periodontal Disease	95
E. Xiao, Yingying Wu, and Dana T. Graves	
6 Biomarkers of Diabetic Bone Disease	113
Mishaela R. Rubin	
7 Safety of Antidiabetic Therapies on Bone	125
Beata Lecka-Czernik and Ann V. Schwartz	
8 Bone Marrow Stem Cells and Bone Turnover in Diabetic Disease	147
Laura R. McCabe, Sandi Raehtz, Caitlyn VanGelderren, and Naiomy D. Rios-Arce	

Part II Biomechanics and Bone Quality

9 Material Properties of Diabetic Bone	183
Jeffry S. Nyman and Amy Creecy	

10 Bone Quality in Type 2 Diabetes Mellitus 211
Joshua N. Farr and Sundeep Khosla

11 Imaging of Diabetic Bone Structure..... 225
Thomas M. Link and Ursula Heilmeyer

Index..... 237
