## Contents

1 Introduction ............................................................................................................. 1
2 Biofuels: An Emerging Industry ........................................................................... 3
3 Exploring Novel Feedstocks and Technologies for Advanced Biofuels: The Promises of Algae .................................................. 7
4 Bioethanol from Algae Polysaccharides ............................................................... 13
5 Biodiesel from Microalgae .................................................................................. 19
6 Processing of Algal Biomass for the Production of Biogas and Bio-oil ................. 27
7 Cyanobacteria as a Platform for Direct Photosynthesis-to-Fuel Conversion .......... 31
8 Economic Viability of Algal Biodiesel ................................................................. 39
9 Photosynthesis: A Dynamic Process ..................................................................... 43
10 Solar-to-Biomass Conversion Efficiency ............................................................. 51
11 Light Saturation of Photosynthesis ..................................................................... 55
12 Downstream Biochemical Reactions: Carbon Assimilation ................................. 59
13 Light-Utilization Inefficiency of Wild-Type Algal Mass Cultures ......................... 65
14 Genetic Modification of the Pigment Optical Density .......................................... 69
15 Development of Microalgae Cultivation and Biomass Harvesting Systems for Biofuel Production .................................................. 83
| 16  | Environmental Sustainability of Biofuel Production from Algae | 89 |
| 17  | Concluding Remarks                                           | 95 |
|     | About the Author                                             | 97 |
|     | Glossary                                                     | 99 |
|     | Author’s Publications (Cited in the Text)                    | 101 |
|     | Index                                                        | 103 |
Solar-to-Fuel Conversion in Algae and Cyanobacteria
Formighieri, C.
2015, VIII, 105 p. 15 illus. in color., Softcover
ISBN: 978-3-319-16729-9
