

# Contents

<b>1 Introduction</b> . . . . .	1
References . . . . .	4
<b>2 Maritime Terminal Operational Problems</b> . . . . .	5
2.1 Container, Container Vessels, and Configuration of a Container Terminal . . . . .	5
2.1.1 Quay Area . . . . .	8
2.1.2 Transport Area . . . . .	10
2.1.3 Yard Area . . . . .	11
2.1.4 Practical Example of CT: PSA Singapore Terminals. . . . .	13
2.2 Decision Problems . . . . .	14
2.3 Literature Review . . . . .	16
2.3.1 Quay Area . . . . .	16
2.3.2 Transport Area . . . . .	19
2.3.3 Yard Area . . . . .	20
2.3.4 Integration of Decision Problems . . . . .	23
References . . . . .	25
<b>3 Discrete Time Model and Algorithms for Container Yard Crane Scheduling</b> . . . . .	31
3.1 Introduction . . . . .	31
3.2 Literature Review . . . . .	34
3.2.1 Some Approaches to YC Work Schedules. . . . .	34
3.3 The Model (DMIP1). . . . .	35
3.3.1 Assumptions . . . . .	36
3.3.2 Objective Function . . . . .	36
3.3.3 Constraints . . . . .	37
3.3.4 Results of DMIP1 . . . . .	40
3.4 Model Integrated with Heuristics (DMIP2) . . . . .	42
3.4.1 Results of DMIP2 . . . . .	43

3.5	Rolling-Horizon Algorithm for DMIP2 (DMIP3) . . . . .	44
3.5.1	Constraints and Sets Used in the Rolling-Horizon Algorithm . . . . .	46
3.5.2	Flow Diagram of Rolling-Horizon Algorithm . . . . .	46
3.5.3	Results of DMIP3 . . . . .	48
3.6	Influence of Weights in Objective Function . . . . .	48
3.7	Conclusion . . . . .	49
	Appendix 1: Definition of Sets and Parameters . . . . .	50
	References . . . . .	51
<b>4</b>	<b>A Continuous-Time Model for Multiple Yard Crane Scheduling with Last-Minute Job Arrivals . . . . .</b>	<b>53</b>
4.1	Introduction . . . . .	53
4.1.1	Background . . . . .	53
4.1.2	Literature Review . . . . .	54
4.1.3	Contributions . . . . .	56
4.2	Continuous-Time Model (CMIP1) . . . . .	58
4.2.1	Objective Function . . . . .	59
4.2.2	Constraints . . . . .	59
4.2.3	Assumptions . . . . .	66
4.2.4	Results of CMIP1 . . . . .	67
4.3	Algorithms Integrated with the Continuous-Time Model . . . . .	70
4.3.1	Heuristics . . . . .	70
4.3.2	Rolling-Horizon Algorithm (RHA) . . . . .	72
4.3.3	Results of the Continuous-Time Model Integrated with Heuristics and RHA . . . . .	73
4.4	Last-Minute Job Arrivals . . . . .	76
4.5	Discussions . . . . .	77
4.5.1	The Best Performance Measure . . . . .	77
4.5.2	Influence of Objective Weights . . . . .	78
4.6	Conclusions . . . . .	78
	Appendix 1: Definition of Sets and Parameters . . . . .	78
	Appendix 2: Constraints Used in CMIP2 . . . . .	80
	References . . . . .	83
<b>5</b>	<b>Heuristic Approach . . . . .</b>	<b>85</b>
5.1	Concurrent Scheduling . . . . .	85
5.2	Divide and Conquer . . . . .	87
5.3	Clustering-Reassigning Heuristic . . . . .	88
5.3.1	The Algorithm . . . . .	89
5.3.2	Comparison with the Continuous MILP Model . . . . .	91
5.4	Conclusion . . . . .	94
	References . . . . .	94

- 6 Validation via Simulation . . . . .** 97
  - 6.1 Simulation at the Block Level . . . . . 97
  - 6.2 Simulation at the Terminal Level . . . . . 99
    - 6.2.1 The Simulation Model . . . . . 100
    - 6.2.2 The Results. . . . . 104
  - 6.3 Conclusion . . . . . 107

Planning and Scheduling for Maritime Container Yards  
Supporting and Facilitating the Global Supply Network

Li, W.; Jones, C.; Goh, M.

2015, IX, 110 p. 39 illus., 24 illus. in color., Hardcover

ISBN: 978-3-319-17024-4
