

# Contents

<b>Perspectives on Bayesian Natural Language Semantics and Pragmatics</b> . . . . .	1
Henk Zeevat	
<b>Causal Bayesian Networks, Signalling Games and Implicature of ‘<i>More Than n</i>’</b> . . . . .	25
Anton Benz	
<b>Measurement-Theoretic Foundations of Logic for Better Questions and Answers</b> . . . . .	43
Satoru Suzuki	
<b>Conditionals, Conditional Probabilities, and Conditionalization</b> . . . . .	71
Stefan Kaufmann	
<b>On the Probabilistic Notion of Causality: Models and Metalanguages</b> . . . . .	95
Christian Wurm	
<b>Shannon Versus Chomsky: Brain Potentials and the Syntax-Semantics Distinction</b> . . . . .	117
Mathias Winther Madsen	
<b>Orthogonality and Presuppositions: A Bayesian Perspective</b> . . . . .	145
Jacques Jayez	
<b>Layered Meanings and Bayesian Argumentation: The Case of Exclusives</b> . . . . .	179
Grégoire Winterstein	

**Variations on a Bayesian Theme: Comparing Bayesian Models of Referential Reasoning** . . . . . 201  
Ciyang Qing and Michael Franke

**Towards a Probabilistic Semantics for Vague Adjectives** . . . . . 221  
Peter R. Sutton
