

# Preface

Intelligence and Security Informatics (ISI) is an interdisciplinary research area concerned with the study of the development and use of advanced information technologies and systems for national, international, and societal security related applications. In the past few years, we have witnessed that ISI experienced tremendous growth and attracted significant interest involving academic researchers in related fields as well as practitioners from both government agencies and industry.

PAISI 2015 is the 10th workshop in the series. In 2006, the first Workshop on ISI was held in Singapore in conjunction with PAKDD, with most contributors and participants from the Pacific Asian region. The second Pacific Asia Workshop on ISI, PAISI 2007, was held in Chengdu. Following that, the annual PAISI workshop was held in Taipei, Taiwan (2008), Bangkok, Thailand (2009), Hyderabad, India (2010), Beijing, China (2011, 2013), Kuala Lumpur, Malaysia (2012), and Tainan, Taiwan (2014).

Building on the success of these ISI meetings, we held PAISI 2015 in conjunction with PAKDD 2015 in Ho Chi Minh City, Vietnam in May 2015. PAISI 2015 brought together researchers from a variety of fields and provided a stimulating forum for ISI researchers in Pacific Asia and other regions of the world to exchange ideas and report research progress. This volume of Springer's Lecture Notes in Computer Science contains research papers presented at PAISI 2015. It presents a significant view on regional data sets and case studies, including online social media and multimedia, fraud deception, and text mining.

We wish to express our gratitude to all members of the Workshop Program Committee and additional reviewers who provided high-quality, constructive review comments within a tight schedule. Our special thanks go to the PAKDD 2015 Organizing Committee and Workshop Chairs. We would also like to acknowledge the excellent cooperation with Springer in the preparation of this volume. Last but not least, we thank all researchers in the ISI community for their strong and continuous support of the PAISI series and other related research activities.

May 2015
