## Contents

### Part I  Thermal Comfort and Children Thermal Cognitive Knowledge

1  **Introduction** ........................................ 3  
   1.1  Why This Book? ........................................ 3  
   1.2  How to Read This Book ............................... 5  

2  **A Brief History of Thermal Comfort: From Effective Temperature to Adaptive Thermal Comfort** .................. 7  
   2.1  The Discipline of Comfort .......................... 7  
   2.2  The Beginnings A.P. Gagge and the Military Requirements .................................................. 8  
   2.3  The Revolution of Povl Ole Fanger: Evaluating the Thermal Sensation ...................................... 11  
   2.4  The Last Frontier: The Adaptive Thermal Comfort ........ 21  
   References .................................................. 21  

3  **Ergonomics of the Thermal Environment. Human Body and Clothes** ........................................... 25  
   3.1  What About Thermal Comfort ........................ 25  
   3.2  The Human Body (Physiology) ....................... 27  
   3.2.1  Human Thermal Physiological Models. ............ 29  
   3.2.2  Human Sense and Thermal-Regulatory .......... 29  
   3.2.3  The Core Temperature and Skin Temperature Model .......................................................... 32  
   3.3  The Modelling of the Human Body: Body Heat Balance Equation ................................................. 33  
   3.3.1  Internal Heat Production—Metabolism (met) .... 36  
   3.3.2  Heat Loss by Skin Diffusion (Ed) ................. 43  
   3.3.3  Latent Respiration (Er) and Dry Respiration  
         Heat Loss (L) ........................................... 45  

vii
3.3.4 Heat Conduction Through the Clothing (K) ............. 46
3.3.5 Heat Loss by Radiation (R) ............................... 47
3.3.6 Heat Loss by Convection (C) .............................. 48
3.3.7 Heat Balance Equation (Thermal Comfort Equation) .................. 49

3.4 Resistence of Clothing ........................................ 51

3.5 Indoor Microclimate: The Building Parameters ............... 60
3.5.1 Operating Temperature ..................................... 63

3.6 Comfort and Health in Indoor Environment: Indoor Air Quality .................................. 65
3.6.1 The Perception of IAQ Pollutants ......................... 68

References .......................................................... 72

4 The Indices of Feeling—Predicted Mean Vote PMV
and Percentage People Dissatisfied PPD ............................. 75

4.1 The Research to Measure Comfort ......................... 75

4.2 The Comfort Indexes ............................................ 77
4.2.1 Predicted Mean Vote (PMV) ............................... 78
4.2.2 Predicted Percentage of Dissatisfied Index (PPD) ......... 79
4.2.3 The Physiological Equivalent Temperature Index (PET) .................. 79
4.2.4 Relative Strain Index (RSI) ............................... 80
4.2.5 Actual Sensation Vote (ASV) ............................... 81
4.2.6 Discomfort Index (DI) or Thom Index ..................... 81
4.2.7 Effective Temperature (ET), Temperature Equivalent Perception (PET) and Equivalent Temperature (T_{eq}) .................. 82
4.2.8 Operative Temperature (OT) ............................... 83
4.2.9 Universal Thermal Climate Index (UTCI) .................. 84

4.3 The Predicted Mean Vote (PMV) and the Predicted Percentage Dissatisfied (PPD) According to the Standard ISO 7730 ............................................. 84
4.4 Local Discomfort ................................................. 87
4.4.1 Comfort Diagrams ............................................. 92
4.5 Thermal Environmental Condition form Human Occupancy Following ASHRAE Standard 55-2014 .......................... 93
4.6 Ergonomics of Thermal Environment and People with Special Requirements .......................... 98
4.7 The Instruments of Measurement of the Indoor Microclimate .................................. 101
4.8 Adaptive Thermal Comfort ..................................... 108
4.9 Indoor Air Quality Assessment ................................. 112
4.9.1 The CO₂ Concentration as an Indicator of Indoor Pollution Due to the Occupants .................. 115
7.2.2 Qualitative and Subjective Approach (QSA) 184
7.2.3 Comparison of the Results of the Two Approaches 185
7.3 The Italian Educational System 186
References 188

8 Kindergarten Case Study 191
8.1 The Kindergarten Diana Case Study in Reggio Emilia 191
8.1.1 The Children Age 3–5 (Later Infancy) 193
8.1.2 The Pedagogical Model of the Diana Kindergarten 195
8.2 The Research Activity 196
8.2.1 The Discussion Stage with the Children to Find Matching Symbols 201
8.2.2 The Design and Representation on the Board 203
8.2.3 Questionnaire Submission (Order of the Questionnaire—The Day) 207
8.3 The Monitoring of Indoor Microclimate and IAQ 210
8.4 The Results of the Research 213
8.4.1 The Reference Entity 214
8.4.2 Results of the Monitoring Campaign and Questionnaire 214
8.4.3 Thermal Comfort Results—Discussion 218
8.5 Indoor Air Quality 221
8.6 Conclusions 225
Annex 1—Transcript of Conversations Before and During the Search of the Symbols 229
Annex 2—Prepared Drawings 239
Annex 3 Questionnaire Results 242
References 246

9 Elementary School Case Study 249
9.1 The Case Study of the Elementary School Centro Educativo Italo Svizzero C.E.I.S. 249
9.1.1 The Building 250
9.1.2 The Children Age 6–10 (Elementary School) 252
9.1.3 The Pedagogical Model of C.E.I.S. 253
9.2 The Research Activity 255
9.2.1 Questionnaire Submission (Sequence of the Questionnaire—the Day) 255
9.3 Monitoring with Microclimate Datalogger and Probe 265
9.4 Questionnaire Results 269
9.5 Conclusions 275
10 Middle School Case Study ........................................ 277
  10.1 The Case Study Middle School Tito Maccio Plauto .......... 277
      10.1.1 The Building ........................................... 278
      10.1.2 The Children Aged 11–14 Pre—adolescence ......... 279
  10.2 The Questionnaire ........................................... 280
      10.2.1 First Survey Campaign Following ‘School of the Future’ Questionnaire ...................... 280
      10.2.2 Second Survey Campaign Following Our Questionnaire .................................... 283
      10.2.3 The Measurement Activity: Natural and Artificial Lighting .............................. 290
  10.3 Questionnaire Results ....................................... 291
  10.4 Conclusions .................................................. 296
ANNEX—Results .................................................. 297
Reference ......................................................... 300

11 Conclusions .................................................. 301
  11.1 Why I Wrote This Book ....................................... 301
  11.2 And Now? .................................................... 302
Indoor Thermal Comfort Perception
A Questionnaire Approach Focusing on Children
Fabbri, K.
2015, XI, 302 p. 99 illus., 47 illus. in color., Hardcover
ISBN: 978-3-319-18650-4
