Contents

Evaluations and Applications

Hourglass Shapes in Rank Grey-Level Hit-or-miss Transform for Membrane Segmentation in HER2/neu Images .......................... 3
Marek Wdowiak, Tomasz Markiewicz, Stanislaw Osowski, Zaneta Swiderska, Janusz Patera, and Wojciech Kozlowski

Automated Digital Hair Removal by Threshold Decomposition and Morphological Analysis ................................................. 15
Joost Koehoorn, André Sobiecki, Daniel Boda, Adriana Diaconeasa, Susan Doshi, Stephen Paisey, Andrei C. Jalba, and Alexandru Telea

Portal Extraction Based on an Opening Labeling for Ray Tracing ...... 27
Laurent Noël and Venceslas Biri

Evaluation of Morphological Hierarchies for Supervised Segmentation... 39
Benjamin Perret, Jean Cousty, Jean Carlo Rivera Ura, and Silvio Jamil F. Guimarães

Study of Binary Partition Tree Pruning Techniques for Polarimetric SAR Images .......................................................... 51
Philippe Salembier

A Comparison Between Extinction Filters and Attribute Filters......... 63
Roberto Souza, Letícia Rittner, Rubens Machado, and Roberto Lotufo

Inner-Cheeger Opening and Applications .................................... 75
Santiago Velasco-Forero

Tracking Sub-atomic Particles Through the Attribute Space ........... 86
Mohammad Babai, Nasser Kalantar-Nayestanaki, Johan G. Messchendorp, and Michael H.F. Wilkinson

A Pansharpening Algorithm Based on Morphological Filters .......... 98
Rocco Restaino, Gemine Vivone, Mauro Dalla Mura, and Jocelyn Chanussot

An Automated Assay for the Evaluation of Mortality in Fish Embryo... 110
Élodie Puybareau, Marc Léonard, and Hugues Talbot

A Top-Down Approach to the Estimation of Depth Maps Driven by Morphological Segmentations ............................................. 122
Jean-Charles Bricola, Michel Bilodeau, and Serge Beucher
A Comparison of Some Morphological Filters for Improving OCR Performance
Laurent Mennillo, Jean Cousty, and Laurent Najman ................................................. 134

Local Blur Estimation Based on Toggle Mapping
Théodore Chabardès and Beatriz Marcotegui ......................................................... 146

Improved Detection of Faint Extended Astronomical Objects Through Statistical Attribute Filtering
Paul Teeninga, Ugo Moschini, Scott C. Trager, and Michael H.F. Wilkinson ................. 157

Automatic Threshold Selection for Profiles of Attribute Filters Based on Granulometric Characteristic Functions
Gabriele Cavallaro, Nicola Falco, Mauro Dalla Mura, Lorenzo Bruzzone, and Jón Atli Benediktsson .............................................................. 169

Local 2D Pattern Spectra as Connected Region Descriptors
Petra Bosilj, Michael H.F. Wilkinson, Ewa Kijak, and Sébastien Lefèvre ....................... 182

Spatial Repulsion Between Markers Improves Watershed Performance
Vaïa Machairas, Etienne Decencièrè, and Thomas Walter ........................................ 194

Hierarchies

New Characterizations of Minimum Spanning Trees and of Saliency Maps Based on Quasi-flat Zones
Jean Cousty, Laurent Najman, Yukiko Kenmochi, and Silvio Guimarães .......................... 205

Braids of Partitions
Bangalore Ravi Kiran and Jean Serra ........................................................................ 217

Constrained Optimization on Hierarchies and Braids of Partitions
Jean Serra and Bangalore Ravi Kiran ........................................................................ 229

Segmentation of Multimodal Images Based on Hierarchies of Partitions
Guillaume Tochon, Mauro Dalla Mura, and Jocelyn Chanussot ................................. 241

Multi-image Segmentation: A Collaborative Approach Based on Binary Partition Trees
Jimmy Francky Randrianasoa, Camille Kurtz, Éric Desjardin, and Nicolas Passat ........ 253
Contents XI

Scale-Space Representation Based on Levelings Through Hierarchies of Level Sets .................................................... 265
  Wonder A.L. Alves, Alexandre Morimitsu, and Ronaldo F. Hashimoto

Cluster Based Vector Attribute Filtering ........................................ 277
  Fred N. Kiwanuka and Michael H.F. Wilkinson

Intelligent Object Detection Using Trees ........................................ 289
  Erik R. Urbach

GraphBPT: An Efficient Hierarchical Data Structure for Image Representation and Probabilistic Inference ......................... 301
  Abdullah Al-Dujaili, François Merciol, and Sébastien Lefèvre

Probabilistic Hierarchical Morphological Segmentation of Textures ... 313
  Dominique Jeulin

The Waterfall Hierarchy on Weighted Graphs .................................. 325
  Fernand Meyer

Color, Multivalued and Orientation Fields

N-ary Mathematical Morphology .................................................. 339
  Emmanuel Chevallier, Augustin Chevallier, and Jesús Angulo

Sponges for Generalized Morphology ............................................ 351
  Jasper J. van de Gronde and Jos B.T.M. Roerdink

A Color Tree of Shapes with Illustrations on Filtering, Simplification, and Segmentation ................................................. 363
  Edwin Carlinet and Thierry Géraud

Elementary Morphological Operations on the Spherical CIELab Quantale ................................................................. 375
  Marcos Eduardo Valle and Raul Ambrozio Valente

Spectral Ordering Assessment Using Spectral Median Filters .......... 387
  Hilda Deborah, Noël Richard, and Jon Yngve Hardeberg

Non-adaptive and Amoeba Quantile Filters for Colour Images ........ 398
  Martin Welk, Andreas Kleefeld, and Michael Breuß

Ordering on the Probability Simplex of Endmembers for Hyperspectral Morphological Image Processing .......................... 410
  Gianni Franchi and Jesús Angulo

Bagging Stochastic Watershed on Natural Color Image Segmentation ... 422
  Gianni Franchi and Jesús Angulo

# Contents

A Combinatorial 4-Coordinate System for the Diamond Grid .......................... 585  
*Lidija Ćomić and Benedek Nagy*

Wiener Index on Lines of Unit Cells of the Body-Centered Cubic Grid .............. 597  
*Hamzeh Mujahed and Benedek Nagy*

Part-Based Segmentation by Skeleton Cut Space Analysis ............................ 607  
*Cong Feng, Andrei C. Jalba, and Alexandru C. Telea*

## Algorithms and Implementation

Fast Computation of Greyscale Path Openings ........................................... 621  
*Jasper J. van de Gronde, Herman R. Schubert, and Jos B.T.M. Roerdink*

Ranking Orientation Responses of Path Operators: Motivations, Choices and Algorithmics .......................... 633  
*Odyssée Merveille, Hugues Talbot, Laurent Najman, and Nicolas Passat*

Exact Linear Time Euclidean Distance Transforms of Grid Line Sampled Shapes ........................................ 645  
*Joakim Lindblad and Nataša Sladoje*

Fast Estimation of Intrinsic Volumes in 3D Gray Value Images ....................... 657  
*Michael Godehardt, Andreas Jablonski, Oliver Wirjadi, and Katja Schladitz*

Viscous-Hyperconnected Attribute Filters: A First Algorithm ........................ 669  
*Ugo Moschini and Michael H.F. Wilkinson*

Incremental and Efficient Computation of Families of Component Trees ............ 681  
*Alexandre Morimitsu, Wonder A.L. Alves, and Ronaldo F. Hashimoto*

Efficient Computation of Attributes and Saliency Maps on Tree-Based Image Representations ........................................... 693  
*Yongchao Xu, Edwin Carlinet, Thierry Géraud, and Laurent Najman*

Fast Evaluation of the Robust Stochastic Watershed .................................. 705  
*Bettina Selig, Filip Malmb erg, and Cris L. Luengo Hendriks*

A Watershed Algorithm Progressively Unveiling Its Optimality ...................... 717  
*Fernand Meyer*
An Approach to Adaptive Quadratic Structuring Functions
Based on the Local Structure Tensor ............................ 729

Anders Landström

Adaptive Hit or Miss Transform ................................. 741

Vladimir Ćurić, Sébastien Lefèvre, and Cris L. Luengo Hendriks

Author Index .......................................................... 753
Mathematical Morphology and Its Applications to Signal and Image Processing
Benediktsson, J.A.; Chanussot, J.; Najman, L.; Talbot, H. (Eds.)
2015, XIV, 754 p. 324 illus., Softcover
