Contents – Part II

Online Control of Enumeration Strategies via Bat-Inspired Optimization ................................................................. 1
  Ricardo Soto, Broderick Crawford, Rodrigo Olivares,
  Franklin Johnson, and Fernando Paredes

LEXMATH - A Tool for the Study of Available Lexicon in Mathematics ................................................................. 11
  Pedro Salcedo Lagos, María del Valle, Ricardo Contreras Arriagada,
  and M. Angélica Pinninghoff

Low-Power Occupancy Sensor for an Ambient Assisted Living System ................................................................. 20
  Francisco Fernandez-Luque, Juan Zapata, and Ramón Ruiz

Evolution of Synaptic Delay Based Neural Controllers for Implementing Central Pattern Generators in Hexapod Robotic Structures ........................................ 30
  José Santos and Pablo Fernández

Genetic Algorithm for the Job-Shop Scheduling with Skilled Operators .................................................. 41
  Raúl Mencia, María R. Sierra, and Ramiro Varela

Preliminary Design of the Real-Time Control Software for the Adaptive Optics of AOLI ........................................ 51
  Carlos Colodro-Conde, Luis F. Rodríguez-Ramos, Isidro Villó,
  Craig Mackay, Rafael Rebolo, Jonathan Crass,
  Juan J. Fernández-Valdivia, David L. King, Lucas Labadie,
  Roberto López, Alejandro Oscoz, Antonio Pérez-Garrido,
  Marta Puga, José M. Rodríguez-Ramos, and Sergio Velasco

Graph-Based Learning on Sparse Data for Recommendation Systems in Social Networks ........................................ 61
  J. David Nuñez-Gonzalez and Manuel Graña

Self-sampling Strategies for Multimemetic Algorithms in Unstable Computational Environments ............................. 69
  Rafael Nogueras and Carlos Cotta

On the Influence of Illumination Quality in 2D Facial Recognition ................................................................. 79
  Ángel Sánchez, José F. Vélez, and A. Belén Moreno
A Binary Cuckoo Search Algorithm for Solving the Set Covering Problem .......................................................... 88
Ricardo Soto, Broderick Crawford, Rodrigo Olivares, Jorge Barraza, Franklin Johnson, and Fernando Paredes

State Machine Based Architecture to Increase Flexibility of Dual-Arm Robot Programming ............................................ 98
Héctor Herrera, Jose Luis Outón, Urko Esnaola, Damien Sallé, and Karmele López de Ipiña

A Cellular Automata Model for Mobile Worm Propagation .............. 107
A. Martín del Rey, A. Hernández Encinas, J. Martín Vaquero, A. Queiruga Dios, and G. Rodríguez Sánchez

Evolving Cellular Automata to Segment Hyperspectral Images Using Low Dimensional Images for Training ......................... 117
B. Priego, Francisco Bellas, and Richard J. Duro

Multicriteria Inventory Routing by Cooperative Swarms and Evolutionary Algorithms ........................... 127
Zhiwei Yang, Michael Emmerich, Thomas Bäck, and Joost Kok

Embodied Evolution for Collective Indoor Surveillance and Location ... 138
Pedro Trueba, Abraham Prieto, Francisco Bellas, and Richard J. Duro

On the Spectral Clustering for Dynamic Data ............................ 148
D.H. Peluffo-Ordóñez, J.C. Alvarado-Pérez, and A.E. Castro-Ospina

A Multiple-Model Particle Filter Based Method for Slide Detection and Compensation in Road Vehicles ............................ 156
R. Toledo-Moreo, Carlos Colodro-Conde, and F. Javier Toledo-Moreo

Pedestrian Tracking-by-Detection Using Image Density Projections and Particle Filters .................................................. 166
B. Lacabex, A. Cuesta-Infante, A.S. Montemayor, and J.J. Pantrigo

Comparative Study of the Features Used by Algorithms Based on Viola and Jones Face Detection Algorithm ......................... 175
Alexandre Paz Mena, Margarita Bachiller Mayoral, and Estela Díaz-López

Experiments of Skin Detection in Hyperspectral Images ................. 184
Manuel Graña and Ion Marques

Scene Recognition for Robot Localization in Difficult Environments .... 193
D. Santos-Saaavedra, A. Canedo-Rodriguez, X.M. Pardo, R. Iglesias, and C.V. Regueiro
Pyramid Representations of the Set of Actions in Reinforcement Learning ............................................................... 203
R. Iglesias, V. Alvarez-Santos, M.A. Rodriguez, D. Santos-Saavedra, C.V. Regueiro, and X.M. Pardo

Related Tasks Selection to Multitask Learning Schemes ................. 213
Andrés Bueno-Crespo, Rosa-María Menchón-Lara, and José-Luis Sancho-Gómez

Towards Robot Localization Using Bluetooth Low Energy Beacons RSSI Measures .................................................. 222

A Growing Functional Modules Learning Based Controller Designed to Balance of a Humanoid Robot on One Foot ......................... 240
Jérôme Leboeuf-Pasquier

Optimized Representation of 3D Sequences Using Neural Networks ..... 251
Sergio Orts-Escolano, José García Rodríguez, Vicente Morell, Miguel Cazorla, Alberto García-García, and Sergiu Ovidiu-Oprea

Object Recognition in Noisy RGB-D Data .............................. 261
José Carlos Rangel, Vicente Morell, Miguel Cazorla, Sergio Orts-Escolano, and José García Rodríguez

Topology Preserving Self-Organizing Map of Features in Image Space for Trajectory Classification .............................. 271
Jorge Azorin-Lopez, Marcelo Saval-Calvo, Andres Fuster-Guillo, Higinio Mora-Mora, and Victor Villena-Martinez

A Comparative Study of Downsampling Techniques for Non-rigid Point Set Registration Using Color .......................... 281
Marcelo Saval-Calvo, Sergio Orts-Escolano, Jorge Azorin-Lopez, José García Rodríguez, Andres Fuster-Guillo, Vicente Morell-Gimenez, and Miguel Cazorla

Robust Control Tuning by PSO of Aerial Robots Hose Transportation ............................................. 291
Julian Estevez and Manuel Graña
Visual Bug Algorithm for Simultaneous Robot Homing and Obstacle Avoidance Using Visual Topological Maps in an Unmanned Ground Vehicle .......................................................... 301  
Darío Maravall, Javier de Lope, and Juan Pablo Fuentes

Neural Modeling of Hose Dynamics to Speedup Reinforcement Learning Experiments ..................................................... 311  
Jose Manuel Lopez-Guede and Manuel Graña

Autonomous Robot Navigation Based on Pattern Recognition Techniques and Artificial Neural Networks .................. 320  
Yadira Quiñonez, Mario Ramirez, Carmen Lizarraga, Iván Tostado, and Juan Bekios

Collaborative Group Formation Using Genetic Algorithms ............ 330  
M. Angélica Pinninghoff, Miguel Ramírez, Ricardo Contreras Arriagada, and Pedro Salcedo Lagos

David Griol, Miguel Ángel Patricio, and José Manuel Molina

Agent Based Modelling to Build Serious Games: The Learn to Lead Game .......................................................... 349  
Andrea Di Ferdinando, Massimiliano Schembri, Michela Ponticorvo, and Orazio Miglino

An Augmented Reality Application for Learning Anatomy ............ 359  
C. Rodríguez-Pardo, S. Hernandez, Miguel Ángel Patricio, A. Berlanga, and José Manuel Molina

Data Cleansing Meets Feature Selection: A Supervised Machine Learning Approach ............................................ 369  
Antonio J. Tallón-Ballesteros and José C. Riquelme

Multicriterion Segmentation of Demand Markets to Increase Forecasting Accuracy of Analogous Time Series: A First Investigation ............ 379  
Emiao Lu and Julia Handl

A Self-Organising Multi-Manifold Learning Algorithm ............ 389  
Hujun Yin and Shireen Mohd Zaki

Artificial Metaplasticity for Deep Learning: Application to WBCD Breast Cancer Database Classification .......................... 399  
Juan Fombellida, Santiago Torres-Alegre, Juan Antonio Piñuela-Izquierdo, and Diego Andina
Comparing ELM Against MLP for Electrical Power Prediction in Buildings
Gonzalo Vergara, Javier Cózar, Cristina Romero-González, José A. Gámez, and Emilio Soria-Olivas

Fish Monitoring and Sizing Using Computer Vision
Alvaro Rodriguez, Ángel J. Rico-Díaz, Juan R. Rabuñal, Jeronimo Puertas, and Luis Pena

Computer-Aided Development of Thermo-Mechanical Laser Surface Treatments for the Fatigue Life Extension of Bio-Mechanical Components
José-Luis Ocaña, Carlos Correa, Ángel García-Beltrán, Juan-Antonio Porro, Leonardo Ruiz-de-Lara, and Marcos Díaz

From Smart Grids to Business Intelligence, a Challenge for Bioinspired Systems
Irene Martín-Rubio, Antonio E. Florence-Sandoval, Juan Jiménez-Trillo, and Diego Andina

Neural Recognition of Real and Computer-Designed Architectural Images
M.D. Grima Murcia, María J. Ortíz, M.A. López-Gordo, J.M. Ferrández-Vicente, and Eduardo Ferrández
