

Contents

Prof. Faydor L. Litvin: A Life Dedicated to the Development of the Modern Theory of Gearing	1
A. Fuentes	
Prof. F.L. Litvin: Contribution to the Formation of the Russian School of the Theory of Gearing	19
S. Lagutin and N. Barmina	
Considerations on History of Mechanism and Machine Science with an IFToMM Role for Future Developments.	37
M. Ceccarelli	
Development of the Theory and Practice of Spiroid Gears.	55
V. Goldfarb	
Cause of Failure Beyond Conjugate Theory of Gear Meshing	67
A. Kubo	
Several Issues of Tooth Generating Process by Two-Parametric Families of Generating Lines	97
E. Trubachev	
Direct Gear Design for Asymmetric Tooth Gears	117
A. Kapelevich	
Analogs of Axes of Meshing in General Type Worm Gearing	145
S. Lagutin	

Development of Kinematic Method of Theory of Gearing to Determine Areas of Tooth Flanks Produced by Jogs of Generating Solids	159
D. Babichev	
Damage Types, Load Capacity and Efficiency of Crossed Helical Gears with Wheels from Sintered Steel.	189
A. Miltenović	
Modern Methods of Calculation and Increasing the Load-Carrying Capacity of Surface-Hardened Gears of Transmissions and Drives . . .	233
E. Tesker and S. Tesker	
Kinematical and Efficiency Analysis of Planetary Gear Trains by Means of Various Graph-Based Approaches	263
J. Drewniak, J. Kopec and S. Zawislak	
Rational Designs of Planetary Transmissions, Geometry of Gearing and Strength Parameters	285
F. Plekhanov and V. Goldfarb	
Compensation of Errors of Alignment Caused by Shaft Deflections in Spiral Bevel Gear Drives	301
A. Fuentes, R. Ruiz-Orzaez and I. Gonzalez-Perez	
Ease-Off and Application in Tooth Contact Analysis for Face-Milled and Face-Hobbed Spiral Bevel and Hypoid Gears.	321
Q. Fan	
Methods and Results of Composite Gears Design	341
S. Shil'ko, V. Starzhinsky and E. Petrokovets	
Selection of Overlap Ratios in Helical Gear with Low Vibration Excitation	369
O. Kosarev	
Terminology and Design of Asymmetrical Gears for Aircraft	381
A. Novikov, V. Golovanov, D. Dorofeyev and V. Dorofeyev	
Quality Control of Spur Gears on the Basis of Simulating Their Production Processes	393
M. Kane	

New Concept of the Process of Designing Gearboxes and Gear Systems	405
V. Goldfarb, O. Malina and E. Trubachev	
Design of Shaping Machine and Tooling Systems for Gear Manufacturing	425
A. Krivosheya, Ju. Danilchenko, M. Storchak and S. Pasternak

Theory and Practice of Gearing and Transmissions
In Honor of Professor Faydor L. Litvin
Goldfarb, V.; Barmina, N. (Eds.)
2016, IX, 450 p., Hardcover
ISBN: 978-3-319-19739-5
