# Contents

<b>1</b>	<b>Introduction</b> . . . . .	3
<b>2</b>	<b>The Theory of Parallel Lines in the Age of Leibniz</b> . . . . .	7
	2.1 From Antiquity to the Renaissance. . . . .	7
	2.2 Jesuit and French Attempts in the Seventeenth Century. . . . .	11
	2.3 Italian and British Attempts in the Seventeenth Century. . . . .	14
<b>3</b>	<b>Leibniz' Epistemology of Geometry and the Parallel Postulate</b> . . . . .	21
	3.1 Proving Axioms. . . . .	21
	3.2 Leibniz' Theory of Definition. . . . .	31
	3.3 Geometry as the Science of Space. . . . .	40
	3.4 Philosophy and the Parallel Postulate. . . . .	49
<b>4</b>	<b>Leibniz' Attempts to Prove the Parallel Postulate</b> . . . . .	57
	4.1 Preliminary Definitions. . . . .	57
	4.2 Leibniz' Youth and the Parisian Years ( <i>Texts 1–4</i> ). . . . .	65
	4.3 The First Studies on the Parallel Postulate: 1677–1689 ( <i>Texts 5–16</i> ). . . . .	70
	4.4 Leibniz' Studies in the 1690s ( <i>Texts 17–29</i> and <i>34</i> ). . . . .	80
	4.5 Leibniz' Late Studies ( <i>Texts 30–39</i> ). . . . .	91
<b>5</b>	<b>Reception and Legacy</b> . . . . .	103
	5.1 Toward a Geometry of Space in the Eighteenth Century. . . . .	103
	5.2 Wolff, Kästner and the Early Reactions. . . . .	105
	5.3 The Concept of <i>Lage</i> , Direction, and the Actual Infinite. . . . .	109
	5.4 The Principle of Reason. . . . .	115
<b>6</b>	<b>Leibniz' Texts on Parallel Lines</b> . . . . .	125
	6.1 From <i>Characteristica geometrica. Reading Notes to Fabri's</i> <i>"Synopsis geometrica"</i> (1673) . . . . .	125
	6.2 From <i>De secundis parallelis</i> (1676). . . . .	125
	6.3 From <i>Linea infinita &amp; extensio interminata</i> (January–April 1676) . . . . .	127
	6.4 From <i>Dissertationis de arithmetica circuli quadratura</i> <i>propositiones septem and Quadraturae circuli arithmetica</i> <i>pars prima</i> (April–June 1676). . . . .	129
	6.5 From Leibniz' Marginal Notes to Barrow's Edition of Euclid (1676–1677). . . . .	129

6.6	From <i>Characteristica geometrica</i> (January 1677) . . . . .	129
6.7	From <i>Characteristica geometrica, Scheda I</i> (1679) . . . . .	129
6.8	From <i>Linea est via puncti</i> ... (1679) . . . . .	131
6.9	<i>Axioma 13 Euclidis</i> ... (Around 1679) . . . . .	131
6.10	From <i>De calculo algebraico et constructiones lineares optime conciliandis</i> (January 1680). . . . .	133
6.11	From <i>Elementa nova matheseos universalis</i> (Summer 1683) . . . . .	135
6.12	From <i>Definitiones</i> (1685) . . . . .	137
6.13	From <i>Si linea recta moveatur</i> ... (1685). . . . .	139
6.14	From <i>De curvis similibus et similiter positis et parallelis</i> (1685). . . . .	139
6.15	From <i>Logica de notionibus. Annotata circa schedas Jungianas</i> (1685) . . . . .	141
6.16	From <i>Phoranomus</i> (1689). . . . .	143
6.17	From <i>Demonstrationes Euclideanas</i> (Around 1690). . . . .	143
6.18	<i>Parallelae</i> (1690) . . . . .	143
6.19	From <i>Generalia de natura linearum</i> ( <i>Acta eruditorum</i> , September 1692). . . . .	145
6.20	<i>Rectae parallelae</i> (around 1692) . . . . .	145
6.21	From <i>Lineam specie datam describere</i> (Around 1693) . . . . .	147
6.22	From Leibniz' Notes to Arnauld's <i>Nouveaux elemens de geometrie</i> (Around 1693) . . . . .	147
6.23	From <i>Elementa geometriae generalia</i> (Around 1694) . . . . .	153
6.24	From <i>De novo usu centri gravitatis</i> ( <i>Acta eruditorum</i> , November 1695). . . . .	153
6.25	From <i>Expediendi Laboris causa</i> ... (Around 1695) . . . . .	153
6.26	From <i>Duae rectae parallelae</i> ... (1695). . . . .	155
6.27	Leibniz to Johann Bernoulli (January 29 <sup>th</sup> /February 8 <sup>th</sup> , 1697) . . . . .	157
6.28	From <i>Specimen analyseos anagogicae</i> (1698) . . . . .	159
6.29	From <i>Justification du Calcul des infinitesimales par celui de l'Algebre ordinaire</i> (1702). . . . .	159
6.30	From <i>Attentius examinans</i> ... (Around 1702) . . . . .	159
6.31	From <i>Calculus situs</i> (Around 1702) . . . . .	161
6.32	From <i>Table de définitions</i> (1702–1704) . . . . .	165
6.33	From <i>Nouveaux Essais sur l'entendement humain</i> , II, xxxi, § 3; and III, iii, § 18 (1703–1705). . . . .	165
6.34	From <i>De lineae super linea incessu</i> ( <i>Acta eruditorum</i> , January 1706), and Letter to Johann Bernoulli (July 15 <sup>th</sup> , 1706) . . . . .	167
6.35	From <i>Demonstratio omnimoda</i> ... (1712). . . . .	167
6.36	From <i>In Euclidis πρῶτα</i> (1712) . . . . .	169
6.37	From <i>Spatium absolutum</i> ... (August–September 1714) . . . . .	179
6.38	From <i>Rectam definitio</i> ... (1715) . . . . .	179
6.39	From <i>Calculi situs fundamenta</i> ... (1715). . . . .	179

<b>Bibliography</b> . . . . .	181
