# Contents

1 Introduction ................................................................................................................. 1

2 Paradigmatic Shifts in the Theory, Practice, and Teaching of Medicine in Recent Decades ........................................................................... 3

Doctor–Patient Relations ............................................................................................... 3

Clinical Reasoning ........................................................................................................... 5

From Denial to Acceptance of Uncertainty ................................................................. 6

From Intuitive to Analytic Decision-Making ................................................................. 7

From Pathophysiologic Rationale to Evidence-Based Reasoning ......................... 8

From the Biomedical to the Biopsychosocial Model of Clinical Practice .......... 9

Doctor–Society Relations ............................................................................................... 10

From Accountability to Peers to Accountability to Laymen and Lay Institutions .............................................................. 10

From an Unrestricted to a Parsimonious Use of Resources ....................................... 10

From a Lone Professional to a Member of a Health-Care Team ............................... 11

Decline in Patient Trust and Physician Prestige ....................................................... 12

Medical Education ........................................................................................................ 13

From Memorization to Retrieval of Information .................................................... 13

From Unsystematic Acquisition of Clinical Skills to Supervised Practice and Simulations .............................................................. 13

From an Orientation to Biomedicine to the Addition of Teaching Programs in the Behavioral and Social Sciences ................................................. 14

From Inhospital to Community Clinical Teaching Settings .................................... 15

Future Challenges in Health-Care Delivery and Medical Education ...................... 15

References .................................................................................................................... 16
