Contents

Part I  Electrical 3D Integration

1  Introduction to Electrical 3D Integration ........................................... 3
   Sebastian Killge, Sujay Charania, and Johann W. Bartha

2  Copper-Based TSV: Interposer ......................................................... 9
   Sebastian Killge, Volker Neumann, and Johann W. Bartha

3  Energy Efficient Electrical Intra-Chip-Stack Communication ........ 29
   Johannes Görner, Dennis Walter, Michael Haas, and Sebastian Höppner

4  Multi-TSV Crosstalk Channel Equalization with Non-uniform Quantization ........................................... 69
   Tobias Seifert, Friedrich Pauls, and Gerhard Fettweis

5  Energy Efficient TSV Based Communication Employing 1-Bit Quantization at the Receiver ........................................... 85
   Lukas Landau and Gerhard Fettweis

6  Clock Generators for Heterogeneous MPSoCs Within 3D Chip Stacks ......................................................... 101
   Sebastian Höppner, Dennis Walter, and René Schüffny

7  Two-nanometer Laser Synthesized Si-Nanoparticles for Low Power Memory Applications ........................................... 129
   Nazek El-Atab, Ali K. Okyay, and Ammar Nayfeh

8  Accurate Temperature Measurement for 3D Thermal Management ......................................................... 157
   Sami ur Rehman and Ayman Shabra

9  EDA Environments for 3D Chip Stacks ........................................... 175
   Love Cederström
10 Integrating 3D Floorplanning and Optimization of Thermal Through-Silicon Vias ........................................... 195
Puskar Budhathoki, Johann Knechtel, Andreas Henschel, and Ibrahim (Abe) M. Elfadel

Part II Photonic and Opto-Electronic 3D Integration

11 Introduction to Optical Inter- and Intraconnects ................. 213
Niels Neumann, Ronny Henker, and Marcus S. Dahlem

12 Optical Through-Silicon Vias ........................................ 221
Sebastian Killge, Niels Neumann, Dirk Plettemeier, and Johann W. Bartha

13 Integrated Optical Devices for 3D Photonic Transceivers ........ 235
Seyedreza Hosseini, Michael Haas, Dirk Plettemeier, and Kambiz Jamshidi

14 Cantilever Design for Tunable WDM Filters Based on Silicon Microring Resonators ........................................ 255
Hossam Shoman and Marcus S. Dahlem

15 Athermal Photonic Circuits for Optical On-Chip Interconnects ...... 283
Peng Xing and Jaime Viegas

16 Integrated Circuits for 3D Photonic Transceivers .................. 297
Ronny Henker, Guido Belfiore, Laszlo Szilagyi, and Frank Ellinger

17 Review of Interdigitated Back Contacted Full Heterojunction Solar Cell (IBC-SHJ): A Simulation Approach ........................................ 309
Ayesha A. Al-Shouq and Adel B. Gougam

Index .................................................................................... 329
3D Stacked Chips
From Emerging Processes to Heterogeneous Systems
Elfadel, I.A.M.; Fettweis, G. (Eds.)
2016, XXIII, 339 p. 238 illus., 157 illus. in color.,
Hardcover
ISBN: 978-3-319-20480-2
