## Contents

### Part I  Respiration Essentials Revisited

1  **Mechanics of Respiration** ..................................................... 5  
   1.1  Introduction: Ready to Inspire and Breathe Air  ................. 6  
       1.1.1  Recoil Forces, Push and Pull  .......................... 7  
       1.1.2  PhyBalloon Learning (PBL!)  ........................... 8  
       1.1.3  An Alveolus Is ‘Laplace’ to Be!  ....................... 9  
       1.1.4  The D Space Note  ........................................ 11  
       1.1.5  The Key of G, the Key Effect of Gravity on Respiratory 
                Physiology .................................................. 12  
       1.1.6  The Trumpet and Respiration  ............................ 13  

2  **Diffusion, Blood O₂, CO₂ Content and Transport**  .................. 15  
   2.1  Introduction: Ready to Oxygenate, Deliver and Expire CO₂  .... 15  
       2.1.1  Ventilate, Oxygenate V/Q Matchmake  .................. 16  
       2.1.2  The F Notes ................................................. 17  
       2.1.3  The C Notes, Content of CO₂, O₂  ....................... 19  
       2.1.4  Interface, Surface in Cardio-Respiratory Physiology  .... 20  
       2.1.5  Bloody Multitasker Red Cell  ............................ 21  
       2.1.6  Dial CO₂ .................................................... 23  
       2.1.7  Exhale and Confess ........................................ 24  
       2.1.8  H⁺Aldane Homeostatic Teaching  ......................... 25  
       2.1.9  Pulmonary Vascular Resistance (PVR)  ................... 25  

3  **Regulation of Respiration** ................................................. 27  
   3.1  Introduction: Ready to Regulate and Alveolar Ventilate  .......... 28  
       3.1.1  Hold Your Breath .......................................... 29  
       3.1.2  Hypoxia and PCO₂ Too?  ................................. 30  
       3.1.3  Respiration Recap. ......................................... 31  
       3.1.4  Respiration Rewind ....................................... 32  
       3.1.5  Spring Respi-playground Swing  .......................... 34
4 Respiratory Recreation

4.1 Introduction: Ready to Integrate and Enjoy Respiratory Physiology

4.1.1 A Lung with the Kidneys; the Kid Never Walk Alone

4.1.2 Respiratory CARDology

4.1.3 Respi-CARDology, Six of Clubs

4.1.4 Seven of Respiratory Alveolar Clubs

4.1.5 Behold RespiPhysiology

4.1.6 Respiratory Songs; No Lungs, No Song

Part II Learning Scenarios

5 Mechanics of Respiration

5.1 Introduction

5.1.1 Theme: Lung Function Test

5.1.2 Theme: Compliance

5.1.3 Theme: Surface Tension, Laplace Law

5.1.4 Theme: Dead Space

5.1.5 Theme: Ventilation

5.1.6 Theme: Poiseuille Law

6 Oxygen Cascade and Blood O₂ Content and Transport

6.1 Introduction

6.1.1 Theme: Oxygen Content

6.1.2 Theme: Oxygen Dissociation Curve

6.1.3 Theme: Oxygen Carrying Capacity 1

6.1.4 Theme: Oxygen Carrying Capacity 2

6.1.5 Theme: Oxygen Cascade and Alveolar Gas Equation

6.1.6 Theme: Alveolar-Arterial Oxygen Gradient (A-a) O₂: 1

6.1.7 Theme: Alveolar-Arterial Oxygen Gradient (A-a) O₂: 2

6.1.8 Theme: Alveolar-Arterial Oxygen Gradient (A-a) O₂: 3

7 Regulation of Respiration

7.1 Introduction

7.1.1 Theme: Cor Pulmonale

7.1.2 Theme: Chronic Obstructive Pulmonary Disease (COPD)

7.1.3 Theme: Carbon Monoxide Poisoning

8 Respiratory Physiology in Hostile Environment

8.1 Introduction

8.1.1 Theme: High Altitude Respiratory Physiology

8.1.2 Theme: Sudden Decompression in a Jumbo Jet
8.1.3 Theme: Sudden Decompression in Space .......... 90
8.1.4 Theme: Snorkeling ........................................ 90
8.1.5 Theme: Diving .............................................. 91
8.1.6 Theme: Oxygen Toxicity ................................. 93
8.1.7 Theme: Dalton’s Law, Reynold’s Number .......... 93
8.1.8 Theme: Henry’s Law, Boyle’s Law and the ‘Bends’ .... 95

Bibliography .............................................................. 97

Index ................................................................. 99
Learning and Teaching Tools for Basic and Clinical Respiratory Physiology
Kheong, M.K.; Cheng, H.M.
2015, XI, 100 p. 35 illus., Softcover
ISBN: 978-3-319-20525-0
