Contents – Part II

Context Modelling and Situational Awareness

Multi-criteria Fusion of Heterogeneous Information for Improving Situation Awareness on Emergency Management Systems ................................................. 3
Valdir Amancio Pereira Jr., Matheus Ferraroni Sanches,
Leonardo Castro Botega, Jessica Souza, Caio Saraiva Coneglian,
Elvis Fusco, and Márcio Roberto de Campos

Situational Transformation of Personal Space ............................................. 15
Yosuke Kinoe and Nami Mizuno

A Method for Calculating Air Traffic Controller Communication Complexity .................................................................................................................. 25
Zach Roberts, Blake Arnsdorff, James Cunningham, and Dan Chiappe

Conceptual Framework to Enrich Situation Awareness of Emergency Dispatchers ......................................................................................................................... 33
Jessica Souza, Leonardo Castro Botega,
José Eduardo Santarém Segundo, Claudia Beatriz Berti,
Márcio Roberto de Campos, and Regina Borges de Araújo

Using Eye Movements to Test Assumptions of the Situation Present Assessment Method ......................................................................................................................... 45
Lindsay Sturre, Dan Chiappe, Kim-Phuong L. Vu,
and Thomas Z. Strybel

Map-Based Linking of Geographic User and Content Profiles for Hyperlocal Content Recommendation ....................................................................................................... 53
Steven Verstockt, Viktor Slavkovikj, and Kevin Baker

Scene Feature Recognition-Enabled Framework for Mobile Service Information Query System ............................................................................................................. 64
Yi-Chong Zeng, Ya-Hui Chan, Ting-Yu Lin, Meng-Jung Shih,
Pei-Yu Hsieh, and Guan-Lin Chao

Decision-Support Systems

What Methodological Attributes Are Essential for Novice Users to Analytics? – An Empirical Study ......................................................... 77
Supunmali Ahangama and Danny Chiang Choon Poo
What Should I Read Next? A Personalized Visual Publication Recommender System .................................................. 89
Simon Bruns, André Calero Valdez, Christoph Greven, Martina Ziefe, and Ulrik Schroeder

The Effect of Timing When Introducing a Decision Aid in a Decision Support System for Supply Chain Management .......................... 101
Nirit Gavish and Hussein Naseraldin

Design of Framework for Students Recommendation System in Information Technology Skills ............................................. 109
Thongchai Kaewkiriya

Improving Knowledge Management in Patient Safety Reporting: A Semantic Web Ontology Approach ................................. 118
Chen Liang and Yang Gong

Human Error and e-Navigation: Developing the Nautical Chart as Resilient Decision Support ............................................... 129
Thomas Porathe

Dealing with Data Deluge at National Funding Agencies: An Investigation of User Needs for Understanding and Managing Research Investments . 140
Mihaela Vorvoreanu, Ann McKenna, Zhihua Dong, and Krishna Madhavan

Dot Matrix Analysis of Plant Operation Data for Identifying Sequential Alarms Triggered by Single Root Cause .......................... 152
ZheXing Wang and Masaru Noda

An Analysis of the Synergistic Effect in the Advertisement: Between the Television Commercials and the Internet Commercials .......... 159
Tadahiro Yamada, Yumi Asahi, and Katsuhiko Yuura

Information and Interaction for Driving

Development of a New Low Cost Driving Simulation for Assessing Multidimensional Task Loads Caused by Mobile ICT at Drivers’ Workplaces. – Objective-Fidelity Beats Equipment-Fidelity? ............ 173
Michael Bretschneider-Hagemes

Differences in Driver Distractibility Between Monolingual and Bilingual Drivers .............................................................. 180
Isis Chong and Thomas Z. Strybel

Urban Driving: Where to Present What Types of Information – Comparison of Head-Down and Head-Up Displays .......................... 190
Martin Götze and Klaus Bengler
Contents – Part II

Information Sharing System Based on Situation Comprehensions of Intelligent Vehicles to Improve Drivers’ Acceptability for Proactive ADAS .......................................................... 201
Takuma Ito, Tatsuya Shino, and Minoru Kamata

An Analysis of Ear Plethysmogram for Evaluation of Driver’s Mental Workload Level .......................................................... 213
Ahmad Khushairy Makhtar and Makoto Itoh

Education Method for Safe Bicycle Riding to Evaluate Actual Cycling Behaviors When Entering an Intersection .......................................................... 225
Hiroaki Kosaka and Masaru Noda

Self-perception of Assister Driver Responsibility and Contribution in Mutual Assistance System .......................................................... 233
Sui Kurihashi, Yutaka Matsuno, and Kenji Tanaka

Map Matching to Correct Location Error in an Electric Wheel Chair .... 243
Yuta Noriduki, Hirotoshi Shibata, Shigenori Ioroi, and Hiroshi Tanaka

Driving Evaluation of Mild Unilateral Spatial Neglect Patients—Three High-Risk Cases Undetected by BIT After Recovery ........................................ 253
Tasuku Sotokawa, Takuya Murayama, Junko Noguchi, Yoko Sakimura,
and Makoto Itoh

Effect of Adaptive Caution on Driver’s Lane-Change Behavior under Cognitively Distracted Condition .......................................................... 262
Huiping Zhou and Makoto Itoh

Information and Interaction for Learning and Education

Hand-Raising Robot for Promoting Active Participation in Classrooms .... 275
Saizo Aoyagi, Ryuji Kawabe, Michiya Yamamoto, and Tomio Watanabe

Development of a Learning Support System for Class Structure Mapping Based on Viewpoint .......................................................... 285
Tatsuya Arai, Takahito Tomoto, and Takako Akakura

A Ubiquitous Lecture Archive Learning Platform with Note-Centered Approach .......................................................... 294
Shinobu Hasegawa and Jiangning Dai

Analysis of the Relationship Between Metacognitive Ability and Learning Activity with Kit-Build Concept Map .......................................................... 304
Yusuke Hayashi and Tsukasa Hirashima
The Effect of Problem Sequence on Students’ Conceptual Understanding in Physics

Tomoya Horiguchi, Takahito Tomoto, and Tsukasa Hirashima

A Topic Model for Clustering Learners Based on Contents in Educational Counseling

Takatoshi Ishii, Satoshi Mizoguchi, Koji Kimita, and Yoshiki Shimomura

Method to Generate an Operation Learning Support System by Shortcut Key Differences in Similar Software

Hajime Iwata

Learning State Model for Value Co-Creative Education Services

Koji Kimita, Keita Muto, Satoshi Mizoguchi, Yutarō Nemoto, Takatoshi Ishi, and Yoshiki Shimomura

Development of a Seminar Management System

Yusuke Kometani and Keizo Nagaoka

Analysis of Multiple-Choice Tests Through Erroneous Choices Using a Technique of Automatic Problem Generation

Noriyuki Matsuda, Hisashi Ogawa, Tsukasa Hirashima, and Hirokazu Taki

Proposal of an Instructional Design Support System Based on Consensus Among Academic Staff and Students

Shuya Nakamura, Takahito Tomoto, and Takako Akakura

Development of a Speech-Driven Embodied Entrainment Character System with Pupil Response

Yoshihiro Sejima, Yoichiro Sato, Tomio Watanabe, and Mitsuru Jindai

Development of a Learning Support System for Reading Source Code by Stepwise Abstraction

Keisuke Watanabe, Takahito Tomoto, and Takako Akakura

Information and Interaction for Culture and Art

Virtual Jizai-Ryu: Hi-Fidelity Interactive Virtual Exhibit with Digital Display Case

Yuki Ban, Takashi Kajinami, Takuji Narumi, Tomohiro Tanikawa, and Michitaka Hirose

Next Step of Cultural and Creative Products - Embracing Users Creativity

Chia-Ling Chang and Ming-Hsuan Hsieh
Association of National Dimensions of Culture with Perceived Public Sector Corruption .................................................. 420
Denis A. Coelho

K-Culture Time Machine: Development of Creation and Provision Technology for Time-Space-Connected Cultural Contents ................................................................. 428
Taejin Ha, Younsung Kim, Eunseok Kim, Kihong Kim, Sangmin Lim, Seungmo Hong, Jeain Kim, Sunhyuck Kim, Junghwa Kim, and Woontack Woo

Experience Simulator for the Digital Museum ................................................................. 436
Yasushi Ikei, Seiya Shimabukuro, Shunki Kato, Kohei Komase, Koichi Hirota, Tomohiro Amemiya, and Michiteru Kitazaki

Virtual Aquarium: Mixed Reality Consisting of 3DCG Animation and Underwater Integral Photography ................................................................. 447
Nahomi Maki and Kazuhisa Yanaka

Enhancing Abstract Imaginations of Viewers of Abstract Paintings by a Gaze Based Music Generation System ................................................................. 457
Tatsuya Ogusu, Jun Ohya, Jun Kurumisawa, and Shunichi Yonemura

Supporting Work and Collaboration

Possible Strategies for Facilitating the Exchange of Tacit Knowledge in a Team of Creative Professionals ................................................................. 467
Søren R. Frimodt-Møller, Nanna Borum, Eva Petersson Brooks, and Yi Gao

Innovation Compass: Integrated System to Support Creativity in Both Individuals and Groups ................................................................. 476
Yoshiharu Kato, Tomonori Hashiyama, and Shun’ichi Tano

Automatic Generation of Integrated Process Data Visualizations Using Human Knowledge ................................................................. 488
Felix Mayer, Ulrich Bührer, Dorothea Pantförder, Denise Gramß, and Birgit Vogel-Heuser

A Head-up Display with Augmented Reality and Gamification for an E-Maintenance System: Using Interfaces and Gamification to Motivate Workers in Procedural Tasks ................................................................. 499
Allan Oliveira, Nahana Caetano, Leonardo Castro Botega, and Regina Borges de Araújo

Representation Model of Collaboration Mechanism with Channel Theory ................................................................. 511
Patchanee Patitad and Hidetsugu Suto
Using Wearable and Contextual Computing to Optimize Field Engineering Work Practices .................................................. 522

Roberto S. Silva Filho, Ching-Ling Huang, Anuj Tewari, James Jobin, and Piyush Modi

Information and Interaction for Safety, Security and Reliability

SAW-Oriented User Interfaces for Emergency Dispatch Systems ............ 537

Leonardo Castro Botega, Lucas César Ferreira, Natália Pereira de Oliveira, Allan Oliveira, Claudia Beatriz Berti, Vânia Paula de Neris, and Regina Borges de Araújo

A Method for Generation and Check of Alarm Configurations
Using Cause-Effect Matrices for Plant Alarm System Design ............... 549

Takashi Hamaguchi, B. Mondori, Kazuhiro Takeda, Naoki Kimura, and Masaru Noda

Parking Autonomous Skids .................................................. 557

James Hing, Ross Boczar, and Kyle Hart

SAFT: Firefighting Environment Recognition Improvement for Firefighters . . . . . 569

Jin Hyun Park, In Jin Baek, and Su Ji Han

Modelling of a Business Process for Alarm Management Lifecycle in Chemical Industries .................................................. 579

Kazuhiro Takeda, Takashi Hamaguchi, Naoki Kimura, and Masaru Noda

Disaster Recovery Framework for e-Learning Environment
Using Private Cloud Collaboration and Emergency Alerts ................. 588

Satoshi Togawa and Kazuhide Kanenishi

Information and Interaction for in Novel Advanced Environments

Study About Creation of “Maai” Involving Intention Using Rhythm Controller: Development of Maai Creating Agent and Interaction Experiments Between Human and Agent ....................................... 599

Shiroh Itai and Yoshiyuki Miwa

Designing the Embodied Shadow Media Using Virtual Three-Dimensional Space .................................................. 610

Yusuke Kajita, Takuto Takahashi, Yoshiyuki Miwa, and Shiroh Itai

Kick Extraction for Reducing Uncertainty in RoboCup Logs ................ 622

Tomoharu Nakashima, Satoshi Mifune, Jordan Henrio, Oliver Obst, Peter Wang, and Mikhail Prokopenko
Virtual Bogie: Exhibition System to Understand Mechanism of Bogie
with Digital Display Case .................................................. 634
Tomohiro Tanikawa, Hirosi Ohara, Ryo Kiyama, Takuji Narumi,
and Michitaka Hirose

Fortune Air: An Interactive Fortune Telling System Using Vortex
Air Cannon ................................................................. 646
Ryoko Ueoka and Naoto Kamiyama

Development of the Horror Emotion Amplification System by Means
of Biofeedback Method ..................................................... 657
Ryoko Ueoka and Kouya Ishigaki

Application of the Locomotion Interface Using Anthropomorphic
Finger Motion ............................................................... 666
Yusuke Ujitoko and Koichi Hirota

Considering a New Nanbu Fuurin Design that Play a Healing Sound
– Including Innovations in Appearance and Texture,
and Continually Improving– ........................................... 675
Ying Zhang and Takamitsu Tanaka

Erratum to: Human Interface and the Management of Information (Part II). . E1
Sakae Yamamoto

Author Index ............................................................... 685
## Contents – Part I

### Information Visualisation

Annotated Domain Ontologies for the Visualization of Heterogeneous Manufacturing Data .......................................................... 3

_Rebekka Alm, Mario Aehnelt, Steffen Hadlak, and Bodo Urban_

Evaluation of Data Display Methods in a Flash Flood Prediction Tool .... 15

_Elizabeth M. Argyle, Chen Ling, and Jonathan J. Gourley_

Modernizing Exploration and Navigation in Enterprise Systems with Interactive Visualizations .................................................. 23

_Tamara Babaian, Wendy Lucas, and Mengru Li_

Explorative Visualization of Impact Analysis for Policy Modeling by Bonding Open Government and Simulation Data .................. 34

_DIRK Burkhardt, Kawa Nazemi, Egils Ginters, Artis Aizstrauits, and Jörn Kohlhammer_

Big Data Visualization for Occupational Health and Security Problem in Oil and Gas Industry ......................................................... 46

_Daniela Gorski Trevisan, Nayat Sanchez-Pi, Luis Marti, and Ana Cristina Bicharra Garcia_

Affective Responses of Interpolated Sketches ........................................... 55

_Kun-An Hsiao_

An Approach to Spatial Visualizing Method for Information Structure to Enhance Remember to Look ........................................ 67

_Jae-Gil Lee and Dong-Hee Shin_

Visual Interactive Process Monitoring .................................................. 74

_Sebastian Maier, Hannes Kühnel, Thorsten May, and Arjan Kuijper_

Uncertainty Visualization Framework for Improving Situational Awareness in Emergency Management Systems ....................... 86

_Natalia Ferreira Oliveira, Leonardo Castro Botega, Lucas César Ferreira, and Márcio Roberto de Campos_

A Concept for Visualizing Psychophysiological Data in Human Computer Interaction: The FeaturePlotter ............................. 97

_Falko Pross, Dilana Hazer, Harald C. Traue, and Holger Hoffmann_
Proposal of a Visualization Method to Support Informal Communication Using Twitter Attributes. .................................................. 107
   Ryota Sasajima, Kohei Otake, Makoto Oka, and Akito Sakurai

A Team Hiring Solution Based on Graph-Based Modelling of Human Resource Entities ............................. 115
   Avinash Sharma, Jyotirmaya Mahapatra, Asmita Metrewar, Abhishek Tripathi, and Partha Dutta

Reading Through Graphics: Interactive Landscapes to Explore Dynamic Topic Spaces .............................. 127
   Eva Ulbrich, Eduardo Veas, Santokh Singh, and Vedran Sabol

Edge Bundling in Multi-attributed Graphs ............................................. 138
   Takafumi Yamashita and Ryosuke Saga

Information Presentation

URU: A Platform for Prototyping and Testing Compatibility of Multifunction Interfaces with User Knowledge Schemata .............................. 151
   Sandrine Fischer, Blaine Oelkers, Mitchell Fierro, Makoto Itoh, and Eric White

An Exploration of the Effectiveness of Infographics in Contrast to Text Documents for Visualizing Census Data: What Works? ......................... 161
   Marylisa Gareau, Rebecca Keegan, and Lin Wang

Searching for Information: Comparing Text vs. Visual Search with Newspapers Websites ............................. 172
   Victor M. González, Jesús García, and Bárbara Muro

The Usability of Magnification Methods: A Comparative Study Between Screen Magnifiers and Responsive Web Design ............................. 181

Generating Summary Videos Based on Visual and Sound Information from Movies ........................................ 190
   Yurina Imaji and Masaya Fujisawa

Narrower Conceptual Scope in the App Than the Web Store Interface – The Size Does It and the Ad Has It ................................. 204
   Chien-Ling Kao and Man-Ying Wang

Exploring Cultural Symbols in Nigeria for Contemporary Applications in Web Visual Design ............................. 215
   Isah Bolaji Kashim, Oluwafemi S. Adelabu, and Sunday O. Ogunwole
Generation of Infotips from Interface Labels. ................................. 226
   Eric White, Sandrine Fischer, and Foaad Khosmood

Proposal of a Data Presentation Technique Using Four-Frame Cartoon
Expression for a LifeLog System .................................................. 235
   Takashi Yoshino and Iori Osada

Search in One’s Hand: How Users Search a Mobile Library Catalog. ...... 247
   Tao Zhang, Xi Niu, Liugen Zhu, and Hsin-liang Chen

Knowledge Management

Fusing Text and Image Data with the Help of the OWLnotator. ............ 261
   Giuseppe Abrami, Alexander Mehler, and Dietmar Pravida

A Filtering System of Web History Using the Browsing Characteristic ...... 273
   Keita Arai, Makoto Oka, and Hirohiko Mori

Seed, a Natural Language Interface to Knowledge Bases .................... 280
   Bahaa Eldesouky, Heiko Maus, Sven Schwarz, and Andreas Dengel

Managing References by Filing and Tagging: An Exploratory Study
of Personal Information Management by Social Scientists .................. 291
   Pierre Fastrez and Jerry Jacques

Towards a Class-Based Model of Information Organization in Wikipedia. . . 301
   Michael Gilbert and Mark Zachry

A General Framework for Text Document Classification Using SEMCON
and ACVSR ............................................................................... 310
   Zenun Kastrati, Ali Shariq Imran, and Sule Yildirim Yayilgan

A New Information Architecture: A Synthesis of Structure, Flow,
and Dialectic ............................................................................. 320
   Rico A.R. Picone and Bryan Powell

Haptic, Tactile and Multimodal Interaction

Effects of Tacton Names and Learnability ................................. 335
   Daniel Barber and Christopher Beck

Augmenting Soldier Situation Awareness and Navigation Through Tactile
Cueing ................................................................. 345
   Linda R. Elliott, Bruce Mortimer, Gina Hartnett-Pomranky, Gary Zets,
   and Greg Mort
Multisensory Information Processing for Enhanced Human-Machine Symbiosis

Frederick D. Gregory and Liyi Dai

Increase and Decrease of Optical Illusion Strength By Vibration

Teluhiko Hilano and Kazuhisa Yanaka

Presentation Method of Walking Sensation Based on Walking Behavior Measurement with Inertial Sensors and Pressure Sensors

Kohei Ichihara, Koichi Hirota, Yasushi Ikei, and Michiteru Kitazaki

Induction of a Relaxed State Using a Vibration Stimulus Based on the Respiratory Cycle

Naoto Iwamoto and Hiroshi Hagiwara

Designing Memorable Tactile Patterns

Daiji Kobayashi and Hiroyasu Mitani

Changes in Heart Rate Variability by Using Tactile Thermal Interface Device

Kentaro Kotani, Shigeyoshi Iizuka, Takafumi Asao, and Satoshi Suzuki

Human Factors to Consider During the Early Development and Dissemination of New Displays to Improve Spatial Orientation and Situation Awareness

Ben D. Lawson, John Christopher Brill, Linda-Brooke I. Thompson, Amanda M. Kelley, Casey R. Harris, and Angus H. Rupert

Computer Input System Using Eye Glances

Shogo Matsuno, Kota Akehi, Naoaki Itakura, Tota Mizuno, and Kazuyuki Mito

Basic Study of Evoking Emotion Through Extending One’s Body Image by Integration of Internal Sense and External Sense

Sho Sakurai, Takuji Narumi, Toki Katsumura, Tomohiro Tanikawa, and Michitaka Hirose

Development of Tactile and Gestural Displays for Navigation, Communication, and Robotic Control

Anna Skinner, Jack Vice, and Lisa Baraniecki

Human Characteristics of Figure Recognition in Tactile Feedback

Motoki Tanuma, Makoto Oka, and Hirohiko Mori

Recognition of Written Cues System for Users of General Paper Media

Daiki Yamaji and Jiro Tanaka
Study of Haptics and Tactile Sense of the Direction of Movement .............. 477
  Sakae Yamamoto, Yukiko Yokomizo, and Daiji Kobayashi

**Service Design and Management**

Proposal of New Lighting Which Combined Functionality of Street Light and Outdoor Light. .................................................. 491
  Takeo Ainoya, Keiko Kasamatsu, and Akio Tomita

A Multi-agent Based System for Route Planning. ................................ 500
  Eugene Belyi, Indravan Patel, Anusha Reddy, and Vijay Mago

Improving Service Quality by Prioritizing Service Attributes Using SERVQUAL and Kano Model: A Case Study of Nursing Home in Taiwan... 513
  Chin-Mei Chou, Cindy Sutanto, and Shu-Kai Wu

Travel-Information Sharing System Using Tweets with Location Information ................................................................. 526
  Junko Itou, Keiichiro Nakamura, and Jun Munemori

Ubiquitous Healthcare Systems: Improving the Adherence Level within Diabetic Medication Using Cloud-Based Reminder System........... 535
  Mohammed Kalkattawi and Tatsuo Nakajima

Centralized Approach for a Unified Wireless Network Access ............... 547
  Jan David Nose, Jaromir Likavec, Christian Bischof, and Arjan Kuijper

Proposal of Advance Care Planning Support System .......................... 560
  Satomi Yamamoto, Takashi Yoshino, Chigusa Kita, Misa Takeshima, and Takashi Kato

**User Studies**

A Study of the Feature of the Lovely Product Forms ............................ 571
  Wen-chih Chang and Ching-An Hsu

Induction of Human Behavior by Presentation of Environmental Acoustics... 582
  Eisuke Fujinawa, Sho Sakurai, Masahiko Izumi, Takuji Narumi, Osamu Houshuyama, Tomohiro Tanikawa, and Michitaka Hirose

Modeling User’s Sentiment in User Segmentations: An Argumentation Approach for User Centered Design .................................... 595
  Maria Paula González, Carlos I. Chesñevar, and Ramon Brena

Voice Control System and Multiplatform Use: Specialist Vs. Generalist?.... 607
  Soyoung Jung, Kwan Min Lee, and Frank Biocca
