1.4 Mega Cities
1.4.1 Massive Urbanization of Developing and Poor Countries
1.4.2 Mega Transportation Problems of Megacities
1.4.3 Increased Vehicle Capacity
1.4.4 Increased Network Capacity
1.4.5 Road Capacity
1.4.6 Bus Rapid Transit (BRT) Capacity
1.4.7 Mass Transit Capacity
1.4.8 System Price Comparison
1.5 Connected Cities
1.5.1 Constant Network Connection
1.5.2 The “Internet of Things”
1.5.3 M2M Communication
1.5.4 M2M Applied to Cars
1.6 New Business Models
1.6.1 Privatization
1.6.2 Financing Transportation Projects
1.6.3 Financial Instruments and Incentives
1.6.4 Capturing Future Wealth Increase
1.6.5 Mobile Advertising
1.6.6 Geo-localization Advertising
1.6.7 Portal of Choice
1.7 Changing the Face of Transportation
1.7.1 Electrifying Transport
1.7.2 Encouraging New Business Models
1.7.3 Creating the Legal Framework for Unmanned Vehicles
1.7.4 Barriers to Adoption

Companies and Brands Stated in the Chapter.

2 Risk Adverse Society
2.1 Introduction
2.1.1 Graying of Society
2.1.2 Society of Litigation
2.1.3 Impact of These Trends on Transportation
2.1.4 Safety Facts and Figures
2.1.5 Security
2.1.6 Homologation
2.2 Safety Concepts
2.2.1 Railway Safety Concepts
2.2.2 Safety Procedures
2.2.3 Interoperability
2.2.4 WaySide Safety Technologies
2.8 The Advent of Vehicle-to-Vehicle Communication
2.8.1 VANET .......................... 114
2.8.2 Wave Technology ................. 115
2.8.3 CALM Technology ............. 115
2.8.4 LTE Technology in VANET .... 116
2.8.5 Mesh Network Infrastructure .... 116
2.8.6 Vehicular Application .......... 118
2.8.7 Anti-collision System .......... 118
2.8.8 Accurate Geo-Positioning ....... 119
2.8.9 V2V Operational Mode .......... 121

2.9 Intelligent Wayside Technologies ...... 122
2.9.1 Vehicle-to-Cloud (V2C) .......... 122
2.9.2 Intelligent Parking .............. 123
2.9.3 Intelligent Traffic Systems ...... 123
2.9.4 Distributed Intelligence ......... 124

2.10 Driverless Cars .................... 125
2.10.1 Data Acquisition ............... 125
2.10.2 Data Treatment .................. 126
2.10.3 Financial Barrier to Adoption .... 128
2.10.4 Legal Barrier to Adoption ...... 129
2.10.5 Legal Responsibilities .......... 130
2.10.6 Vehicle Manufacturer Potential Liabilities ..... 131
2.10.7 Onboard Signaling System Provider Potential Liabilities ................. 131
2.10.8 Telecom Provider Potential Liabilities .......... 132
2.10.9 V2C Hosting Centers ............ 133
2.10.10 Road Infrastructure Provider ... 133
2.10.11 Operator or Car Owner ........ 133
2.10.12 Suggestions to Minimize Legal Barrier to Adoption ......... 134
2.10.13 Technical Suggestions to Minimize Potential Litigation ................. 136
2.10.14 When Will It Happened? ...... 137
2.10.15 Self-driving Market .......... 139
2.10.16 Testing the Driverless Application ...... 141

2.11 Security ......................... 141
2.11.1 E-Mobility Security Solution .... 142
2.11.2 End-to-End Security Solutions .... 143
2.11.3 Technological Trends in Security .... 143
2.11.4 Limitations of Analog Security Systems .......... 145
2.11.5 IP Cameras ..................... 145
2.11.6 Integrated Audio ............... 146
2.11.7 Compression Technology ........ 146
3 Environmentally Conscious Society .......................................................... 157
3.1 Governmental Environmentally Friendly Initiatives ............................ 159
  3.1.1 Tax on Combustible .......................................................... 160
  3.1.2 Carbon Tax ................................................................. 162
  3.1.3 New Clean Air Regulation: California Clean Car Law .................. 162
  3.1.4 Internalization of External Costs ........................................... 163
  3.1.5 Incentive Measures: Tax Credit or Penalties .............................. 163
  3.1.6 Congestion Charges ....................................................... 164
  3.1.7 Public Transport Subsidies ................................................. 164
3.2 Energy Consumption Comparison Between Car Technologies .................. 165
  3.2.1 Diesel, Gasoline, or Electric Cars ........................................ 165
  3.2.2 Comparable Measuring Units .............................................. 165
  3.2.3 Comparison at the Point of Energy Consumption ......................... 166
  3.2.4 Electrical Car Consumption Study ........................................ 167
  3.2.5 Engine Efficiency .......................................................... 169
  3.2.6 Braking Energy Recuperation .............................................. 170
  3.2.7 A Comparison Done at the Point of Energy Generation ................. 174
  3.2.8 Electric Power Generation and Distribution Efficiency .................. 174
  3.2.9 Petroleum-Equivalency Factor (PEF) ...................................... 176
  3.2.10 Well-to-Wheel Energy Comparison ....................................... 176
  3.2.11 Energy Efficiency According to the Energy Matrix ..................... 178
  3.2.12 National Energy Savings Resulting from an All Electric Fleet ........ 181
3.3 Evolution of the Electric Vehicle Market ............................................. 181
  3.3.1 Difference in Price at the Pump .......................................... 182
  3.3.2 Total Cost of Ownership .................................................. 183
  3.3.3 Battery Capacity .......................................................... 184
  3.3.4 Battery Efficiency .......................................................... 185
  3.3.5 Energy Charging Time ..................................................... 186
  3.3.6 Charging Infrastructure .................................................... 188

  4.6.3 Bus Facilities .............................................. 258
  4.6.4 Traffic Signal Timing ..................................... 258
  4.6.5 Bus Capacity for One Loading Area ..................... 258
  4.6.6 Bus Capacity for Several Loading Areas ............... 259
  4.6.7 Real Bus Capacity at Average Speed .................... 260

4.7 Unmanned Bus Operation .......................................... 261

4.8 Mass Transit Capacity ........................................... 263
  4.8.1 Increasing Capacity of Existing Infrastructure ...... 263
  4.8.2 Vehicle Capacity ........................................ 263
  4.8.3 Mass Transit Network Capacity ......................... 266
  4.8.4 Railway System Capacity ................................ 266
4.9 Transport Mode Capacity Comparison

4.9.1 Highway and Road Capacity
4.9.2 Bus and BRT Capacity
4.9.3 Metro and Train Capacity
4.9.4 Comparing Apples with Apples
4.9.5 Considering Lost Capacity

4.10 System Price Comparison

4.10.1 CAPEX Comparison
4.10.2 OPEX Comparison
4.10.3 Social and Environmental Costs
4.10.4 Appropriation Costs
4.10.5 Expropriation Costs
4.10.6 Congestion Costs
4.10.7 Environmental Costs
4.10.8 Social Benefits
4.10.9 Health Cost Linked to Air Pollution

4.11 Quality of Ride

4.11.1 Average Speed
4.11.2 Comfort
4.11.3 Quality of Service
4.11.4 Access to Information
4.11.5 Transportation Modes’ Integration

5 Connected Cities

5.1 Introduction
5.1.1 The Mobile Environment
5.1.2 Acquisition of Intelligent Thermostat Manufacturer

5.2 The “Internet of Things” Technologies

5.2.1 Internet Protocol Definition
5.2.2 TCP/IP Layers
5.2.3 Network Topology Description
5.2.4 Service-Oriented Architecture (SOA)
5.2.5 Service Delivery Platform (SDP) and Access Networking
5.2.6 Next Generation Networks (NGN)
5.2.7 Event-Driven Architecture (EDA)
5.2.8 EDA and SOA Together
5.2.9 Plug and Play Technology (PnP)

5.3 M2M Communication

5.3.1 Sensing Devices
5.3.2 RFID
5.3.3 Algorithms
6.4 Reducing Infrastructure Construction Needs

6.4.1 Encourage Working from Home

6.4.2 Encourage People to Stay in Their Neighborhood

6.4.3 Higher Occupancy Rate

6.4.4 Higher Transportation Means Density

6.4.5 Car and Parking Space Reduction

6.5 Electrifying Transport

6.6 Changing Public Transport Business Model

6.6.1 Total Cost of Ownership (TCO)

6.7 Private to Public Transport Cross-Subsidizing

6.7.1 Fast Lane Cross-Subsidizing

6.7.2 Localized Congestion Charges

6.8 Internet Connectivity

6.8.1 Pay-Per-Click Model (PPC)

6.8.2 Time Spent Online

6.8.3 Mobile Shopping

6.8.4 Mobile Activities

6.8.5 Generation Gap

6.8.6 Mobile Advertising Market Estimation

6.9 Transport Information Supplier of Choice

6.9.1 Public Transport Information System

6.9.2 Battle for Passenger Information Access

6.9.3 Social Public Transport Apps

6.9.4 GPS Location-Based Information

6.9.5 Beacon Location Based Information

6.9.6 Legal Use of Geo-tagging Space

6.9.7 Cross-Subsidies of Mobile Advertising Revenues

6.9.8 Road Transport Information System

6.10 E-mobility Software Applications

6.10.1 Social Car Apps

6.10.2 Car Pooling Apps

6.10.3 Car Sharing Initiatives and Apps

6.10.4 Mobile Taxi Hailing Apps

6.11 Change of Car Ownership Business Model

6.11.1 Car’s Negative Image

6.11.2 Commoditization of Cars

6.11.3 Blurring Differences Between Private and Public Transport

6.11.4 Car Ownership Models

6.12 Change of “Public Service Car” Business Models

6.12.1 Conventional Taxi Business Model

6.12.2 New Taxi Hailing Business Model

6.12.3 The End of Taxi Drivers

Companies and Brands Stated in the Chapter
7 E-Mobility Likely Winners and Losers ........................................ 367
7.1 Who Can Ignore the E-Mobility Revolution? ............................... 367
   7.1.1 Flying Cars ........................................ 368
   7.1.2 Trains and Hyperloops ..................................... 369
   7.1.3 Can the E-Mobility Not Happen? ................................ 370
7.2 E-Mobility Technology Adoption ............................................ 371
   7.2.1 Railway Industry ........................................ 371
   7.2.2 Automotive and Bus Industries ................................. 371
   7.2.3 Lack of Industry Standard ................................... 372
   7.2.4 Lack of Infrastructure ....................................... 372
   7.2.5 Unmanned Car Technology Adoption Barriers .................... 373
   7.2.6 Sensor Technology .......................................... 373
   7.2.7 V2V and V2I Connectivity Solution ............................. 373
   7.2.8 Putting All Pieces Together ................................... 374
   7.2.9 Growing or Shrinking Market? ................................ 375
   7.2.10 Railway Signaling Business Model .............................. 377
   7.2.11 Smartphone Revolution ...................................... 377
   7.2.12 Designer Model ............................................ 378
   7.2.13 Licensing Model ........................................... 379
   7.2.14 Service Model .............................................. 379
7.3 E-Mobility Likely Losers .................................................. 380
   7.3.1 Parking Owners and Municipalities ............................... 380
   7.3.2 Car Manufacturers ........................................... 381
   7.3.3 Body Shops .................................................. 383
   7.3.4 Current PRT Manufacturers .................................... 383
   7.3.5 Steel Companies ............................................. 383
   7.3.6 Light Rail Vehicle ............................................ 383
   7.3.7 Conventional Bus Operation ................................... 383
   7.3.8 Conventional Car Rental Industry ............................... 384
   7.3.9 Fossil Fuel Industry .......................................... 384
   7.3.10 Health Sector ................................................ 384
   7.3.11 Personal-Injury Lawyers ...................................... 385
7.4 E-Mobility Likely Winners .................................................. 385
   7.4.1 Electric Car Manufacturers ...................................... 385
   7.4.2 Environment .................................................. 385
   7.4.3 Insurers ...................................................... 386
   7.4.4 Government Authorities ........................................ 387
   7.4.5 Software Providers ............................................ 387
   7.4.6 System Integration Providers .................................. 389
   7.4.7 Road Infrastructure Providers .................................. 389
   7.4.8 Electrical Infrastructure Providers ............................. 390
   7.4.9 Society ...................................................... 390
