Contents

1 Age Replacement Overtime ........................................ 1
  1.1 Age and Random Replacements .................................. 2
  1.2 Replacement Overtime ........................................... 6
  1.3 Comparisons of Age and Random Replacements ............... 8
  1.4 Replacement Overtime Last .................................... 12
  1.5 Finite Interval ................................................... 16
  1.6 Working Number ................................................ 24
  1.7 Parallel System .................................................. 27
References .............................................................. 31

2 Periodic Replacement Overtime .................................... 33
  2.1 Periodic and Random Replacements ............................. 34
  2.2 Replacement Overtime ............................................ 38
  2.3 Comparisons of Periodic and Random Replacements ......... 41
  2.4 Replacement Overtime Last ..................................... 43
  2.5 Replacement Overtime with Number of Failures ............ 46
    2.5.1 Replacement Overtime First with Number of Failures ... 46
    2.5.2 Replacement Overtime Last with Number of Failures ... 50
  2.6 Replacement Overnumber ...................................... 52
    2.6.1 Replacement over Number N ............................... 52
    2.6.2 Replacement over Number K ............................... 54
  2.7 Preventive Maintenance Overtime .............................. 56
References .............................................................. 58

3 Inspection Overtime ............................................... 59
  3.1 Periodic and Random Inspections ............................... 60
  3.2 Inspection First and Last ..................................... 64
    3.2.1 Inspection First ........................................... 64
    3.2.2 Inspection Last ........................................... 67
    3.2.3 Comparison of Inspection First and Last ............... 69
Maintenance Overtime Policies in Reliability Theory
Models with Random Working Cycles
Nakagawa, T.; Zhao, X.
2015, X, 118 p. 2 illus., Hardcover
ISBN: 978-3-319-20812-1
