Contents

Star-Unfolding Polygons .......................................................... 1
   Md. Ashraful Alam and Ileana Streinu

Volume Frameworks and Deformation Varieties ......................... 21
   Ciprian S. Borcea and Ileana Streinu

Recent Advances in Real Geometric Reasoning ......................... 37
   James H. Davenport and Matthew England

The Relation Tool in GeoGebra 5 ........................................... 53
   Zoltán Kovács

Computer Theorem Proving for Verifiable Solving of Geometric
Construction Problems ....................................................... 72
   Vesna Marinković, Predrag Janičić, and Pascal Schreck

Integrated Circumradius and Area Formulae for Cyclic Pentagons
and Hexagons ................................................................. 94
   Shuichi Moritsugu

Extension of Simson–Wallace Theorem on Skew Quadrilaterals
and Further Properties .................................................... 108
   Pavel Pech

Current Status of the I2GATP Common Format ......................... 119
   Pedro Quaresma and Nuno Baeta

On Flattenability of Graphs .................................................. 129
   Meera Sitharam and Joel Willoughby

Discovering Geometric Theorems from Scanned and Photographed
Images of Diagrams ......................................................... 149
   Dan Song, Dongming Wang, and Xiaoyu Chen

Combinatorial Rigidity and Independence of Generalized Pinned
Subspace-Incidence Constraint Systems ................................. 166
   Menghan Wang and Meera Sitharam

Author Index ........................................................................... 181
Automated Deduction in Geometry
10th International Workshop, ADG 2014, Coimbra, Portugal, July 9-11, 2014, Revised Selected Papers
Botana, F.; Quaresma, P. (Eds.)
2015, IX, 181 p. 54 illus., Softcover
ISBN: 978-3-319-21361-3
