

Contents

1	Introduction	1
1.1	Background	1
1.1.1	Complexity: A Shift from Reductionism	1
1.1.2	Complex Systems: Structure and Behaviour	4
1.2	Motivation	6
1.2.1	Transmission of Energy	6
1.2.2	Synchronisation	7
1.3	Summary of Results	8
	References	11
2	Complex Networks	13
2.1	Networks	13
2.1.1	Notions and Definitions	14
2.1.2	Matrix Representations	17
2.1.3	Network Characterisation Methods	20
2.1.4	Archetypal Networks	22
2.2	The Laplacian Matrix	26
2.2.1	General Properties	26
2.2.2	Eigenvalues and Eigenvectors	28
2.2.3	Spectral Theorems	31
2.2.4	Spectral Properties of Laplacian Matrices	33
2.3	Resistance Distance	35
2.3.1	Laplacian Matrix Pseudo-inverse	36
2.3.2	Circulant Networks Spectral Characteristics	38
2.3.3	Equivalent Resistance, Its Bounds, and the Kirchoff Index	40
	References	43

3	Transmission of Energy	45
3.1	Flow Networks.	46
3.1.1	AC/DC Flow Networks.	46
3.1.2	DC Conservative Flow-Network Solutions.	49
3.1.3	Configurational Edge-Capacity.	52
3.1.4	Steady-State Cascade of Failures	54
3.1.5	Configurational Edge Capacity Margins	58
3.1.6	Community Detection via Flow Networks	61
3.2	Power Networks.	63
3.2.1	Swing Equations: Power-Grid Model	63
3.2.2	Variational Equations	68
3.2.3	Stability Criteria for Networks of Generators	70
3.2.4	Equilibrium Solutions for Networks of Generators	74
3.2.5	Stability of Equilibrium Solutions in Circulant Networks.	77
3.2.6	Energy Manifold for Networks of Generators.	79
	References	81
4	Synchronisation	85
4.1	Phase Oscillators	86
4.1.1	Model and Frameworks.	87
4.1.2	Collective Behaviour: Conditions for Existence	89
4.1.3	Phase Master Stability Function	94
4.1.4	Fixed-Points Explicit Solutions.	97
	References	101
5	General Conclusions	103
	Appendix	105
	Curriculum Vitae	109

Energy Transmission and Synchronization in Complex
Networks

Mathematical Principles

Rubido, N.

2016, XVII, 117 p. 32 illus., 14 illus. in color., Hardcover

ISBN: 978-3-319-22215-8
