

Contents

Keynote Presentation

Uniting Academic Achievements on Performance Analysis with Industrial Needs.	3
<i>Bart Theelen and Jozef Hooman</i>	

Modelling and Applications

Stochastic Modeling for Performance Evaluation of Database Replication Protocols.	21
<i>Peter Popov, Kizito Salako, and Vladimir Stankovic</i>	

A Continuous-Time Model-Based Approach to Activity Recognition for Ambient Assisted Living.	38
<i>Laura Carnevali, Christopher Nugent, Fulvio Patara, and Enrico Vicario</i>	

Power Trading Coordination in Smart Grids Using Dynamic Learning and Coalitional Game Theory.	54
<i>Farshad Shams and Mirco Tribastone</i>	

PCA-Based Method for Detecting Integrity Attacks on Advanced Metering Infrastructure.	70
<i>Varun Badrinath Krishna, Gabriel A. Weaver, and William H. Sanders</i>	

Tools

U-Check: Model Checking and Parameter Synthesis Under Uncertainty.	89
<i>Luca Bortolussi, Dimitrios Milios, and Guido Sanguinetti</i>	

mapfit: An R-Based Tool for PH/MAP Parameter Estimation.	105
<i>Hiroyuki Okamura and Tadashi Dohi</i>	

A Compression App for Continuous Probability Distributions.	113
<i>Michael Bungert, Holger Hermanns, and Reza Pulungan</i>	

Petri Nets, Process Algebra and Fault Trees

Computing Structural Properties of Symmetric Nets.	125
<i>Lorenzo Capra, Massimiliano De Pierro, and Giuliana Franceschinis</i>	

Optimizing Performance of Continuous-Time Stochastic Systems Using Timeout Synthesis	141
<i>Tomáš Brázdil, Ľuboš Korenčíak, Jan Krčál, Petr Novotný, and Vojtěch Řehák</i>	
Lumping-Based Equivalences in Markovian Automata and Applications to Product-Form Analyses	160
<i>Andrea Marin and Sabina Rossi</i>	
A Numerical Analysis of Dynamic Fault Trees Based on Stochastic Bounds	176
<i>J.M. Fourneau and Nihal Pekergin</i>	
Applications	
Quantitative Placement of Services in Hierarchical Clouds	195
<i>Asser N. Tantawi</i>	
Characterizing Data Dependence Constraints for Dynamic Reliability Using <i>N</i> -Queens Attack Domains	211
<i>Ulya Bayram, Kristin Yvonne Rozier, and Eric W.D. Rozier</i>	
Quantitative Analysis of Consistency in NoSQL Key-Value Stores	228
<i>Si Liu, Son Nguyen, Jatin Ganhotra, Muntasir Raihan Rahman, Indranil Gupta, and José Meseguer</i>	
Impact of Policy Design on Workflow Resiliency Computation Time	244
<i>John C. Mace, Charles Morisset, and Aad van Moorsel</i>	
Queueing Systems and Hybrid Systems	
Perfect Sampling for Multiclass Closed Queueing Networks	263
<i>Anne Bouillard, Ana Bušić, and Christelle Rovetta</i>	
Power and Effectiveness in Queueing Systems	279
<i>Gerardo Rubino</i>	
A Solving Procedure for Stochastic Satisfiability Modulo Theories with Continuous Domain	295
<i>Yang Gao and Martin Fränzle</i>	
Bayesian Statistical Analysis for Performance Evaluation in Real-Time Control Systems	312
<i>Pontus Boström, Mikko Heikkilä, Mikko Huova, Marina Waldén, and Matti Linjama</i>	
Author Index	329
