Contents

Part I Machine Design

A New Stand for Fatigue Testing of Pillars ................................. 3
L. Barton

HCR Gears in the Industrial Gearbox ........................................... 7
M. Burián, M. Trochta, and J. Havlík

Design of the Vibration Separatory Apparatus ............................ 15
M. Dub, S. Sadek, J. Hendrych, and P. Spacek

Designing of Mixing Equipment, Reactors and Bioreactors .......... 19
T. Jirout and D. Jiroutova

Modern Trends in the Drive Wheelsets of Rail Vehicles ............ 27
J. Kolar

Scale-Up of Equipment for Thermal-Expansionary Pretreatment
of Lignocelluloses ............................................................. 37
L. Kratky

Should We Teach Polymeric Machine Elements as Well? .......... 45
B. Krížan

Design of Semi-active Magnetorheological Valve ..................... 51
M. Kubík and I. Mazúrek

Support Tools in the Development of Bearings for Wind Turbines 57
R. Madaj and R. Kohar

Note to an Undercut Limit of Involute Gearing ....................... 63
M. Nemecek

Assessment of Industrial Design Projects with Use of Online
Evaluation System ............................................................. 69
M. Ondra, R. Machalek, D. Skaroupka, D. Semrad, and F. Uhlir
Vibration Isolation Pneumatic System with a Throttle Valve  
L. Pesik, A. Skarolek, and O. Kohl  

Development of the Assembly Set for the Logistic Transport Solution  
R. Sásik, M. Haluška, R. Madaj, M. Gregor, and P. Grznár  

The Design of the Device for the Manufacture of Planar Filter  
L. Sevcik  

The Structural Design of Industrial Vacuum Cleaner for Dental Laboratories  
R. Slanina and P. Sniehotta  

Reading of Operating Values of End Effector During Goods Manipulation  
F. Stary, V. Dynybyl, and J. Mrazek  

Building Platform for Identification of Important Parameters for 3D Printing of Huge Parts  
M. Suransky and M. Zlebek  

On Cardan Joint: Some Special Applications  
J. Zicha and K. Macuchova  

Part II Tribology  

Experimental Analysis of Tribological Properties of Heat Treated Graphitic Cast Irons  
J. Broncek, P. Fabian, M. Dzimko, and N. Radek  

The Experimental Determination of the Grease Amount to Effective Wear Reduction in the Wheel-Rail Contact  
J. Fryza and M. Omasta  

The Effect of Friction Modifier on the Wheel-Rail Contact  
R. Galas and M. Omasta  

Measurement Methodology of Low-Shear Viscosity of Reference Liquid Under High-Pressure  
S. Hornak  

Modification of Tooth Flank as the Possibility of Increasing Resistance of Gearing to Pitting  
B. Kopilakova, M. Bosansky, and J. Zapotocny  

Including the Method of Lubricant Film Thickness Measurement with the Use of the Monochromatic Interferometry to the Education of Tribology  
D. Kostal, I. Křupka, and M. Hartl
Frictional Properties of PVA Hydrogel ........................................... 159
D. Nečas, M. Vrbka, S. Yarimitsu, K. Nakashima, Y. Sawae, P. Šperka,
I. Křupka, and M. Hartl

Effect of Sanding on Adhesion Under Oil and Water Condition
Between Wheel and Rail .............................................................. 165
D. Smejkal

Part III  Hydraulics – Fluid Mechanisms

Experimental Research and Optimization of Characteristic
Parameters of the Valve Plate of the Axial Piston Pump/Motor .......... 173
R. Petrovic, M. Andjelkovic, M. Radosavljevic, and N. Todic

The Effects of the Temperatures on the Performance
of the Gas Turbine ................................................................. 185
A. Wahab and T. Ibrahim

Part IV  Engineering Analyses

Innovation of Methodological Support of Risk Analyses
of Technical Products in Their Life Cycle During Their Designing ...... 197
J. Dvorak, M. Sasiadek, and S. Hosnedl

The Mathematical Description of Sunflower Seed’s Hulling Process
Using Impact Huller ................................................................... 203
J. Hoidekr, J. Andrus, and V. Dynybyl

Roller Bearing Fatigue Life Calculation with Inclusion of the Fits
Parameters .................................................................................. 207
S. Hrcek and R. Kohar

Application of Statistical Methods to Analysis of Parallel
Structure of Gearbox Test Rig ..................................................... 215
J. Chmelar, K. Petr, and V. Dynybyl

Driving Shaft Fracture Analysis ..................................................... 221
K. Kaláb

Force Conditions at an Antibacklash Designed Gear Mechanism .... 227
V. Kloucek

The Effect of Fits Stiffness on Distribution of Internal Loading
in Rolling Bearings ................................................................... 235
R. Kohar and S. Hrcek

Design Calculation of Spur Gear Module .................................... 243
E. Kronerova
Application of the Bond Graphs to the Description of Technical Systems .......................................................... 249
Z. Matuszak

Z. Matuszak

Influence of Short-Circuit Valve on Hydraulic Recovery of Vehicle Kinetic Energy ......................................................... 263
Z. Nemec and J. Nevrly

FEM Simulations on Gears with Different Carbonized Depth .......... 269
K. Petr, V. Dynybyl, and J. Krepela

Numerical Simulation of Ductile Fracture ................................. 277
M. Spaniel

Dynamic of Propulsion, New Challenges for Analysis ................. 283
V. Zoul

Part V  Modern Material and Technology

Corrosion in Some Iron Alloys ................................................. 291
M. Khidhair and M. Hasan

Overview on the Clinched Joint Method .................................... 299
P. Maly, V. Dynybyl, J. Sojka, and F. Lopot

The Process of Preparation Prototypes Bearing Cages for the Durability Testing ...................................................... 305
P. Spišák and R. Madaj

Part VI  Optimization and Design

Optimisation of the Geometric Design Parameters of a Five Speed Gearbox for an Automotive Transmission ...................... 313
M. Bozca

Modification of Experimental Station AXMAT .......................... 319
J. Dvoracek, L. Komenda, and L. Nohal

Basic Conditions of the Implementation of Extremal Regulation ...... 325
J. Homišín and M. Moravčič

Design of a Disc Grinder for EDM Electrodes Machining ............ 331
J. Hosek and J. Drahokoupil

Optimized Design of the Wind Turbine’s Composite Blade to Flatten the Stress Distribution in the Mounting Areas ............. 335
P. Oganesyan, I. Zhilyaev, S. Shevtsov, and J.-K. Wu
Research of New Composites for Lightweight Construction with Low Impact on the Environment ........................................... 343
M. Petrů, P. Lepsik, and Ondřej Novák

System of Low Profile Roller Conveyors ........................................ 349
F. Stary and V. Hanus

Fiber Driven Tilting Mechanism .................................................. 353
P. Svatoš, Z. Šíka, M. Valášek, J. Zicha, V. Bauma, and V. Rada

Part VII Product Innovation

Pneumatic Dual Mass Flywheel – Damper Concept for Downspeeding ................................................................. 361
R. Grega and P. Baran

Rationalising the Use of Design for Assembly as DfX Knowledge to Increase Competitiveness of Designed Technical Products ........................................... 369
S. Hosnedl, M. Kepecsky, and M. Sasiadek

Materials and Sustainable Development ........................................ 377
I. Mazinova and M. Bochinsky

Part VIII Experimental Methods and Measuring

Design of Experiment for Load Gear Solution in Planetary Transmission ................................................................. 385
O. Berka, F. Lopot, and M. Dub

Investigation of Tram Gearbox Hinge Behaviour ........................................ 393
M. Dub, J. Kolar, F. Lopot, V. Dynybyl, and O. Berka

Mechanical Properties of Fasteners ........................................... 399
V. Fliegel, A. Lufinka, and R. Martonka

Mathematical Description of Non-linear Mechanical Behaviour of Materials Under Compression Loading, Case Study: Spruce Bulk Wood Chips ........................................... 405
D. Herak, A. Kabutey, and R. Sigalingging

Influence of Steel Sheet Width on Bearing Capacity of Resistance Spot Welding ...................................................... 411
P. Hrabe and M. Muller

Calculation of Fuel Consumption on the Vehicle Simulation Model ................................................................. 417
M. Kobza
