Contents

Part I  Technique

1  A Brief History of Controlled Atmosphere Transmission Electron Microscopy ........................................... 3  
   Ai Leen Koh, Sang Chul Lee, and Robert Sinclair

2  Development of the Atomic-Resolution Environmental Transmission Electron Microscope .............................. 45  
   Pratibha L. Gai, Edward D. Boyes, Kenta Yoshida, and Thomas W. Hansen

3  Gas–Electron Interaction in the ETEM ..................................... 63  
   Jakob B. Wagner and Marco Beleggia

4  Spectroscopy of Solids, Gases, and Liquids in the ETEM ........ 95  
   Peter A. Crozier and Benjamin K. Miller

5  Image Detectors for Environmental Transmission Electron Microscopy (ETEM) ........................... 143  
   Ming Pan and Cory Czarnik

6  Closed Cell Systems for In Situ TEM with Gas Environments Ranging from 0.1 to 5 Bar ......................... 165  
   A.K. Erdamar, S. Malladi, F.D. Tichelaar, and H.W. Zandbergen

Part II  Applications

7  Growth of One-Dimensional Nanomaterials in the ETEM ............. 213  
   Jonathan Winterstein and Renu Sharma

8  The Structure of Catalysts Studied Using Environmental Transmission Electron Microscopy .......................... 237  
   Thomas W. Hansen and Jakob B. Wagner
9 Liquid Phase Experiments: Describing Experiments in Liquids and the Special Requirements and Considerations for Such Experiments .......................... 259
Niels de Jonge

10 In Situ TEM Electrical Measurements ................................. 281
Silvia Canepa, Sardar Bilal Alam, Duc-The Ngo, Frances M. Ross, and Kristian Mølhave

11 ETEM Studies of Electrodes and Electro-catalysts .................. 301
Christian Jooss, Stephanie Mildner, Marco Beleggia, Daniel Mierwaldt, and Vladimir Roddatis
Controlled Atmosphere Transmission Electron Microscopy
Principles and Practice
Hansen, Th.W.; Wagner, J.B. (Eds.)
2016, VIII, 329 p. 152 illus., 110 illus. in color., Hardcover
ISBN: 978-3-319-22987-4
