Contents

Improving Memory Access Performance of In-Memory Key-Value Store Using Data Prefetching Techniques .............................................. 1
   PengFei Zhu, GuangYu Sun, Peng Wang, and MingYu Chen

DDC: Distributed Data Collection Framework for Failure Prediction in Tianhe Supercomputers ......................................................... 18
   Wei Hu, Yanhuang Jiang, Guangming Liu, Wenrui Dong, and Guilin Cai

Optimizing the MapReduce Framework for CPU-MIC Heterogeneous Cluster ................................................................. 33
   Wenzhu Wang, Qingbo Wu, Yusong Tan, and Yaoxue Zhang

Stable Matching Scheduler for Single-ISA Heterogeneous Multi-core Processors ................................................................. 45
   Lei Wang, Shaoli Liu, Chao Lu, Longbing Zhang, Junhua Xiao, and Jian Wang

RPECA-Rumor Propagation Based Eventual Consistency Assessment Algorithm ................................................................. 60
   Dong Zhang, Zhiyuan Su, Kaiyuan Qi, Guomao Xin, and Peng Wei

Efficient Implementation of MIPS Code Generator for the IonMonkey JavaScript Compiler ......................................................... 73
   Tong Ren, Shuangbai Xue, Fei Peng, Qing Wang, and Xiang Gao

Effects of Quenched Disorder on Liquid Crystal: A Simulation of Rough Cylinder Confinement ......................................................... 86
   Qing Ji

Visual Tracking Based on Convolutional Deep Belief Network ................................................................. 103
   Dan Hu, Xingshe Zhou, and Junjie Wu

Author Index ................................................................. 117
