

Contents

Bio-Inspired ICT for Big Data Management in Healthcare	1
Alessandro Di Stefano, Aurelio La Corte, Pietro Lió and Marialisa Scatá	
Control Aspects in Multiagent Systems	27
Franco Cicirelli and Libero Nigro	
A Different Perspective of Agent-Based Techniques: Markovian Agents	51
Marco Gribaudo and Mauro Iacono	
Autonomous, Adaptive, and Self-Organized Multiagent Systems for the Optimization of Decentralized Industrial Processes	71
Max Gath, Otthein Herzog and Stefan Edelkamp	
Formal Specification Language and Agent Applications	99
Vinitha Hannah Subburaj and Joseph E. Urban	
Large-Scale Simulations with FLAME	123
Simon Coakley, Paul Richmond, Marian Gheorghe, Shawn Chin, David Worth, Mike Holcombe and Chris Greenough	
Cloud Computing and Multiagent Systems, a Promising Relationship	143
Fernando De la Prieta and Juan Manuel Corchado	
Privacy Risks in Cloud Computing	163
Maria Del Mar López Ruiz and Juanita Pedraza	

**Adaptive Resource Allocation in Cloud Computing
Based on Agreement Protocols 193**
Florin Pop, Radu-Ioan Tutueanu, Ciprian Barbieru,
Mihaela-Andreea Vasile and Joanna Kołodziej
