

Contents – Part I

Cloud Computing Security

Inferring the Stealthy Bridges Between Enterprise Network Islands in Cloud Using Cross-Layer Bayesian Networks	3
<i>Xiaoyan Sun, Jun Dai, Anoop Singhal, and Peng Liu</i>	
A Secure Architecture for Inter-cloud Virtual Machine Migration	24
<i>Tayyaba Zeb, Abdul Ghafoor, Awais Shibli, and Muhammad Yousaf</i>	
STRE: Privacy-Preserving Storage and Retrieval over Multiple Clouds	36
<i>Jingwei Li, Dan Lin, Anna Squicciarini, and Chunfu Jia</i>	
An Effective Search Scheme Based on Semantic Tree Over Encrypted Cloud Data Supporting Verifiability	45
<i>Zhangjie Fu, Jiangan Shu, and Xingming Sun</i>	
Policy Driven Node Selection in MapReduce	55
<i>Anna C. Squicciarini, Dan Lin, Smitha Sundareswaran, and Jingwei Li</i>	

Authentication and Identity

GridMap: Enhanced Security in Cued-Recall Graphical Passwords	75
<i>Nicolas Van Balen and Haining Wang</i>	
UAuth: A Strong Authentication Method from Personal Devices to Multi-accounts	95
<i>Yazhe Wang, Mingming Hu, and Chen Li</i>	
TPM-Based Authentication Mechanism for Apache Hadoop	105
<i>Issa Khalil, Zuochao Dou, and Abdallah Khreishah</i>	
An Authentication and Key Management Scheme for Heterogeneous Sensor Networks	123
<i>Sarmadullah Khan, Rafiullah Khan, Inam Bari, and Naveed Jan</i>	
Social Authentication Identity: An Alternate to Internet Real Name System . . .	132
<i>Chengcheng Shao, Liang Chen, Shuo Fan, and Xinwen Jiang</i>	
On the Usability of Two-Factor Authentication	141
<i>Ding Wang and Ping Wang</i>	

Network Security

Securing Resource Discovery in Content Hosting Networks 153
Sushama Karumanchi, Jingwei Li, and Anna Squicciarini

Detection of Botnet Command and Control Traffic by the Identification
of Untrusted Destinations 174
Pieter Burghouwt, Marcel Spruit, and Henk Sips

Keep the Fakes Out: Defending Against Sybil Attack in P2P Systems 183
Kan Chen, Peidong Zhu, and Yueshan Xiong

Privacy and Wireless Security

Anonymous Publish-Subscribe Systems 195
Binh Vo and Steven Bellovin

Friendly Jamming for Secure Localization in Vehicular Transportation 212
Bhaswati Deka, Ryan M. Gerdes, Ming Li, and Kevin Heaslip

Visual-Assisted Wormhole Attack Detection for Wireless Sensor Networks. 222
*Eirini Karapistoli, Panagiotis Sarigiannidis,
and Anastasios A. Economides*

Implementing an Affordable and Effective GSM IMSI Catcher
with 3G Authentication 239
Max Suravev

System and Software Security

A Simple and Novel Technique for Counteracting Exploit Kits. 259
Byungho Min and Vijay Varadharajan

Policy Enforcement Point Model. 278
Yosra Ben Mustapha, Hervé Debar, and Gregory Blanc

Control Flow Obfuscation Using Neural Network to Fight Concolic Testing. 287
*Haoyu Ma, Xinjie Ma, Weijie Liu, Zhipeng Huang, Debin Gao,
and Chunfu Jia*

EFS: Efficient and Fault-Scalable Byzantine Fault Tolerant Systems
Against Faulty Clients 305
*Quanwei Cai, Jingqiang Lin, Fengjun Li, Qiongxiao Wang,
and Daren Zha*

SCADS: Separated Control- and Data-Stacks 323
Christopher Kugler and Tilo Müller

Crypto

Improving the Security of the HMQV Protocol
 Using Tamper-Proof Hardware 343
Qianying Zhang, Shijun Zhao, Yu Qin, and Dengguo Feng

TST: A New Randomness Test Method Based on Coupon
 Collector’s Problem. 362
Qinglong Zhang, Zongbin Liu, Quanwei Cai, and Ji Xiang

Tree-Based Multi-dimensional Range Search on Encrypted Data
 with Enhanced Privacy 374
*Boyang Wang, Yantian Hou, Ming Li, Haitao Wang, Hui Li,
 and Fenghua Li*

Hardware Implementation of Cryptographic Hash Function
 Based on Spatiotemporal Chaos 395
Yuling Luo, Junxiu Liu, Lvchen Cao, Jinjie Bi, and Senhui Qiu

An Information-Theoretic Approach for Secure Protocol Composition 405
*Yi-Ting Chiang, Tsan-Sheng Hsu, Churn-Jung Liau, Yun-Ching Liu,
 Chih-Hao Shen, Da-Wei Wang, and Justin Zhan*

Mobile Security

Towards a Systematic Study of the Covert Channel Attacks in Smartphones. . . 427
Swarup Chandra, Zhiqiang Lin, Ashish Kundu, and Latifur Khan

DroidKin: Lightweight Detection of Android Apps Similarity. 436
Hugo Gonzalez, Natalia Stakhanova, and Ali A. Ghorbani

Detecting Malicious Behaviors in Repackaged Android Apps
 with Loosely-Coupled Payloads Filtering Scheme 454
Lulu Zhang, Yongzheng Zhang, and Tianning Zang

Defending Blind DDoS Attack on SDN Based on Moving Target Defense. . . 463
Duohe Ma, Zhen Xu, and Dongdai Lin

Function Escalation Attack. 481
Chen Cao, Yuqing Zhang, Qixu Liu, and Kai Wang

RAMSES: Revealing Android Malware Through String Extraction
 and Selection 498
*Lautaro Dolberg, Quentin Jérôme, Jérôme François, Radu State,
 and Thomas Engel*

Detecting Mobile Malware with TMSVM 507
Xi Xiao, Xianni Xiao, Yong Jiang, and Qing Li

Posters

Research on Credible Regulation Mechanism for the Trading of Digital Works 519
Guozhen Shi, Ying Shen, Fenghua Li, Mang Su, and Dong Liu

Coordination and Concurrency Aware Likelihood Assessment of Simultaneous Attacks 524
Léa Samarji, Nora Cuppens-Boulahia, Frédéric Cuppens, Serge Papillon, Wael Kanoun, and Samuel Dubus

Domain Algorithmically Generated Botnet Detection and Analysis 530
Xiaolin Xu, Yonglin Zhou, and Qingshan Li

Towards Improving Service Accessibility by Adaptive Resource Distribution Strategy 535
Jinqiao Shi, Xiao Wang, Binxing Fang, Qingfeng Tan, and Li Guo

Hybrid Detection Using Permission Analysis for Android Malware 541
Haofeng Jiao, Xiaohong Li, Lei Zhang, Guangquan Xu, and Zhiyong Feng

Content Security Scheme for Content Centric Networks 546
Fawad Khan, Sarmad Ullah Khan, and Inam Bari

Detection of Food Safety Topics Based on SPLDAs 551
Jinshuo Liu, Yabo Li, Yingyue Peng, Juan Deng, and Xin Chen

Platform Neutral Sandbox for Analyzing Malware and Resource Hogger Apps 556
Parvez Faruki, Vijay Kumar, Ammar B., M.S. Gaur, Vijay Laxmi, and Mauro Conti

Web Security

JumpBox – A Seamless Browser Proxy for Tor Pluggable Transports 563
Jeroen Massar, Ian Mason, Linda Briesemeister, and Vinod Yegneswaran

Abusing Browser Address Bar for Fun and Profit - An Empirical Investigation of Add-On Cross Site Scripting Attacks 582
Yinzhi Cao, Chao Yang, Vaibhav Rastogi, Yan Chen, and Guofei Gu

Characterizing Google Hacking: A First Large-Scale Quantitative Study 602
Jialong Zhang, Jayant Notani, and Guofei Gu

Detecting Malicious Sessions Through Traffic Fingerprinting Using Hidden Markov Models 623
Sami Zhioua, Adnene Ben Jabeur, Mahjoub Langar, and Wael Ilahi

Author Index 633

Contents – Part II

Doctoral Symposium

A Performance Comparison Study of a Coverage-Preserving Node Scheduling Scheme and Its Enhancement in Sensor Networks	3
<i>Qun Wang, Huanyan Qian, Peiyu Ji, Yu Xie, and Shuhui Yang</i>	
An Improved Authorization Model in Trust Network.	10
<i>Xianming Gao, Xiaozhe Zhang, Baosheng Wang, and Huiting Shi</i>	
KEMF: Key Management for Federated Sensor Networks	17
<i>Piers O’Hanlon, Joss Wright, Ian Brown, and Tulio de Souza</i>	
CPS ² : A Contextual Privacy Framework for Social Software	25
<i>Rula Sayaf, Dave Clarke, and Richard Harper</i>	
Are You Really My Friend? Exactly Spatiotemporal Matching Scheme in Privacy-Aware Mobile Social Networks	33
<i>Ben Niu, Xiuguang Li, Xiaoyan Zhu, Xiaoqing Li, and Hui Li</i>	
RFID Authentication Protocol Resistant to the Man-in-the-Middle Attack.	41
<i>Li Zhai and ChuanKun Wu</i>	

Intrusion Detection

METIS: A Two-Tier Intrusion Detection System for Advanced Metering Infrastructures	51
<i>Vincenzo Gulisano, Magnus Almgren, and Marina Papatriantafilou</i>	
Online Detection of Concurrent Prefix Hijacks	69
<i>Shen Su, Beichuan Zhang, and Binxing Fang</i>	
Countermeasures for Mitigating ICN Routing Related DDoS Attacks	84
<i>Eslam G. AbdAllah, Mohammad Zulkernine, and Hossam S. Hassanein</i>	
A New Anomaly Detection Method Based on IGTE and IGFE.	93
<i>Ziyu Wang, Jiahai Yang, and Fuliang Li</i>	

International Workshop on Applications and Technologies in Cyber Security (ATCS)

Forensic Potentials of Solid State Drives	113
<i>Zubair Shah, Abdun Naser Mahmood, and Jill Slay</i>	

Cloud Security from Users Point of View: A Pragmatic Study with Thematic Analysis	127
<i>Saira Syed and Quazi Mamun</i>	
A Secure Real Time Data Processing Framework for Personally Controlled Electronic Health Record (PCEHR) System	141
<i>Khandakar Rabbi, Mohammed Kaosar, Md Rafiqul Islam, and Quazi Mamun</i>	
Novel Iterative Min-Max Clustering to Minimize Information Loss in Statistical Disclosure Control	157
<i>Abdun Naser Mahmood, Md Enamul Kabir, and Abdul K. Mustafa</i>	
Securing Sensor Networks by Moderating Frequencies	173
<i>Pinaki Sarkar, Priyatosh Mahish, Morshed Uddin Chowdhury, and Kouichi Sakurai</i>	
Intelligent Financial Fraud Detection Practices: An Investigation	186
<i>Jarrod West, Maumita Bhattacharya, and Rafiqul Islam</i>	
Network Traffic Pattern Analysis Using Improved Information Theoretic Co-clustering Based Collective Anomaly Detection	204
<i>Mohiuddin Ahmed and Abdun Naser Mahmood</i>	
A Survey on Mining Program-Graph Features for Malware Analysis	220
<i>Md. Saiful Islam, Md. Rafiqul Islam, A.S.M. Kayes, Chengfei Liu, and Irfan Altas</i>	
Defence Against Code Injection Attacks	237
<i>Hussein Alnabulsi, Quazi Mamun, Rafiqul Islam, and Morshed U. Chowdhury</i>	
False Data Injection Attack Targeting the LTC Transformers to Disrupt Smart Grid Operation	252
<i>Adnan Anwar, Abdun Naser Mahmood, and Mohiuddin Ahmed</i>	
A Domain-Based Multi-cluster SIP Solution for Mobile Ad Hoc Network . . .	267
<i>Ala' Aburumman and Kim-Kwang Raymond Choo</i>	
DAPRO 2014 and SSS 2014 International Workshop on Data Protection in Mobile and Pervasive Computing (DAPRO) International Workshop on Secure Smart Systems (SSS)	
virtio-ct: A Secure Cryptographic Token Service in Hypervisors	285
<i>Le Guan, Fengjun Li, Jiwu Jing, Jing Wang, and Ziqiang Ma</i>	
Blind Format String Attacks	301
<i>Fatih Kilic, Thomas Kittel, and Claudia Eckert</i>	

An Empirical Evaluation of Software Obfuscation Techniques Applied to Android APKs 315
Felix C. Freiling, Mykola Protsenko, and Yan Zhuang

Towards Privacy-Preserving Web Metering via User-Centric Hardware 329
Fahad Alarifi and Maribel Fernández

Towards Efficient Update of Access Control Policy for Cryptographic Cloud Storage. 341
Weiyu Jiang, Zhan Wang, Limin Liu, and Neng Gao

International Workshop on System Level Security of Smartphones

Uncovering the Dilemmas on Antivirus Software Design in Modern Mobile Platforms 359
Heqing Huang, Kai Chen, Peng Liu, Sencun Zhu, and Dinghao Wu

Transplantation Attack: Analysis and Prediction 367
Zhongwen Zhang, Ji Xiang, Lei Wang, and Linguang Lei

Timing-Based Clone Detection on Android Markets 375
Yingjun Zhang, Kezhen Huang, Yuling Liu, Kai Chen, Liang Huang, and Yifeng Lian

A New Trust Chain Security Evaluation Model and Tool. 382
Wei Hu, Dongyao Ji, Ting Wang, and Gang Yao

A System for Privacy Information Analysis and Safety Assessment of iOS Applications. 392
Bin Li and Zhijie Feng

How We Found These Vulnerabilities in Android Applications. 399
Bin Ma
