## Contents – Part I

Text Classification Using Novel “Anti-Bayesian” Techniques .................. 1
   B. John Oommen, Richard Khoury, and Aron Schmidt

### Multi-agent Systems

ADELFE 3.0 Design, Building Adaptive Multi Agent Systems
Based on Simulation a Case Study ............................................. 19
   Wafa Mefteh, Frederic Migeon, Marie-Pierre Gleizes,
   and Faiez Gargouri

Multi Agent Model Based on Chemical Reaction Optimization for Flexible
Job Shop Problem ................................................................. 29
   Bilel Marzouki and Olfa Belkahla Driss

MATS–JSTL: A Multi-Agent Model Based on Tabu Search for Job Shop
Problem with Time Lags .......................................................... 39
   Madiha Harrabi and Olfa Belkahla Driss

A Model of a Multiagent Early Warning System for Crisis Situations
in Economy ................................................................. 47
   Marcin Hernes, Marcin Maleszka, Ngoc Thanh Nguyen,
   and Andrzej Bytniewski

Combining Machine Learning and Multi-Agent Approach for Controlling
Traffic at Intersections ......................................................... 57
   Mateusz Krzysztoń and Bartłomiej Śnieżyński

A Scalable Distributed Architecture for Web-Based Software Agents. ...... 67
   Dejan Mitrović, Mirjana Ivanović, Milan Vidaković, and Zoran Budimac

Mapping BPMN Processes to Organization Centered Multi-Agent Systems
to Help Assess Crisis Models ............................................... 77
   Nguyen Tuan Thanh Le, Chihab Hanachi, Serge Stinckwich,
   and Tuong Vinh Ho

Agent Based Quality Management in Lean Manufacturing .................... 89
   Rafał Cępek, Huseyin Erdogan, Łukasz Huczala, Udo Wozar,
   and Adam Ziebinski

Towards a Framework for Hierarchical Multi-agent Plans Diagnosis
and Recovery ................................................................. 101
   Said Brahimi, Ramdane Maamri, and Sahnoun Zaidi
Social Networks and NLP

A Survey of Twitter Rumor Spreading Simulations ............................................. 113
Emilio Serrano, Carlos A. Iglesias, and Mercedes Garijo

Mining Interesting Topics in Twitter Communities ........................................ 123
Eleni Vathi, Georgios Siolas, and Andreas Stafylopatis

Community Division of Bipartite Network Based on Information Transfer Probability ......................................................... 133
Chunlong Fan, Hengchao Wu, and Chi Zhang

User-Tweet Interaction Model and Social Users Interactions for Tweet Contextualization ............................................................. 144
Rami Belkaroui, Rim Faiz, and Pascale Kuntz

Supervised Learning to Measure the Semantic Similarity Between Arabic Sentences ......................................................... 158
Wafa Wali, Bilel Gargouri, and Abdelmajid Ben hamadou

Sentiment Analysis

How Impressionable Are You? - Grey Knowledge, Groups and Strategies in OSN ........................................................................... 171
Camelia Delcea, Ioana Bradea, Ramona Paun, and Emil Scarlat

Semi-supervised Multi-view Sentiment Analysis ............................................. 181
Gergana Lazarova and Ivan Koychev

Modelling and Simulating Collaborative Scenarios for Designing an Assistant Ambient System that Supports Daily Activities ....................... 191
Sameh Triki, Chihab Hanachi, Marie-Pierre Gleizes, Pierre Glize, and Alice Rouyer

Regression Methods in the Authority Identification Within Web Discussions ............................................................................... 203
Kristina Machová and Jaroslav Štefaník

Sem-SPARQL Editor: An Editor for the Semantic Interrogation of Web Pages ........................................................................... 213
Sahar Maâlej Dammak, Anis Jedidi, and Rafik Bouaziz

Computational Intelligence and Games

Enhancing History-Based Move Ordering in Game Playing Using Adaptive Data Structures ............................................................. 225
Spencer Polk and B. John Oommen
