

# Contents

<b>1</b>	<b>Introduction</b> .....	1	2
<b>2</b>	<b>The biprojective space <math>\mathbb{P}^1 \times \mathbb{P}^1</math></b> .....	7	3
2.1	Bigraded rings .....	7	4
2.2	Biprojective space $\mathbb{P}^1 \times \mathbb{P}^1$ .....	11	5
2.3	Cohen-Macaulay rings .....	13	6
2.4	Additional notes .....	17	7
<b>3</b>	<b>Points in <math>\mathbb{P}^1 \times \mathbb{P}^1</math></b> .....	19	8
3.1	Points .....	19	9
3.2	Representing points in $\mathbb{P}^1 \times \mathbb{P}^1$ and combinatorial descriptions .....	21	10
3.3	Hilbert functions of points in $\mathbb{P}^1 \times \mathbb{P}^1$ : first properties .....	27	11
3.4	Separators .....	33	12
3.5	Case study .....	35	13
3.6	Additional notes .....	38	14
<b>4</b>	<b>Classification of ACM sets of points in <math>\mathbb{P}^1 \times \mathbb{P}^1</math></b> .....	41	15
4.1	Arithmetically Cohen-Macaulay sets of points .....	41	16
4.2	Classification of ACM sets of points .....	46	17
4.3	Additional notes .....	51	18
<b>5</b>	<b>Homological invariants</b> .....	53	19
5.1	Bigraded minimal free resolution .....	53	20
5.2	Hilbert function .....	59	21
5.3	A worked out example .....	63	22
5.4	Complete intersection sets of points .....	65	23
5.5	Interpolation problem .....	66	24
5.6	Additional notes .....	68	25
<b>6</b>	<b>Fat points in <math>\mathbb{P}^1 \times \mathbb{P}^1</math></b> .....	71	26
6.1	Basics of fat points .....	71	27
6.2	Two combinatorial descriptions of fat points .....	74	28
6.3	Hilbert functions of fat points .....	81	29

6.4	ACM fat points in $\mathbb{P}^1 \times \mathbb{P}^1$ .....	85	30
6.5	Bigraded minimal free resolution of ACM fat points .....	90	31
6.6	Additional notes .....	96	32
<b>7</b>	<b>Double points and their resolution</b> .....	99	33
7.1	Setup .....	100	34
7.2	The completion of $Z$ .....	101	35
7.3	The generators of $I(Z)$ and $I(Y)$ .....	103	36
7.4	The resolution of $I(Z)$ .....	106	37
7.5	The algorithm .....	113	38
7.6	Additional notes .....	115	39
<b>8</b>	<b>Applications</b> .....	117	40
8.1	An application: Betti numbers and a question of Römer .....	117	41
8.2	An application: symbolic powers and a question of Huneke .....	120	42
8.3	Additional notes .....	125	43
	<b>References</b> .....	127	44
	<b>Index</b> .....	133	45

UNCORRECTED PROOF
