Contents – Part II

WebSys: Special Session on Collective Intelligence in Web Systems - Web Systems Analysis

Optimization of 3D Rendering by Simplification of Complicated Scene for Mobile Clients of Web Systems ....................... 3
  Tomas Marek and Ondrej Krejcar

Automatic Categorization of Shots in News Videos Based on the Temporal Relations ............................................... 13
  Kazimierz Choroś

Saliency-Guided Video Deinterlacing ........................................ 24
  Maria Trocan and François-Xavier Coudoux

Towards a System for Cloud Service Discovery and Composition Based on Ontology ........................................... 34
  Rawand Guerfel, Zohra Sbaï, and Rahma Ben Ayed

Modeling the Impact of Visual Components on Verbal Communication in Online Advertising .................................. 44
  Jarosław Jankowski, Jarosław Wątróbski, and Paweł Ziemba

Countering Social Engineering Through Social Media: An Enterprise Security Perspective ................................... 54
  Heidi Wilcox and Maumita Bhattacharya

Loading Speed of Modern Websites and Reliability of Online Speed Test Services .............................................. 65
  Aneta Bartuskova and Ondrej Krejcar

Knowledge Management in Website Quality Evaluation Domain .................. 75
  Paweł Ziemba, Jarosław Jankowski, Jarosław Wątróbski, and Jarosław Becker

CSI: Special Session on Computational Swarm Intelligence

A New Algorithm to Categorize E-mail Messages to Folders with Social Networks Analysis ................................. 89
  Urszula Boryczka, Barbara Probierz, and Jan Kozak
Population-Based Ant Colony Optimization for Sequential Ordering Problem .................................................. 99
  Rafał Skinderowicz

Designing a Universal Suboptimal Tree Integration Algorithm ................................................................. 110
  Marcin Maleszka

Heterogeneous DPSO Algorithm for DTSP .......................................................... 119
  Urszula Boryczka and Łukasz Stręk

Decomposition Based Multiobjective Hyper Heuristic with Differential Evolution .................................................. 129
  Richard A. Gonçalves, Josiel N. Kuk, Carolina P. Almeida, and Sandra M. Venske

Multi-start Differential Evolution Approach in the Process of Finding Equilibrium Points in the Covariant Games ......................... 139
  Przemysław Juszczuk

Genetic Algorithm in Stream Cipher Cryptanalysis .......................................................... 149
  Iwona Polak and Mariusz Boryczka

Cryptanalysis of SDES Using Modified Version of Binary Particle Swarm Optimization .................................................. 159
  Kamil Dworak and Urszula Boryczka

CSDMO: Special Session on Cooperative Strategies for Decision Making and Optimization

InterCriteria Analysis of Parameters Relations in Fermentation Processes Models .................................................. 171
  Olympia Roeva, Peter Vassilev, Maria Angelova, and Tania Pencheva

Optimization Procedure of the Multi-parameter Assessment and Bidding of Decision-Making Variants in the Computerized Decision Support System .................................................. 182
  Jarosław Becker and Ryszard Budziński

Supporting Cooperative Decisions with a Multicriteria Generalization of the Nash Solution .................................................. 193
  Lech Kruś

Performance Evaluation of Multi-UAV Cooperative Mission Planning Models .................................................. 203
  Cristian Ramírez-Atencia, Gema Bello-Ortiz, Maria D. R- Moreno, and David Camacho
A Hybrid Distance-Based and Naive Bayes Online Classifier .......................... 213

Joanna Jędrzejowicz and Piotr Jędrzejowicz

Cluster-Dependent Feature Selection for the RBF Networks ...................... 223

Ireneusz Czarnowski and Piotr Jędrzejowicz

ANST: Special Session on Advanced Networking and Security Technologies

SAME: An Intelligent Anti-malware Extension for Android ART

Virtual Machine ......................................................................................... 235

Konstantinos Demertzis and Lazaros Iliadis

Endpoint Firewall for Local Security Hardening in Academic

Research Environment .............................................................................. 246

Ladislav Balik, Josef Horalek, Ondrej Hornig, Vladimir Sobeslav,
Rafael Dolezal, and Kamil Kuca

Fuzzy Granular Classifier Approach for Spam Detection .......................... 256

Saber Salehi, Ali Selamat, Ondrej Krejcar, and Kamil Kuca

A Recent Study on the Rough Set Theory in Multi-criteria Decision

Analysis Problems .................................................................................... 265

Masurah Mohamad, Ali Selamat, Ondrej Krejcar, and Kamil Kuca

Network Visualization Survey ................................................................. 275

Ales Komarek, Jakub Pavlik, and Vladimir Sobeslav

A Proposal of a Big Web Data Application and Archive for the Distributed

Data Processing with Apache Hadoop ...................................................... 285

Martin Lnenicka, Jan Hovad, and Jitka Komarkova

Centralized Data Flow Management System ............................................ 295

Agáta Bodnárová and Michal Kókörčený

Decision Support Smartphone Application Based on Interval AHP Method ................................. 306

Richard Cimler, Karel Mls, and Martin Gavalec

Impact of Weather Conditions on Fingerprinting Localization

Based on IEEE 802.11a ........................................................................... 316

Peter Brida and Juraj Machaj

Enterprise ICT Transformation to Agile Environment ............................... 326

Ales Komarek, Vladimir Sobeslav, and Jakub Pavlik

Analysis of the Use of Cloud Services and Their Effects on the Efficient

Functioning of a Company ......................................................................... 336

Josef Horalek, Simeon Karamazov, Filip Holik, and Tomas Svoboda
Proposal to Centralize Operational Data Outputs of Airport Facilities
Josef Horalek, Sona Neradova, Simeon Karamazov, Filip Holik, Ondrej Marik, and Stanislav Zitta

IED Remote Data Acquisition and Processing in Power Distribution
Ladislav Balik, Ondrej Hornig, Josef Horalek, and Vladimir Sobeslav

Social Networks and Their Potential for Education
Petra Poulova and Blanka Klimova

ITiB: Special Session on IT in Biomedicine

Development of Information and Management System for Laboratory Based on Open Source Licensed Software
Pavel Blazek, Kamil Kuca, Daniel Jun, and Ondrej Krejcar

Determining of Blood Artefacts in Endoscopic Images Using a Software Analysis
Lukas Sulik, Ondrej Krejcar, Ali Selamat, Reza Mashinchi, and Kamil Kuca

Combating Infectious Diseases with Computational Immunology
Martina Husáková

Mobile Cloud Computing in Healthcare System
Hanen Jemal, Zied Kechaou, Mounir Ben Ayed, and Adel M. Alimi

Parallel Flexible Molecular Docking in Computational Chemistry on High Performance Computing Clusters
Rafael Dolezal, Teodorico C. Ramalho, Tanos C.C. França, and Kamil Kuca

ColEdu: Special Session on Collective Computational Intelligence in Educational Context

Meta-Learning Based Framework for Helping Non-expert Miners to Choice a Suitable Classification Algorithm: An Application for the Educational Field
Marta Zorrilla and Diego Garcia-Saiz

Fuzzy Logic Based Modeling for Building Contextual Student Group Recommendations
Krzysztof Myszkorowski and Danuta Zakrzewska

Mining Social Behavior in the Classroom
Roberto Araya, Ragnar Behncke, Amitai Linker, and Johan van der Molen
Using Concept Maps in Education of Immunological Computation
and Computational Immunology ........................................... 461
    Martina Husáková

Framework of Design Requirements for E-learning Applied on Blackboard
Learning System ............................................................... 471
    Aneta Bartuskova, Ondrej Krejcar, and Ivan Soukal

SIDATA: Special Session on Science Intelligence and Data Analytics

Expressing a Temporal Entity-Relationship Model as a Traditional
Entity-Relationship Model .................................................. 483
    Hoang Quang and Thuong Pham

A Probabilistic Ontology for the Prediction of Author’s Interests ........... 492
    Emna Hlel, Salma Jamoussi, and Abdelmajid Ben Hamadou

A Framework of Faceted Search for Unstructured Documents
Using Wiki Disambiguation .................................................. 502
    Duc Binh Dang, Hong Son Nguyen, Thanh Binh Nguyen,
    and Trong Hai Duong

Current Derivative Estimation of Non-stationary Processes
Based on Metrical Information ............................................. 512
    Elena Kochegurova and Ekaterina Gorokhova

An Intelligent Possibilistic Approach to Reduce the Effect of the
Imperfection Propagation on Land Cover Change Prediction................. 520
    Ahlem Ferchichi, Wadii Boulila, and Imed Riadh Farah

CIFM: Special Session on Computational Intelligence in Financial Markets

Measuring the Impact of Imputation in Financial Fraud ...................... 533
    Stephen O. Moepya, Sharat S. Akhoury, Fulufhelo V. Nelwamondo,
    and Bhekisipho Twala

An Improved Grey Forecasting Models: Case in China’s Coal
Consumption Demand ......................................................... 544
    Chia-Nan Wang and Van-Thanh Phan

EL: Special Session on Ensemble Learning

Investigation of the Impact of Missing Value Imputation Methods
on the k-NN Classification Accuracy ..................................... 557
    Tomasz Orczyk and Piotr Porwik
Enhancing Intelligent Property Valuation Models by Merging Similar Cadastral Regions of a Municipality ........................................... 566
Tadeusz Lasota, Edward Sawiłow, Zbigniew Telec, Bogdan Trawiński,
Marta Roman, Paulina Matczuk, and Patryk Popowicz

Blurred Labeling Segmentation Algorithm for Hyperspectral Images .......... 578
Paweł Ksieniewicz, Manuel Graña, and Michał Woźniak

Keystroke Data Classification for Computer User Profiling and Verification ... 588
Tomasz Emanuel Wesołowski and Piotr Porwik

The New Multilayer Ensemble Classifier for Verifying Users
Based on Keystroke Dynamics .................................................... 598
Rafal Doroz, Piotr Porwik, and Hossein Safaverdi

Application of Evolving Fuzzy Systems to Construct Real Estate
Prediction Models ................................................................. 606
Martin Grześlowski, Zbigniew Telec, Bogdan Trawiński,
Tadeusz Lasota, and Krzysztof Trawiński

BigDMS: Special Session on Big Data Mining and Searching

What If Mixing Technologies for Big Data Mining
and Queries Optimization ....................................................... 619
Dhouha Jemal and Rim Faiz

Parallel K-prototypes for Clustering Big Data ............................... 628
Mohamed Aymen Ben HajKacem, Chiheb-Eddine Ben N’cir,
and Nadia Essoussi

Big Data: Concepts, Challenges and Applications ............................ 638
Imen Chebbi, Wadii Boulila, and Imed Riadh Farah

Improving Information-Carrying Data Capacity in Text Mining .............. 648
Marcin Gibert

Author Index ................................................................. 659
# Contents – Part I

Text Classification Using Novel “Anti-Bayesian” Techniques .......................... 1

B. John Oommen, Richard Khoury, and Aron Schmidt

Multi-agent Systems

ADELFE 3.0 Design, Building Adaptive Multi Agent Systems

Based on Simulation a Case Study ............................................................ 19

Wafa Mefteh, Frederic Migeon, Marie-Pierre Gleizes,
and Faiez Gargouri

Multi Agent Model Based on Chemical Reaction Optimization for Flexible

Job Shop Problem ................................................................. 29

Bilel Marzouki and Belkahla Driss Olfa

MATS–JSTL: A Multi-Agent Model Based on Tabu Search for Job Shop

Problem with Time Lags ............................................................. 39

Madiha Harrabi and Olfa Belkahla Driss

A Model of a Multiagent Early Warning System for Crisis Situations

in Economy ................................................................. 47

Marcin Hernes, Marcin Maleszka, Ngoc Thanh Nguyen,
and Andrzej Bytniewski

Combining Machine Learning and Multi-Agent Approach for Controlling

Traffic at Intersections .......................................................... 57

Mateusz Krzysztoń and Bartłomiej Śnieżyński

A Scalable Distributed Architecture for Web-Based Software Agents ............ 67

Dejan Mitrović, Mirjana Ivanović, Milan Vidaković, and Zoran Budimac

Mapping BPMN Processes to Organization Centered Multi-Agent Systems

to Help Assess Crisis Models ...................................................... 77

Nguyen Tuan Thanh Le, Chihab Hanachi, Serge Stinckwich,
and Tuong Vinh Ho

Agent Based Quality Management in Lean Manufacturing ......................... 89

Rafal Cupek, Huseyin Erdogan, Lukasz Huczala, Udo Wozar,
and Adam Ziebinski

Towards a Framework for Hierarchical Multi-agent Plans Diagnosis

and Recovery ................................................................. 101

Said Brahimi, Ramdane Maamri, and Sahnoun Zaidi
XX  Contents – Part I

Social Networks and NLP

A Survey of Twitter Rumor Spreading Simulations ................................. 113
   Emilio Serrano, Carlos A. Iglesias, and Mercedes Garijo

Mining Interesting Topics in Twitter Communities ................................. 123
   Eleni Vathi, Georgios Siolas, and Andreas Stafylopatis

Community Division of Bipartite Network Based on Information Transfer Probability ........................................ 133
   Chunlong Fan, Hengchao Wu, and Chi Zhang

User-Tweet Interaction Model and Social Users Interactions for Tweet Contextualization ..................................... 144
   Rami Belkaroui, Rim Faiz, and Pascale Kuntz

Supervised Learning to Measure the Semantic Similarity Between Arabic Sentences ........................................ 158
   Wafa Wali, Bilel Gargouri, and Abdelmajid Ben hamadou

Sentiment Analysis

How Impressionable Are You? - Grey Knowledge, Groups and Strategies in OSN ........................................ 171
   Camelia Delcea, Ioana Bradea, Ramona Paun, and Emil Scarlat

Semi-supervised Multi-view Sentiment Analysis .................................. 181
   Gergana Lazarova and Ivan Koychev

Modelling and Simulating Collaborative Scenarios for Designing an Assistant Ambient System that Supports Daily Activities .............. 191
   Sameh Triki, Chihab Hanachi, Marie-Pierre Gleizes, Pierre Glize, and Alice Rouyer

Regression Methods in the Authority Identification Within Web Discussions ........................................ 203
   Kristina Machová and Jaroslav Štefaník

Sem-SPARQL Editor: An Editor for the Semantic Interrogation of Web Pages ........................................ 213
   Sahar Maâlej Dammak, Anis Jedidi, and Rafik Bouaziz

Computational Intelligence and Games

Enhancing History-Based Move Ordering in Game Playing Using Adaptive Data Structures .................................. 225
   Spencer Polk and B. John Oommen
