Contents

Towards Smart Systems of Systems ........................................ 1
Holger Giese, Thomas Vogel, and Sebastian Watzoldt

Automated Integration of Service-Oriented Software Systems ........ 30
Marco Autili, Paola Inverardi, and Massimo Tivoli

Software Architecture Modeling and Evaluation Based on Stochastic
Activity Networks ........................................................... 46
Ali Sedaghatbaf and Mohammad Abdolahi Azgomi

Applicative Bisimulation and Quantum $\lambda$-Calculi .................. 54
Ugo Dal Lago and Alessandro Riol

Modeling and Efficient Verification of Broadcasting Actors .......... 69
Behnaz Yousefi, Fatemeh Ghassemi, and Ramtin Khosravi

A Theory of Integrating Tamper Evidence with Stabilization .......... 84
Reza Hajisheykh, Ali Ebnenasir, and Sandeep S. Kulkarni

A Safe Stopping Protocol to Enable Reliable Reconfiguration for
Component-Based Distributed Systems .................................. 100
Mohammad Ghafari, Abbas Heydarnoori, and Hassan Haghighi

Efficient Architecture-Level Configuration of Large-Scale Embedded
Software Systems ............................................................ 110
Razieh Behjati and Shiva Nejati

Benchmarks for Parity Games ............................................. 127
Jeroen J.A. Keiren

A Behavioural Theory for a $\pi$-calculus with Preorders ............ 143
Daniel Hirschkoff, Jean-Marie Madiot, and Xian Xu

Incremental Realization of Safety Requirements: Non-determinism vs.
Modularity ................................................................. 159
Ali Ebnenasir

Analyzing Mutable Checkpointing via Invariants ....................... 176
Deepanker Aggarwal and Astrid Kiehn

High Performance Computing Applications Using Parallel Data
Processing Units ............................................................. 191
Keyvan Azadbakht, Vlad Serbanescu, and Frank de Boer

Improved Iterative Methods for Verifying Markov Decision Processes ... 207
Jaber Karimpour, Ayaz Isazadeh, MohammadSadegh Mohagheghi,
and Khayyam Salehi
A Pre-congruence Format for XY-simulation .......................... 215
    Harsh Beohar and Mohammad Reza Mousavi

Tooled Process for Early Validation of SysML Models Using Modelica Simulation ...................................................... 230
    Jean-Marie Gauthier, Fabrice Bouquet, Ahmed Hammad, and Fabien Peureux

    Sung-Shik T.Q. Jongmans and Farhad Arbab

Painless Support for Static and Runtime Verification of Component-Based Applications................................................. 259
    Nuno Gaspar, Ludovic Henrio, and Eric Madelaine

Linear Evolution of Domain Architecture in Service-Oriented Software Product Lines .................................................. 275
    Sedigheh Khoshnevis and Fereidoon Shams

An Interval-Based Approach to Modelling Time in Event-B .......... 292
    Gintautas Sulskus, Michael Poppleton, and Abdolbaghi Rezazadeh

From Event-B Models to Dafny Code Contracts ....................... 308
    Mohammadsadegh Dalvandi, Michael Butler, and Abdolbaghi Rezazadeh

Author Index .................................................. 317
Fundamentals of Software Engineering
6th International Conference, FSEN 2015, Tehran, Iran, April 22-24, 2015. Revised Selected Papers
Dastani, M.; Sirjani, M. (Eds.)
2015, X, 317 p. 80 illus. in color., Softcover
ISBN: 978-3-319-24643-7
