Contents

Invited Papers

A Quest for Kleene Algebra in 2 Dimensions .......................... 3
Gheorghe Stefanescu

Connections between Relation Algebras and Cylindric Algebras ....... 27
Ian Hodkinson

Towards a Probabilistic Interpretation of Game Logic ................. 43
Ernst-Erich Doberkat

Theoretical Foundations

Completeness and Incompleteness in Nominal Kleene Algebra .......... 51
Dexter Kozen, Konstantinos Mamouras, and Alexandra Silva

Closure, Properties and Closure Properties of Multirelations .......... 67
Rudolf Berghammer and Walter Guttmann

Relational Formalisations of Compositions and Liftings
of Multirelations ................................................................... 84
Hitoshi Furusawa, Yasuo Kawahara, Georg Struth, and Norihiro Tsumagari

Relations among Matrices over a Semiring .............................. 101
Dylan Killingbeck, Milene Santos Teixeira, and Michael Winter

Completeness via Canonicity for Distributive Substructural Logics:
A Coalgebraic Perspective .................................................. 119
Fredrik Dahlqvist and David Pym

Generalised N-ary Relations and Allegories ............................ 136
Bartosz Zieliński

Mechanised Relation-Algebraic Order Theory in Ordered Categories
without Meets ...................................................................... 151
Musa Al-hassy and Wolfram Kahl

Reasoning about Computations and Programs

Metaphorisms in Programming ............................................. 171
José N. Oliveira
Contents

Relational Mathematics for Relative Correctness ............................................. 191
   Jules Desharnais, Nafi Diallo, Wided Ghardallou, Marcelo F. Frias,
   Ali Jaoua, and Ali Mili

Encoding and Decoding in Refinement Algebra ........................................... 209
   Kim Solin

Type Checking by Domain Analysis in Ampersand ....................................... 225
   Stef Joosten and Sebastiaan J.C. Joosten

Towards Interactive Verification of Programmable Logic Controllers
Using Modal Kleene Algebra and KIV ...................................................... 241
   Roland Glück and Florian Benedikt Krebs

Investigating and Computing Bipartitions with Algebraic Means ............ 257
   Rudolf Berghammer, Insa Stucke, and Michael Winter

Tool-Based Verification of a Relational Vertex Coloring Program ............. 275
   Rudolf Berghammer, Peter Höfner, and Insa Stucke

Applications of Relational and Algebraic Methods

L-Fuzzy Databases in Arrow Categories .................................................... 295
   Evans Adjei, Wazed Chowdhury, and Michael Winter

Text Categorization Using Hyper Rectangular Keyword Extraction:
Application to News Articles Classification ............................................. 312
   Abdelaali Hassaine, Souad Mecheter, and Ali Jaoua

Solving a Tropical Optimization Problem via Matrix Sparsification .......... 326
   Nikolai Krivulin

Towards Antichain Algebra ................................................................. 344
   Bernhard Möller

Decomposition of Database Preferences on the Power Set
of the Domain ......................................................................................... 362
   Patrick Roocks

Roughness by Residuals: Algebraic Description of Rough Sets and an
Algorithm for Finding Core Relations ............................................... 380
   Martin E. Müller

Author Index ......................................................................................... 395
Relational and Algebraic Methods in Computer Science
15th International Conference, RAMiCS 2015, Braga, Portugal, September 28 - October 1, 2015, Proceedings
Kahl, W.; Winter, M.; Oliveira, J.N. (Eds.)
2015, X, 395 p. 51 illus., Softcover
ISBN: 978-3-319-24703-8
