## Contents

1 Introduction ........................................... 1  
   References ........................................... 8

2 Theoretical Background ................................. 9  
   2.1 The s, p, d, f Atomic Orbitals ..................... 9  
   2.2 Point Group Symmetry ............................. 10
   2.3 Absorption of the Excitation Energy .................. 11  
      2.3.1 Optical Absorption Spectroscopy ............... 11  
      2.3.2 Luminescence Excitation Spectroscopy .......... 14
   2.4 Radiative Return to the Ground State: Luminescence .... 17  
      2.4.1 Ligand Field Theory .......................... 18
      2.4.2 Configurational Coordinate Diagram .......... 22  
      2.4.3 Molecular Orbital Theory .................... 25  
      2.4.4 Discrete Variational Multi Electron Technique .... 26
      2.4.5 Luminescence Decay .......................... 27
      2.4.6 Luminescence in the Band Scheme ............... 29
   References ........................................... 31

3 Experimental Techniques ................................. 33  
   3.1 Lasers ................................................ 33  
      3.1.1 The Basic Theory of Laser Action ............... 34
      3.1.2 Short Description of the Lasers Used  
            for Luminescence of Minerals Excitation ......... 34
   3.2 Steady-State Luminescence Spectroscopy ................ 35  
      3.2.1 Experimental Apparatus ....................... 35
      3.2.2 Spectral Deconvolution ....................... 36
   3.3 Time-Resolved Luminescence Spectroscopy ............... 37
   3.4 Other Laser Based Spectroscopic Techniques ............. 43
   Reference ........................................... 43
4 Luminescent Minerals .................................................. 45

4.1 Calcium (Ca\(^{2+}\)) Bearing Minerals .......................... 49

4.1.1 Apatite Ca\(_5\)(PO\(_4\))\(_3\)(F,Cl,OH) .......................... 49
4.1.2 Scheelite CaWO\(_4\) and Powellite CaMoO\(_4\) .............. 52
4.1.3 Fluorite CaF\(_2\) .................................................. 57
4.1.4 Calcite, Island Spar and Aragonite CaCO\(_3\) ............... 60
4.1.5 Dolomite (Ca, Mg)(CO\(_3\))\(_2\) .................................. 64
4.1.6 Danburite Ca\(_2\)Si\(_2\)O\(_6\) ........................................ 65
4.1.7 Datolite CaB\(_2\)(SiO\(_4\))\(_2\) ...................................... 66
4.1.8 Anhydrite CaSO\(_4\) ............................................ 67
4.1.9 Apophyllite Ca\(_4\)KF(Si\(_8\)O\(_{20}\))·8H\(_2\)O ...................... 69
4.1.10 Hardystonite Ca\(_2\)ZnSi\(_2\)O\(_7\) ................................. 70
4.1.11 Esperite Ca\(_3\)PbZn\(_4\)(SiO\(_4\))\(_4\) .......................... 71
4.1.12 Charoite K\(_2\)NaCa\(_3\)(Si\(_{12}\)O\(_30\))F\(_2\)X\(_3\)H\(_2\)O ......... 71
4.1.13 Prehnite Ca\(_2\)Al\(_2\)Si\(_3\)O\(_{10}\)(OH)\(_2\) .......................... 72
4.1.14 Pectolite NaCa\(_2\)Si\(_3\)O\(_8\)(OH) ................................ 72
4.1.15 Pyrochlore (Ca, Na)\(_2\)Nb\(_2\)O\(_6\)(OH, F) .................. 73
4.1.16 Leucophane NaCaBe(Si\(_2\)O\(_6\))F ........................... 74
4.1.17 Milarite K\(_2\)Ca\(_4\)Al\(_2\)Be\(_4\)Si\(_2\)O\(_{26}\)F\(_6\) .................. 76
4.1.18 Walsstromite Ca\(_2\)BaSi\(_3\)O\(_9\) .................................. 77
4.1.19 Bavenite Ca\(_4\)Be\(_2\)Al\(_2\)Si\(_8\)O\(_{26}\)(OH)\(_2\) ............... 78
4.1.20 Diopside CaMgSi\(_2\)O\(_6\) ...................................... 79
4.1.21 Eudialyte Na\(_{15}\)Ca\(_6\)(Fe, Mn)\(_3\)Zr\(_3\)SiO\(_{30}\)(OH, H\(_2\)O)\(_3\) .. 81
4.1.22 Shortite Na\(_2\)Ca\(_2\)(CO\(_3\))\(_3\) .................................. 82
4.1.23 Burbankite (Na, Ca)\(_3\)Sr\(_3\)Be\(_3\)Si\(_3\)O\(_{18}\) ................. 82
4.1.24 Prosope CaAl\(_2\)(F, OH)\(_8\) .................................. 84
4.1.25 Svabite Ca\(_5\)(AsO\(_4\))\(_3\)F ..................................... 85
4.1.26 Anorthite CaAl\(_2\)Si\(_2\)O\(_8\) ................................... 85

4.2 Lead (Pb\(^{2+}\)) Bearing Minerals ................................. 87

4.2.1 Pyromorphite Pb\(_5\)(PO\(_4\))\(_3\)Cl .................................. 87
4.2.2 Vanadinite Pb\(_5\)(VO\(_4\))\(_3\)Cl .................................. 88
4.2.3 Wulfenite PbMoO\(_4\) ............................................ 89
4.2.4 Margarosanite Pb(Ca, Mn)\(_2\)Si\(_3\)O\(_9\) ....................... 89
4.2.5 Cerussite PbCO\(_3\) ............................................. 90

4.3 Tin (Sn\(^{4+}\)) Bearing Minerals .................................... 91

4.3.1 Cassiterite SnO\(_2\) ............................................... 91
4.3.2 Malayaite CaSn(SiO\(_3\)) ..................................... 92

4.4 Barium (Ba\(^{2+}\)) Bearing Minerals ............................... 93

4.4.1 Barite BaSO\(_4\) .................................................. 94
4.4.2 Witherite BaCO\(_3\) ............................................. 95

4.5 Strontium (Sr\(^{2+}\)) Bearing Minerals ........................... 96

4.5.1 Celestine SrSO\(_4\) ............................................... 96
4.5.2 Strontianite SrCO\(_3\) .......................................... 97
4.6 Titanium (Ti$^{4+}$) Bearing Minerals ................................................. 98
  4.6.1 Titanite CaTiSiO$_5$ ................................................................. 98
  4.6.2 Benitoite BaTiSi$_3$O$_9$ ........................................................... 102
  4.6.3 Baghdadite Ca$_3$(Zr,Ti)Si$_2$O$_9$ .............................................. 104
  4.6.4 Other Titanium Bearing Minerals ............................................. 104

4.7 Zinc (Zn$^{2+}$) Bearing Minerals .................................................. 105
  4.7.1 Hydrozincite Zn$_5$(CO$_3$)$_2$(OH)$_6$ ........................................ 105
  4.7.2 Willemite Zn$_3$SiO$_4$ ............................................................... 106
  4.7.3 Gahnite ZnAl$_2$O$_4$ ................................................................. 107
  4.7.4 Smithonite ZnCO$_3$ ................................................................. 107
  4.7.5 Genthellvite Be$_3$Zn$_4$(SiO$_4$)$_3$S ......................................... 108

4.8 Zirconium (Zr$^{4+}$) Bearing Minerals .......................................... 108
  4.8.1 Zircon ZrSiO$_4$ .................................................................. 109
  4.8.2 Baddeleyite ZrO$_2$ ................................................................. 114

4.9 Silicon (Si$^{4+}$) Bearing Minerals .................................................. 116
  4.9.1 Wollastonite CaSiO$_3$ ............................................................... 118
  4.9.2 Feldspars .............................................................................. 119
  4.9.3 Quartz SiO$_2$ .......................................................................... 121
  4.9.4 Phenakite Be$_2$SiO$_4$ ............................................................... 126

4.10 Aluminum (Al$^{3+}$) Bearing Minerals ........................................... 127
  4.10.1 Kyanite, Sillimanite and Andalusite Al$_2$O[SiO$_4$] ..................... 127
  4.10.2 Topaz Al$_2$SiO$_4$F$_2$ ............................................................... 136
  4.10.3 Corundum Al$_2$O$_3$ ................................................................. 140
  4.10.4 Spinel MgAl$_2$O$_4$ ................................................................. 144
  4.10.5 Beryl and Emerald Be$_3$Al$_2$Si$_6$O$_{18}$ .................................... 147
  4.10.6 Chrysoberyl BeAl$_2$O$_4$ ........................................................... 150
  4.10.7 Grossular Ca$_3$Al$_2$(SiO$_4$)$_3$ .............................................. 157
  4.10.8 Tourmaline (Na,Ca)(Mg,Al,Li)$_3$Al$_6$
                   × (BO$_3$)$_3$Si$_2$O$_{18}$OH ........................................... 162
  4.10.9 Epidote (Zoisite) Ca$_2$AlAl$_2$O(OH)(Si$_2$O$_7$)(SiO$_4$) ............... 163
  4.10.10 Eosphorite AlPO$_4$Mn(OH)$_2$H$_2$O ........................................ 166
  4.10.11 Spodumen LiAlSi$_2$O$_6$ ........................................................ 167
  4.10.12 Boehmite and Diaspor AlOOH .............................................. 168
  4.10.13 Chlorite (Mg,Al,Fe)$_{12}$[(Si,Al)$_3$O$_{20}$](OH)$_{16}$ ..................... 170
  4.10.14 Clintonite Ca(Mg,Al)$_3$(Al$_3$Si)O$_{10}$(OH)$_2$ ....................... 171
  4.10.15 Cordierite Mg$_2$Al$_3$[AlSi$_5$O$_{18}$] .................................... 171
  4.10.16 Nepheline (Na,K)(AlSi)$_2$O$_4$ .............................................. 173
  4.10.17 Jadeite NaAlSi$_2$O$_6$ ........................................................... 173
  4.10.18 Phlogopite K(Mg,Al,Fe)$_3$AlSi$_3$O$_{10}$(F,OH)$_2$ ..................... 174
  4.10.19 Clinohlore (Mg,Fe)$_5$AlSi$_3$AlO$_{10}$(OH)$_8$ ......................... 174
  4.10.20 Clinohumite (Mg,Fe)$_9$(SiO$_4$)$_4$(F,OH)$_2$ ......................... 176
  4.10.21 Euclase BeAlSiO$_4$(OH) ....................................................... 176
  4.10.22 Dickite Al$_2$Si$_2$O$_5$(OH)$_4$ .............................................. 178
4.11 Sodium (Na\(^+\)) Bearing Minerals ........................................ 178
4.11.1 Sodalite Na\(_8\)[Al\(_6\)Si\(_6\)O\(_{24}\)]Cl\(_2\), Hackmanite
    Na\(_8\)[Al\(_6\)Si\(_6\)O\(_{24}\)](Cl\(_2\),S) and Tugtupite
    Na\(_4\)AlBeSi\(_4\)O\(_{12}\)C ........................................ 181
4.11.2 Lazurite Na\(_6\)Ca\(_3\)(Si\(_6\)O\(_{24}\))(SO\(_4\),S\(_3\),S\(_2\),Cl,OH)\(_2\) .......... 183
4.11.3 Scapolite Na\(_4\)Al\(_3\)Si\(_9\)O\(_{24}\)Cl .................................. 183
4.11.4 Analcime NaAlSi\(_3\)O\(_8\)•(H\(_2\)O) .................................. 184
4.11.5 Delhayelite (Na,K)\(_{10}\)Ca\(_5\)Al\(_6\)Si\(_{32}\)O\(_{80}\)(Cl\(_2\),F\(_2\),SO\(_4\))\(_3\)•
    18(H\(_2\)O) ........................................ 185
4.12 Silver (Ag\(^+\)) Bearing Minerals ..................................... 185
4.12.1 Chlorargyrite AgCl and Embolite Ag(Cl,Br) .................. 186
4.13 Manganese (Mn\(^{2+}\)) Bearing Minerals ............................ 187
4.13.1 Rhodonite CaMn\(_4\)Si\(_5\)O\(_{15}\), Rhodochrosite MnCO\(_3\),
    Axinite Ca\(_3\)MnAl\(_2\)BSi\(_4\)O\(_{15}\)OH .................. 187
4.13.2 Helvite Mn\(_4\)(BeSiO\(_4\))\(_2\)S ................................ 188
4.14 Uranium (U\(^{6+}\)) Bearing Minerals ................................. 189
4.15 Magnesium (Mg\(^{2+}\)) Bearing Minerals ............................ 190
4.15.1 Forsterite Mg\(_2\)SiO\(_4\) .................................. 190
4.15.2 Enstatite MgSiO\(_3\) .................................. 197
4.15.3 Magnesite MgCO\(_3\), and Phlogopite
    KMg\(_3\)Al\(_3\)Si\(_3\)O\(_{10}\)(F,OH)\(_2\) .................. 199
4.15.4 Clinohlore Mg\(_5\)Al(Si\(_3\)Al)O\(_{10}\)(OH)\(_8\) ........... 199
4.15.5 Sinhalite MgAlBO\(_4\) ................................ 200
4.16 Rare-Earth Bearing Minerals ........................................ 201
4.16.1 Monazite (Ce,La)PO\(_4\) ................................ 201
4.16.2 Thorite ThSiO\(_4\) .................................. 202
4.16.3 Xenotime YPO\(_4\) .................................. 202
4.16.4 Bastnasite CeCO\(_3\)F .................................. 203
4.16.5 Cerite (Ca,La,La)(Mg,Fe)(SiO\(_4\))\(_6\)(SiO\(_3\)OH)(OH)\(_3\) .... 205
4.16.6 Parisite Ca(Ce,La)(CO\(_3\))\(_3\)F\(_2\) .................. 205
4.16.7 Shomiokeite Na\(_3\)Y(CO\(_3\))\(_3\)•3(H\(_2\)O) .......... 206
4.16.8 Fergusonite (Y, RE)NbO\(_4\) ........................ 206
4.17 Cesium (Cs\(^+\)) Bearing Minerals ................................ 207
4.17.1 Pezzottaite Cs(Be\(_2\)Li)Al\(_2\)(Si\(_6\)O\(_{18}\)) .................... 207
4.18 Antimony (Sb\(^{3+}\)) Bearing Minerals ............................ 209
4.18.1 Swedenborgite NaBe\(_4\)SbO\(_7\) ................................ 209
4.18.2 Diamond C .................................. 210
References ................................................................. 213
5 Interpretation of Luminescence Centers ......................... 221
5.1 Rare-Earth Elements (REE) ........................................ 221
5.1.1 Introduction .................................. 221
5.1.2 Electronic Levels of 4f Elements .............................. 222
5.1.3 Matrix Elements of Operators .............................. 224
5.1.4 Results of Theoretical Calculation ................. 226
5.1.5 Transition Probabilities of 4 f-elements and the Judd-Ofelt Theory ............... 228

5.2 Radiative Transitions in Rare Earth Elements ............... 230
5.3 Relaxation Process in Trivalent Rare Earths .............. 232
5.4 Energy Transfer Between Two Rare Earth Ions ............. 235
5.5 The Treatment of Optical Properties of Divalent REE ........ 236
