

Contents

1	From Theoretical Mechanics to Mechanothermodynamics	1
	References	5
2	Energy States of the Mechanothermodynamic System and the Analysis of Its Damageability	7
	2.1 General Notions	7
	2.2 Energy Theory of Limiting States	11
	2.3 Energy Theory of Damage	16
	2.4 Account of Electrochemical Damageability	20
	2.5 Some Special Cases	21
	2.6 Analysis of Experimental Results	24
	2.7 Summary of Experimental Data	33
	2.8 Translimiting States	38
	2.9 Evolution of a System by Damageability	46
	References	54
3	Entropy States of Mechanothermodynamic Systems and Their Evolution	57
	3.1 General Notions	57
	3.2 Tribo-Fatigue Entropy	58
	3.3 Calculation of Entropy	63
	3.4 Interrelation of Motion, Damage, and Information	72
	3.5 Evolution of a System and Entropy	83
	References	88
4	Principles of Mechanothermodynamics	91
	4.1 General Notions	91
	4.2 First Principle of Mechanothermodynamics	93
	4.3 Second Principle of Mechanothermodynamics	95
	4.4 Third Principle of Mechanothermodynamics	103

4.5	Fourth Principle of Mechanothermodynamics.	108
4.6	A-Evolution.	113
	References	122
5	Generalized Model of Mechanothermodynamic	
	States of Continuum.	125
5.1	General Notions.	125
5.2	Energy and Entropy Descriptions of Continuum States	125
5.3	Mechanothermodynamic States of Continuum	130
	References	140
6	Some Areas for Further Research.	141
	References	147
	About the Authors.	149
	Index	151

Mechanothermodynamics

Sosnovskiy, L.; Sherbakov, S.

2016, IX, 155 p. 72 illus., Hardcover

ISBN: 978-3-319-24979-7
