Contents

Model Based Testing

Checking Experiments for Finite State Machines with Symbolic Inputs . . . . 3
   Alexandre Petrenko and Adenilso Simao

Using Multiple Adaptive Distinguishing Sequences for Checking Sequence
   Generation ................................................................. 19
   Canan Güniçen, Guy-Vincent Jourdan, and Hüsnü Yenigün

Model-Based Testing from Input Output Symbolic Transition Systems
   Enriched by Program Calls and Contracts ............................ 35
   Imen Boudhiba, Christophe Gaston, Pascale Le Gall,
   and Virgile Prevosto

Test Derivation Methods

Graph Methods for Generating Test Cases with Universal and Existential
   Constraints ............................................................... 55
   Sylvain Hallé, Edmond La Chance, and Sébastien Gaboury

Reducing the Cost of Grammar-Based Testing Using Pattern Coverage . . . 71
   Cleverton Hentz, Jurgen J. Vinju, and Anamaria M. Moreira

Automated Test Design for Boundaries of Product Line Variants ............ 86
   Stephan Weißleeder, Florian Wartenberg, and Hartmut Lackner

Monitoring and Fault Localization

Guiding Testers’ Hands in Monitoring Tools: Application of Testing
   Approaches on SIP ...................................................... 105
   Xiaoping Che, Stephanie Maag, Huu Nghia Nguyen, and Fatiha Zaïdi

Testing for Distinguishing Repair Candidates in Spreadsheets – the Mussco
   Approach ................................................................. 124
   Rui Abreu, Simon Außerlechner, Birgit Hofer, and Franz Wotawa

Novel Insights on Cross Project Fault Prediction Applied to Automotive
   Software ................................................................. 141
   Harald Altinger, Steffen Herbold, Jens Grabowski, and Franz Wotawa
Model and System Testing

Inferring Finite State Machines Without Reset Using State Identification
Sequences ......................................................... 161
Roland Groz, Adenilso Simao, Alexandre Petrenko, and Catherine Oriat

mu2: A Refactoring-Based Mutation Testing Framework for Erlang .......... 178
Ramsay Taylor and John Derrick

A Survey on Testing for Cyber Physical System .......................... 194
Sara Abbaspour Asadollah, Rafia Inam, and Hans Hansson

Real-Time Systems

Test-Data Generation for Testing Parallel Real-Time Systems ............. 211
Muhammad Waqar Aziz and Syed Abdul Baqi Shah

Selective Test Generation Approach for Testing Dynamic Behavioral
Adaptations .......................................................... 224
Mariam Lahami, Moez Krichen, Hajeer Barhoumi, and Mohamed Jmaiel

Short Papers

Heuristics for Deriving Adaptive Homing and Distinguishing Sequences
for Nondeterministic Finite State Machines. .......................... 243
Natalia Kushik and Hüsnü Yenigün

Genetic Algorithm Application for Enhancing State-Sensitivity Partitioning. . 249
Ammar Mohammed Sultan, Salmi Baharom, Abdul Azim Abd Ghani,
Jamilah Din, and Hazura Zulzalil

A Negative Input Space Complexity Metric as Selection Criterion for Fuzz
Testing .............................................................. 257
Martin A. Schneider, Marc-Florian Wendland, and Andreas Hoffmann

A Practical Evaluation Method of Network Traffic Load for Capacity
Planning ........................................................... 263
Takeshi Kitahara, Shuichi Nawata, Masaki Suzuki, Norihiro Fukumoto,
and Shigehiro Ano

Author Index ...................................................... 269
Testing Software and Systems
27th IFIP WG 6.1 International Conference, ICTSS 2015,
Sharjah and Dubai, United Arab Emirates, November
23-25, 2015, Proceedings
El-Fakih, K.; Barlas, G.; Yevtushenko, N. (Eds.)
2015, XIV, 269 p. 69 illus. in color., Softcover
ISBN: 978-3-319-25944-4
