Contents

1 Introduction ............................................................................................................. 1
   Plamen Demirev and Todd R. Sandrin

Part I Methodology and Techniques

2 Methods and Instrumentation in Mass Spectrometry for the Differentiation of Closely Related Microorganisms ........................................ 13
   Franco Basile and Rudolph K. Mignon

3 Sample Preparation Methods for the Rapid MS Analysis of Microorganisms ................................................................. 51
   Shobha Devi, Anren Hu and Yen-Peng Ho

4 Advantages Offered by Proteomic Strategies for Rapid Biodetection..... 73
   Catherine Fenselau

5 Bottom-Up Proteomics Methods for Strain-Level Typing and Identification of Bacteria ................................................................. 83
   Jacek P. Dworzanski

6 Maximizing the Taxonomic Resolution of MALDI-TOF-MS-Based Approaches to Bacterial Characterization: From Culture Conditions Through Data Analysis ............................................. 147
   Lin Zhang and Todd R. Sandrin

Part II Subspecies Discrimination

7 Modulation of the Discriminatory Power of MALDI-TOF MS Profiling for Distinguishing Between Closely Related Bacterial Strains ........................................................................... 185
   Ondrej Šedo and Zbyněk Zdráhal
8 Discriminatory Power of MALDI-TOF Mass Spectrometry for Phylogenetically Closely Related Microbial Strains .......................... 203
Peter Lasch, Daniela Jacob, Silke R. Klee and Guido Werner

9 MALDI-TOF MS as a Novel Tool for Dereplication and Characterization of Microbiota in Bacterial Diversity Studies ........ 235
Freek Spitaels, Anneleen D. Wieme and Peter Vandamme

10 Bacterial Identification at the Serovar Level by Top-Down Mass Spectrometry ................................................................. 257
Melinda A. McFarland, Denis Andrzejewski and John H. Callahan

Part III Drug Resistance Monitoring and Assays

11 Rapid Profiling of Human Pathogenic Bacteria and Antibiotic Resistance Employing Specific Tryptic Peptides as Biomarkers ........................................................................................................ 275
David Drissner, René Brunisholz, Ralph Schlapbach and Maria-Theresia Gekenidis

12 Detection of β-Lactamases and Their Activity Using MALDI-TOF MS ............................................................... 305
Jaroslav Hrabak, Vladimír Havlícek and Costas C. Papagiannitsis

13 Stable-Isotope-Based Strategies for Rapid Determination of Drug Resistance by Mass Spectrometry ........................................ 317
Plamen Demirev

Index ........................................................................................................ 327
Applications of Mass Spectrometry in Microbiology
From Strain Characterization to Rapid Screening for
Antibiotic Resistance
Demirev, P.; Sandrin, T.R. (Eds.)
2016, VIII, 336 p. 68 illus., 32 illus. in color., Hardcover
ISBN: 978-3-319-26068-6
