Part I What Is Science?

1	The Evolution of Science	3
1.1	Greece: The Dawn of Science	3
1.2	The Medieval Worldview	10
1.3	The Scientific Revolution	12
1.4	Theory of Science and Philosophy of Science	16
1.5	Summary	16
	Further Reading	17
2	Knowledge	19
2.1	Introduction	19
2.2	Knowing That, Knowing How and Acquaintance	19
2.3	The Definition of Propositional Knowledge	21
2.3.1	P Is True	22
2.3.2	Good Reasons for P	27
2.3.3	What Does It Mean to Believe That P?	28
2.4	Can One Know Without Knowing that One Knows?	30
2.5	Reliabilism	30
2.6	Data, Information, Knowledge	31
2.7	The Philosopher's Versus the Sociologist's Concept of Knowledge	34
2.8	The Expression 'It Is True for Me that. . . '	35
2.9	Knowledge of Religious Beliefs	38
2.10	Summary	38
	Further Reading	40
3	Hypotheses and Hypothesis Testing	41
3.1	Introduction	41
3.2	Unity of Science?	42
3.3	Hypothetical-Deductive Method	43

3.4 Hypothesis Testing in the Social Sciences 48

3.5 Hypothesis Testing in History: The Wallenberg Affair 49

3.6 Statistical Testing of Hypotheses 53

 3.6.1 Bayesianism 53

 3.6.2 Statistical Inference -Neyman-Pearson’s Method 54

3.7 Unacceptable Auxiliary Assumptions: Ad Hoc-Hypotheses 56

3.8 Summary 59

Further Reading 61

4 On Scientific Data 63

4.1 Measurement and Scales 63

4.2 Statistical Relations 65

4.3 Data, Observation, Observational Statement 69

4.4 On the Theory-Dependence of Observational Statements 72

4.5 Observations and History: On Source Criticism 77

4.6 Summary 79

Further Reading 80

5 Qualitative Data and Methods 81

5.1 Introduction 81

5.2 Intentionality and Meaning 82

5.3 Hermeneutics 86

5.4 Grounded Theory 88

5.5 The Intentionality of Observations 90

5.6 Are Quantitative Methods Better than Qualitative? 93

5.7 Objectivity and the Use of Qualitative Methods 94

5.8 Searle on Brute and Social Facts 95

5.9 Social Constructions 99

5.10 Criteria for Correct Interpretations 100

5.11 Summary 102

Further Reading 102

6 Theories About the Development of Science 103

6.1 Introduction 103

6.2 Logical Positivism 103

6.3 Falsificationism 106

6.4 Normal Science, Scientific Revolutions
and Paradigm Shifts 109

6.5 Lakatos’ Theory of Research Programmes 112

6.6 Methodological Anarchism: Anything Goes 115

6.7 Summary of the Debate 116

6.8 The Rationality of Science: A Model 118

Further Reading 121

**Part II Philosophical Reflections on Four Core Concepts
in Science: Causes, Explanations, Laws and Models**

7 On Causes and Correlations 125

7.1 Causes Are INUS Conditions 125

7.2 Cause-Effect and Order in Time 129

7.3 Causes and Statistical Correlations 129

7.4 Risk Factors and Conditional Probabilities 134

7.5 Direct and Indirect Causes 136

7.6 Causes as Physical Effects 137

7.7 Cause and Effect in History 138

7.8 Summary 140

Further Reading 141

8 Explanations 143

8.1 Explanation and Prediction 143

8.2 What Is Explained? 144

8.3 The D-N Model 146

8.3.1 Problems with the D-N Model 147

8.4 Causal Explanations 149

8.5 Explanation as Unification 150

8.6 Statistical Explanations 151

8.7 Action Explanations 154

8.8 Pragmatic Explanations 156

8.9 Summary 158

Further Reading 159

9 Explanation in the Humanities and Social Sciences 161

9.1 Methodological Collectivism Versus Methodological
Individualism 161

9.2 Explanations of Historical Events 164

9.3 Explanation of Social Phenomena 166

9.4 Functional Explanations 168

9.5 Summary 170

Further Reading 171

10 Scientific Laws 173

10.1 Introduction 173

10.2 Empirical Generalizations: Fundamental Laws 174

10.3 Deterministic and Statistical Laws 175

10.4 The Extension of the Concept of a Natural Law 176

10.5 Laws and Accidental Generalisations 177

10.6 van Fraassen’s Alternative 181

10.7 A Proposal: Some Laws Are Implicit Definitions
of Quantities 182

10.8 Summary 187

Further Reading 187

11 Theories, Models and Reality	189
11.1 Introduction	189
11.2 Structural Similarity as a Mapping of Relations	191
11.3 Mathematical Models	191
11.4 Wave-Particle Dualism	193
11.5 Can One Measure Structural Similarity?	195
11.6 Ontology and Structural Similarity	195
Further Reading	196
Part III Some Auxiliaries	
12 The Mind-Body Problem	199
12.1 Introduction	199
12.2 Substance Dualism	200
12.3 Property Dualism	201
12.4 Monism	202
12.5 Monistic Theories	203
12.6 Three Important Problems for Reductionists	205
12.7 Mental Causes	210
12.8 Speculations	212
12.9 The Science of Man	213
Further Reading	216
13 Science and Values	217
13.1 Values and Their Role in Science	217
13.2 Value-Free and Value-Laden	219
13.3 Is Science Valuable?	220
13.4 Feminist Critique: Hidden Values in Science	222
13.5 Research Ethics	224
Further Reading	226
14 Some Recent Trends in Science	227
14.1 The Impact of University Mass Education	227
14.2 Publish or Perish: The Value of a Research Paper	228
14.3 Research Funding and Planning	229
14.4 Big Science	230
14.5 The Scientific Attitude and the Search for Meaning	231
Appendix: Logical Forms	233
Introduction	233
Logical Form 1: Sentences	234
Variables	236
Predicates	237
Logical Form 2: Argument	238
Some Common Valid Argument Forms	238
Some Invalid Argument Forms	239

The ‘if...then’ Construction	241
Necessary and Sufficient Conditions	244
Further Reading	244
Definitions of Some Core Concepts	245
Literature	249
Index	255
