

Contents

Introduction	xiii
1 Classical Rigid Geometry	1
1.1 Non-Archimedean Fields	1
1.2 Restricted Power Series	3
1.3 Affinoid Spaces	5
1.4 The Maximum Principle	10
1.5 Rigid Analytic Spaces	12
1.6 Coherent Sheaves	15
1.7 Line Bundles	19
1.8 Algebraization of Proper Rigid Analytic Curves	26
2 Mumford Curves	29
2.1 Tate’s Elliptic Curve	29
2.2 Schottky Groups	32
2.3 Definition and Properties	49
2.4 Skeletons	52
2.5 Automorphic Functions	62
2.6 Drinfeld’s Polarization	69
2.7 Rigid Analytic Tori and Their Duals	73
2.8 Jacobian Variety of a Mumford Curve	83
2.9 Riemann’s Vanishing Theorem	91
3 Formal and Rigid Geometry	103
3.1 Canonical Reduction of Affinoid Domains	104
3.1.1 Functors $A_K \rightsquigarrow \mathring{A}_K$ and $A_K \rightsquigarrow \tilde{A}_K$	104
3.1.2 Formal Analytic Spaces	106
3.1.3 Finiteness Theorem of Grauert-Remmert-Gruson	111
3.2 Admissible Formal Schemes	113
3.3 Generic Fiber of Admissible Formal Schemes	117
3.4 Reduced Fiber Theorem	123
3.4.1 Analytic Method of Grauert-Remmert-Gruson	124

- 3.4.2 Elementary Method of Epp 126
- 3.4.3 The Natural Approach 128
- 3.5 Complements on Flatness 149
- 3.6 Approximation in Smooth Rigid Spaces 155
- 3.7 Compactification of Smooth Curve Fibrations 169
- 4 Rigid Analytic Curves 177**
 - 4.1 Formal Fibers 178
 - 4.2 Genus Formula 190
 - 4.3 Meromorphic Functions 196
 - 4.4 Formal Stable Reduction 201
 - 4.5 Stable Reduction 210
 - 4.6 Universal Covering of a Curve 212
 - 4.7 Characterization of Mumford Curves 215
- 5 Jacobian Varieties 217**
 - 5.1 Jacobian of a Smooth Projective Curve 218
 - 5.2 Generalized Jacobian of a Semi-Stable Curve 221
 - 5.3 Lifting of the Jacobian of the Reduction 231
 - 5.4 Morphisms to Rigid Analytic Groups with Semi-Abelian
Reduction 235
 - 5.5 Uniformization of Jacobians 240
 - 5.6 Applications to Abelian Varieties 247
- 6 Raynaud Extensions 255**
 - 6.1 Basic Facts 255
 - 6.2 Line Bundles 265
 - 6.3 Duality 282
 - 6.4 Algebraization 286
 - 6.5 Polarization of Jacobians 291
 - 6.6 Parameterizing Degenerating Abelian Varieties 303
- 7 Abeloid Varieties 309**
 - 7.1 Basic Facts on Abeloid Varieties 310
 - 7.2 Generation of Subgroups by Smooth Covers 314
 - 7.3 Extension of Formal Tori 321
 - 7.4 Morphisms from Curves to Groups 326
 - 7.5 Stable Reduction of Relative Curves 331
 - 7.6 The Structure Theorem 342
 - 7.7 Proof of the Structure Theorem 346
- Appendix Miscellaneous 355**
 - A.1 Some Notions about Graphs 355
 - A.2 Torus Extensions of Formal Abelian Schemes 358
 - A.3 Cubical Structures 364
- Glossary of Notations 373**
- References 377**
- Index 381**

Rigid Geometry of Curves and Their Jacobians

Lütkebohmert, W.

2016, XVIII, 386 p. 1 illus., Hardcover

ISBN: 978-3-319-27369-3
