Introduction	xxvii
1 Complex Systems and Man’s Desire to Understand and Influence Them	1
1.1 Complex Systems	4
1.2 The Limits of Planning Complex Systems	6
1.3 Purposive Planning and Untargeted Evolution	6
1.4 Evidence Supporting the Theory	8
1.5 The Structure of This Work: Theory, Evidence, Conclusion	8
Part I A Theory of Emergent Nested Systems	
2 Emergent Systems: Nested, Fast, and Slow	13
2.1 What Do We Not Know that We Don’t Know?	15
2.2 The Emergence of New Qualities	17
2.3 General Properties of Emergent Systems	20
2.3.1 Nestedness	21
2.3.2 Inward Influence	22
2.3.3 Outward Influence	23
2.3.4 Wholes	24
2.4 Fast and Slow Systems	25
3 Emergent Systems: First Implications	29
3.1 Emergent Nested Systems, Fast and Slow	29
3.2 Objective Novelty in Ontologically Real Systems	31
3.2.1 Subjective Novelty?	31
3.2.2 Ontologically Real Systems	32
3.2.3 Forever Indiscernible Causes?	33
3.3 The Power of the Individual and the Whole	34
3.3.1 The Power of the Individual	35
3.3.2 Modeling Averages	35

- 3.3.3 The Use of Statistical Models 36
- 3.3.4 The Power of the Whole 37
- 3.3.5 The Power of Emergence 38
- 3.4 Emergent, Not Reshuffled 40
- 4 Influencing ENS 41**
 - 4.1 Influencing ENS 43
 - 4.2 Three Generic Ways to Influence ENS 45
 - 4.2.1 Changing Rules of Inward Influence 46
 - 4.2.2 Changing Activities of Outward Influence 46
 - 4.2.3 Submitting to the Guiding and Selecting Rules 48
 - 4.3 Three Case Studies to Exemplify Influencing ENS 48
- Part II Understanding and Influencing Emergent Nested Systems: A Case-Study Approach and Exemplary Cases**
- 5 Understanding ENS 53**
 - 5.1 Purpose of a Case Study: Understanding the Emergent Nested System for Subsequent, Purposive Activity 53
 - 5.2 Scope of a Case Study: Focusing on the Single Case 54
 - 5.2.1 Unique Situations Are Decisive 54
 - 5.2.2 Studying Single Cases 55
 - 5.3 A Single-Case Approach for ENS 57
 - 5.4 Enclosing Sociocultural Systems 58
 - 5.4.1 Weaknesses of Some Common System Classifications 59
 - 5.4.2 Distinguishing Empirically Evident Superordinate Systems 60
 - 5.4.3 Introducing the E-CEPT Framework of Superordinate Enclosing Systems 61
 - 5.5 Practical Implications for Studying Single ENS 62
 - 5.5.1 Exploratory and Descriptive 62
 - 5.5.2 Bounded by Dealing with Ontologically Real Entities 63
 - 5.5.3 Heuristic, Iterative, and Empirical 65
 - 5.5.4 Narrative 66
 - 5.5.5 Deductive 66
 - 5.5.6 Non-predictive 67
 - 5.5.7 Situation-Changing 68
- 6 Guiding Rules and Emerging Novelty in the Urban System of Lviv 69**
 - 6.1 Aim, Scope, and Location of Case Studies 70
 - 6.2 Four Superordinate Systems 71
 - 6.2.1 Three Superordinate Cultural Systems of Lviv 76
 - 6.2.2 Economic Superordinate System of Lviv 87
 - 6.2.3 Political Superordinate System of Lviv 92

- 6.2.4 Technical Superordinate Systems of Lviv 101
- 6.3 Three Cases and Three Ways of Influencing ENS 110
 - 6.3.1 Case Study 1: Built Heritage. 112
 - 6.3.2 Case Study 2: Entrepreneurship. 124
 - 6.3.3 Case Study 3: Public Transport. 137

Part III Reflections and Outlook

- 7 Purposive Decision-Making and Foresighted Activities. 151**
 - 7.1 Understanding the Nested System by Objective Frequencies of Change. 152
 - 7.2 Being an Engaged Observer and Engaging Reporters of Change. 153
 - 7.3 Conceiving a Vision of Change. 155
 - 7.4 Choosing Among Means of Influence. 156
 - 7.4.1 Working on Guiding Rules. 156
 - 7.4.2 Triggering Activities 158
 - 7.4.3 Working Within Given Rules 161
 - 7.4.4 Considering Stabilities 163
 - 7.4.5 Making Productive Use of Instabilities. 163
 - 7.4.6 Effectuating ENS. 166
 - 7.5 Applying the Scientific Method to Test Possible Interventions. 168
 - 7.5.1 Applying the Scientific Method. 168
 - 7.5.2 Using Models for Alpha Tests 169
 - 7.5.3 Engaging Individuals as Beta Testers. 170
- 8 A Second Look at ENS Theory. 173**
 - 8.1 Key Findings of a Theory of ENS. 173
 - 8.1.1 Fast and Slow Systems are Ontologically Real 175
 - 8.1.2 ‘Emerging’ Patterns are not Emergent 175
 - 8.1.3 Purposive Influence is Possible with Inward and Outward Influence in ENS 175
 - 8.1.4 Nestedness Defines the Development of Complex Systems 177
 - 8.1.5 Influencing Complex Systems Means to Influence the Nesting Processes. 178
 - 8.2 Outlook 179
- Postlogue 181**
- Glossary 183**
- Bibliography 189**
- Index 197**

Emergent Nested Systems

A Theory of Understanding and Influencing Complex
Systems as well as Case Studies in Urban Systems

Walloth, C.

2016, XXXII, 199 p. 106 illus., 98 illus. in color.,

Hardcover

ISBN: 978-3-319-27548-2
