## Contents

### Invited Paper

Safety Case Development with SBVR-Based Controlled Language .......................... 3  
*Yaping Luo, Mark van den Brand, and Alexandre Kiburse*

### Modeling Languages, Tools and Architectures

Realizing a Conceptual Framework to Integrate Model-Driven Engineering, Software Product Line Engineering, and Software Configuration

Management .................................................................................................................. 21  
*Felix Schwägerl, Thomas Buchmann, Sabrina Uhrig, and Bernhard Westfechtel*

Composition of Heterogeneous Modeling Languages .............................................. 45  
*Arne Haber, Markus Look, Pedram Mir Seyed Nazari, Antonio Navarro Perez, Bernhard Rumpe, Steven Völkel, and Andreas Wortmann*

A Model-driven Approach for the Generation of Customizable Model Migrations ........................................................................................................................... 67  
*Paola Vallejo, Mickaël Kerboeuf, and Jean-Philippe Babau*

Parallel Application Development Using Architecture View Driven Model Transformations ............................................................................................................... 82  
*Ethem Arkin and Bedir Tekinerdogan*

Runtime Translation of Model-Level Queries to Persistence-Level ...................... 97  
*Xabier De Carlos, Goiuria Sagardui, Aitor Murguzur, Salvador Trujillo, and Xabier Mendialdua*

Integration of Handwritten and Generated Object-Oriented Code ...................... 112  
*Timo Greifenberg, Katrin Hölldobler, Carsten Kolassa, Markus Look, Pedram Mir Seyed Nazari, Klaus Müller, Antonio Navarro Perez, Dimitri Plotnikov, Dirk Reiss, Alexander Roth, Bernhard Rumpe, Martin Schindler, and Andreas Wortmann*

A Framework for Metamodel Composition and Adaptation with Conformance-Preserving Model Migration ................................................................. 133  
*Ingrid Chieh Yu and Henning Berg*
A Textual Domain-Specific Language Based on the UML Testing Profile . . . 155
   Johannes Iber, Nermin Kajtazović, Georg Macher, Andrea Höller,
   Tobias Rauter, and Christian Kreiner

Metamodel and Model Composition by Integration of Operational
Semantics. ................................................................. 172
   Henning Berg and Birger Møller-Pedersen

Computability Assurance for UML Template Binding . . . . . . . . . . . . . . . . . 190
   José Farinha and Pedro Ramos

Challenging a Transformation-Wise Architecture Framework in a
Comparative Case Study ............................................. 213
   Fabian Gilson and Vincent Englebert

Meta Model Extensibility of BPMN: Current Limitations and Proposed
Improvements ........................................................... 230
   Richard Braun

An Approach to Define and Apply Collaboration Process Patterns
for Software Development ............................................ 248
   Thuan Tan Vo, Bernard Coulette, Hanh Nhi Tran, and Redouane Lbath

An Ontology-Based Process Editor for Generating Model Mapping in Tool
Integration ............................................................... 263
   Hanh Nhi Tran, Chanh Duc Ngo, and Joel Champeau

Using Model Driven Engineering to Support Multi-paradigms Security
Analysis. ................................................................. 278
   Rouwaida Abdallah, Anas Motii, Nataliya Yakymets, and Agnes Lanusse

Designing Safe and Secure Embedded and Cyber-Physical Systems
with SysML-Sec ........................................................ 293
   Ludovic Apvrille and Yves Roudier

Methodologies, Processes and Platforms

Architecture Optimization with SysML Modeling: A Case Study
Using Variability. ....................................................... 311
   Patrick Leserf, Pierre de Saqui-Sannes, Jérôme Hugues,
   and Khaled Chaaban

Knowledge Modeling in the Health Care Domain: Capturing Semantics
to Bridge the Gap Between Complex Data Models and Object Models . . . . . 328
   Thomas Reichherzer, John Coffey, Bilal Gonen, and Irad Gillett

The Interface-Modular Method for Global System Behaviour Specification. . . 339
   Urooj Fatima and Rolv Bræk
