

Contents

Multiscale Analysis as a Central Component of Urban Physics Modeling	1
Benoit Beckers	
A Path-Following Method Based on Plastic Dissipation Control	29
Boštjan Brank, Andjelka Stanić and Adnan Ibrahimbegovic	
Improved Implicit Immersed Boundary Method via Operator Splitting	49
Shang-Gui Cai, Abdellatif Ouahsine, Julien Favier and Yannick Hoarau	
Modelling Wave Energy Conversion of a Semi-submerged Heaving Cylinder	67
Shang-Gui Cai, Abdellatif Ouahsine and Philippe Sargent	
Multiscale Modeling of Imperfect Interfaces and Applications	81
S. Dumont, F. Lebon, M.L. Raffa, R. Rizzoni and H. Weleman	
A Stochastic Multi-scale Approach for Numerical Modeling of Complex Materials—Application to Uniaxial Cyclic Response of Concrete	123
Pierre Jehel	
Relating Structure and Model	161
Ivica Kožar	
Fat Latin Hypercube Sampling and Efficient Sparse Polynomial Chaos Expansion for Uncertainty Propagation on Finite Precision Models: Application to 2D Deep Drawing Process	185
Jérémy Lebon, Guénhaël Le Quilliec, Piotr Breitkopf, Rajan Filomeno Coelho and Pierre Villon	

Multiscale Atomistic-to-Continuum Reduced Models for Micromechanical Systems	215
Eduard Marenčić and Adnan Ibrahimbegovic	
Inverse Problems in a Bayesian Setting	245
Hermann G. Matthies, Elmar Zander, Bojana V. Rosić, Alexander Litvinenko and Oliver Pajonk	
Heterogeneous Materials Models, Coupled Mechanics-Probability Problems and Energetically Optimal Model Reduction	287
Rainer Niekamp, Martin Krosche and Adnan Ibrahimbegović	
Modelling of Internal Fluid Flow in Cracks with Embedded Strong Discontinuities	315
Mijo Nikolic, Adnan Ibrahimbegovic and Predrag Miscevic	
Reliability Calculus on Crack Propagation Problem with a Markov Renewal Process	343
Chrysanthi A. Papamichail, Salim Bouzebda and Nikolaos Limnios	
Multi-scale Simulation of Newtonian and Non-Newtonian Multi-phase Flows	379
Juan Luis Prieto	
Numerical Modeling of Flow-Driven Piezoelectric Energy Harvesting Devices	399
S. Ravi and A. Zilian	
Comparison of Numerical Approaches to Bayesian Updating	427
Bojana Rosić, Jan Sýkora, Oliver Pajonk, Anna Kučerová and Hermann G. Matthies	
Two Models for Hydraulic Cylinders in Flexible Multibody Simulations	463
Antti Ylinen, Jari Mäkinen and Reijo Kouhia
