Contents

1 Mass Customization in the Building and Construction Industry....... 1
   Kim Noergaard Jensen, Kjeld Nielsen, Thomas Ditlev Bru noe,
   and Søren Munch Lind hard

2 Reconfiguring Variety, Profitability, and Postponement
   for Product Customization with Global Supply Chains............... 13
   Martin Bonev, Anna Myrodia, and Lars Hv am

3 Mass Customization Challenges of Engineer-to-Order
   Manufacturing.............................................................................. 27
   Maria K. Thomassen and Erlend Alfnes

4 An Open-Source Model of Collaboration and Customization
   in Architecture............................................................................... 41
   Carlo Carbone and Basem Eid Mohamed

5 Information-Driven Customization: A Profile-Matching Model....... 59
   Basem Eid Mohamed and Carlo Carbone

6 The Potential of Product Customization Using Technologies
   of Additive Manufacturing................................................................ 71
   Roland Lachmayer, Paul Christoph Gembarski,
   Philipp Gottwald, and R. Bastian Lippert

7 Conceptual Model for Developing Platform-Centric
   Production Architectures..................................................................... 83
   Jacob Bossen, Thomas Ditlev Brunoe, Mads Bejlegaard,
   and Kjeld Nielsen

8 From ETO to Mass Customization: A Two-Horizon ETO
   Enabling Process............................................................................... 99
   Aldo Duchi, Filippo Tamburini, Daniele Parisi, Omid Maghazei,
   and Paul Schönsleben
9 Utilization of Mass Customization in Construction and Building Industry................................................................. 115
Kjeld Nielsen, Thomas Ditlev Brunoe, Kim Noergaard Jensen, and Ann-Louise Andersen

10 Challenges in Choice Navigation for SMEs......................................................... 127
Kjeld Nielsen, Thomas Ditlev Brunoe, Lars Skjelstad, and Maria Thomassen

Mads Bejlegaard, Thomas Ditlev Brunoe, Kjeld Nielsen, and Jacob Bosson

12 Engineering Change Management and Transition Towards Mass Customization........................................................................ 147
Simon Haahr Storbjerg, Thomas Ditlev Brunoe, and Kjeld Nielsen

13 The Evolutionary Process of Product Configurators ................................. 161
Paul Blažek, Monika Kolb, Clarissa Streichsbieler, and Simone Honetz

14 Co-creation and Design Thinking to Envision More Sustainable Business Models: A Foresight Design Approach for Organizational Sustainability of SME Manufacturers.............. 173
Alexandre Joyce

15 Mass Customization in SMEs: Literature Review and Research Directions............................................................ 195
Stig B. Taps, Thomas Ditlev Brunoe, and Kjeld Nielsen

16 Reconfigurable Manufacturing Systems in Small and Medium Enterprises.................................................................... 205
Thomas Ditlev Brunoe, Ann-Louise Andersen, and Kjeld Nielsen

17 KBE-Modeling Techniques in Standard CAD-Systems: Case Study—Autodesk Inventor Professional........................................ 215
Paul Christoph Gembarski, Haibing Li, and Roland Lachmayer

18 A Business Typological Framework for the Management of Product Complexity........................................................................ 235
Paul Christoph Gembarski and Roland Lachmayer

19 Cognitive Computing and Managing Complexity in Open Innovation Model ................................................................. 249
Robert J. Freund

20 Combining Configurator 2.0 Software with Designcrowdfunding........................................................................ 263
Matthias Kulcke
