Part I Unraveling Microbial Diversity and Their Processes

Phagotrophic Protists: Central Roles in Microbial Food Webs	3
Evelyn B. Sherr and Barry F. Sherr	
Overview.....	3
Protists as Elemental Recyclers.....	4
Protists as Consumers of Bacteria.....	6
Protists as Consumers of Phytoplankton.....	7
Protists in High Latitude Food Webs.....	8
Looking to the Future.....	9
References.....	10
Drivers That Structure Biodiversity in the Plankton	13
Tatiana A. Rynearson and Susanne Menden-Deuer	
Plankton Biodiversity.....	13
Alternate Hypotheses That Explain the Paradox of the Plankton.....	14
An Organismal Perspective on the Paradox of the Plankton:	
A Biodiversity Explosion from Within?.....	15
Linking Individual Level Behaviors with Plankton Ecology.....	16
Pervasive Intra-specific Variability in the Genetic Diversity, Physiological Capacity, and Behavioral Repertoire of Plankton.....	17
Evolution: Generating and Structuring Diversity over the Long Term.....	19
Opportunities for Progress.....	20
References.....	22

The Elongated, the Squat and the Spherical: Selective Pressures for Phytoplankton Shape	25
Lee Karp-Boss and Emmanuel Boss	
Introduction.....	25
Effects of Shape on Diffusion.....	27
Other Selective Pressures.....	31
References.....	33
Crossing the Freshwater/Saline Barrier: A Phylogenetic Analysis of Bacteria Inhabiting Both Freshwater and Marine Ecosystems	35
Mina Bižić-Ionescu and Danny Ionescu	
Introduction.....	35
Recent Data on Shared Taxa.....	36
Synthesis of Published Sequence Data.....	37
Future Perspectives.....	41
References.....	42
Approaches and Challenges for Linking Marine Biogeochemical Models with the “Omics” Revolution	45
Victoria J. Coles and Raleigh R. Hood	
Introduction.....	45
Bridging the Cultural and Structural Divide.....	47
Relating Existing Omics to Current Biogeochemical Models.....	52
Near-Term Innovation.....	57
Conclusions.....	59
References.....	61
Part II Viewing Growth and Trophodynamics Through a Stoichiometric Lens	
Out of Africa and into Stoichiometry	67
Susan S. Kilham and Peter Kilham	
References.....	73
Exploring the Implications of the Stoichiometric Modulation of Planktonic Predation	77
Aditee Mitra and Kevin J. Flynn	
Introduction.....	77
Characterising the Predator–Prey Stoichiometric Link.....	78
Elemental Stoichiometry and Commercial Microalgal Production.....	82
Effects of Temperature, Ocean Acidification and Nutrient Excess.....	83
Avoiding Predation.....	84
Stoichiometry and Mixotrophy.....	85
Conclusions.....	86
References.....	87

Part III Understanding the Mysteries of Light and Nitrogen

On Saturating Response Curves from the Dual Perspectives of Photosynthesis and Nitrogen Metabolism 93
 Todd M. Kana and Patricia M. Glibert

Introduction..... 93
 Static vs. Dynamic Behavior..... 94
 Gradient Signals and Dynamics of Response Curves..... 95
 Overall Perspective on Dynamic Kinetics 99
 References..... 102

Nitrate Reductase: A Nexus of Disciplines, Organisms, and Metabolism..... 105
 Erica B. Young and John A. Berges

Introduction..... 105
 Why Nitrate Reductase? 105
 Understanding That Has Emerged from Recent NR Measurements 106
 Recent Advances and Emerging Challenges..... 110
 Conclusion 113
 References..... 113

The Ammonium Paradox of an Urban High-Nutrient Low-Growth Estuary..... 117
 Frances Wilkerson and Richard Dugdale

High-Nutrient Low-Growth Estuaries and Oligotrophication 117
 Observation of an Ammonium Paradox..... 119
