1 State of the Art 1
References 9

2 Non-negative Fuzzy Optimal Solution of Fully Fuzzy Linear Programming Problems with Equality Constraints 15
2.1 Preliminaries 15
2.1.1 Basic Definitions 15
2.1.2 Arithmetic Operations 17
2.2 Existing Method for Solving Fully Fuzzy Linear Programming Problems with Equality Constraints 18
2.3 Limitations and Shortcoming of the Existing Method 20
2.3.1 Limitations of the Existing Method 20
2.3.2 Shortcoming of the Existing Method 22
2.4 Product of a Non-negative Trapezoidal Fuzzy Number with Unrestricted Trapezoidal Fuzzy Number 22
2.5 Kumar et al.'s Method to Find the Non-negative Fuzzy Optimal Solution of Fully Fuzzy Linear Programming Problems with Equality Constraints 23
2.6 Illustrative Examples 27
2.6.1 Fuzzy Optimal Solution of the Chosen Fully Fuzzy Linear Programming Problems 27
2.7 Advantages of the Kumar et al.'s Method 32
2.8 Comparative Study 33
2.9 Conclusions 33
References 34

3 Fuzzy Optimal Solution of Fully Fuzzy Linear Programming Problems with Equality Constrains 35
3.1 Limitations of the Previous Presented Method 35
3.2 Product of Unrestricted Trapezoidal Fuzzy Numbers 37
3.2.1 Particular Cases of the Product of Unrestricted Trapezoidal Fuzzy Numbers 37

3.3 Kaur and Kumar's Method for Solving Fully Fuzzy Linear Programming Problems with Equality Constraints 38
3.4 Illustrative Examples 42
3.4.1 Fuzzy Optimal Solution of the Chosen Fully Fuzzy Linear Programming Problems 42
3.5 Advantages of Kaur and Kumar's Method 50
3.6 Real Life Application of Kaur and Kumar's Method 50
3.6.1 Description of the Problem 51
3.7 Comparative Study 53
3.8 Conclusions 53
References 54

4 Fuzzy Optimal Solution of Fully Fuzzy Linear Programming Problems with Equality Constraints Having LR Flat Fuzzy Numbers 55
4.1 Preliminaries 55
4.1.1 Basic Definitions 56
4.1.2 Arithmetic Operations 57
4.2 Product of Unrestricted *LR* Flat Fuzzy Numbers 58
4.2.1 New Product Corresponding to the Existing Product $\otimes$ . . . 58
4.2.2 New Product Corresponding to the Existing Product $\odot$ . . . 62
4.3 Limitations of Previous Presented Method 64
4.4 Kaur and Kumar's Method for Solving Fully Fuzzy Linear Programming Problems with Equality Constraints Having *LR* Flat Fuzzy Numbers 65
4.5 Illustrative Examples 69
4.5.1 Fuzzy Optimal Solution of the Chosen Fully Fuzzy Linear Programming Problems 69
4.6 Advantages of the Kaur and Kumar's Method 74
4.7 Comparative Study 74
4.8 Conclusions 75
References 75

5 Fuzzy Optimal Solution of Fully Fuzzy Linear Programming Problems with Inequality Constraints Having LR Flat Fuzzy Numbers 77
5.1 Existing Method for Solving Fully Fuzzy Linear Programming Problems with Inequality Constraints 77
5.2 Applicability of the Existing Methods 79
5.3 Limitations of the Existing Methods 82
5.3.1 Limitations of the Existing Methods for Solving Fuzzy Linear Programming Problems 83
5.3.2 Limitations of the Existing Method for Solving Fully Fuzzy Linear Programming Problems 86

5.4 Kumar and Kaur's Methods for Solving Fully Fuzzy Linear Programming Problems with Inequality Constraints Having *LR* Flat Fuzzy Numbers 87
5.4.1 Kumar and Kaur's Method 87
5.4.2 Alternative Method 94
5.4.3 Verification of the Presented Methods 98
5.5 Illustrative Example 100
5.5.1 Fuzzy Optimal Solution of the Chosen Problem by Using the Kumar and Kaur's Method 100
5.5.2 Fuzzy Optimal Solution of the Chosen Problem by Using the Alternative Method. 103
5.6 Advantages of the Presented Methods 106
5.7 Comparative Study 106
5.8 Conclusions 108
References 108

6 Unique Fuzzy Optimal Value of Fully Fuzzy Linear Programming Problems with Equality Constraints Having LR Flat Fuzzy Numbers 109
6.1 Limitations of the Previous Presented Method 109
6.2 Kaur and Kumar's Method Based on RMDS Approach 110
6.2.1 RMDS Approach. 110
6.2.2 Kaur and Kumar's Method 111
6.3 Illustrative Example 114
6.4 Advantages of the Kaur and Kumar's Method 117
6.5 Comparative Study 117
6.6 Conclusions 117
References 118

7 Future Scope 119

Springer

http://www.springer.com/978-3-319-31273-6

An Introduction to Fuzzy Linear Programming Problems

Theory, Methods and Applications

Kaur, J.; Kumar, A.

2016, XV, 119 p., Hardcover
ISBN: 978-3-319-31273-6
