

Contents

1	What Is a Theory of Function Supposed to Do?	1
1.1	Why Functions Matter to Biology and Philosophy	1
1.2	Goals for a Theory of Function	3
1.3	Meta-Analytic Aspects: Conceptual Analysis, Theoretical Definition, or What?	7
1.4	Overview of the Volume	10
	References	13
2	Goals and Functions	17
2.1	The Theory of Goal Directed Systems	17
2.2	From Intentions to Behavior	21
2.3	From Behavior to Mechanisms	25
	References	31
3	Function and Selection	33
3.1	What (and How) Do Functions Explain?	33
3.2	Historical Development of the Selected Effects Theory	37
3.3	Criticisms of the Theory	45
3.4	A Generalized Selected Effects Theory	56
	References	61
4	Function and Fitness	67
4.1	Functions and Statistical Normalcy	67
4.2	Three Questions for the Fitness-Contribution View	72
4.3	An Assessment	75
	References	79
5	Functions and Causal Roles	81
5.1	From Causal Roles to Mechanisms	81
5.2	Reining in Causal Roles	85
5.3	Varieties of Function Pluralism	90
	References	94

- 6 Alternative Accounts of Function 97**
 - 6.1 The Weak Etiological Theory 97
 - 6.2 Systems-Theoretic Functions 100
 - 6.3 The Modal Theory of Functions 105
 - References 107
- 7 Conclusion: What Next? 109**
 - References 113
