Contents

1 Theoretical Framework of the Social Cohesion Radar .......................... 1
  1.1 Roots in (Modern) Classics ............................................. 1
  1.2 Previous Research on Cohesion ........................................ 4
  1.3 Definition of Social Cohesion ......................................... 6
  1.4 Disambiguation .......................................................... 9
References ................................................................. 12

2 Methodology of the Social Cohesion Radar ........................................ 15
  2.1 Countries and Time Periods ............................................ 16
  2.2 Secondary Data Sources ............................................... 17
    2.2.1 Survey Data ..................................................... 18
    2.2.2 Expert Ratings .................................................. 20
    2.2.3 Institutional Data ............................................... 20
  2.3 Method: A Step-by-Step Guide ....................................... 21
    2.3.1 Initial Selection of Indicators .................................. 21
    2.3.2 Data Preparation ............................................... 23
    2.3.3 Reducing the Number of Indicators ............................. 24
    2.3.4 Final Selection of Indicators .................................. 25
    2.3.5 Reflective Measurement of Dimensions .......................... 26
    2.3.6 Completion of Dimension Scores ................................. 29
    2.3.7 Formative Measurement of Social Cohesion ..................... 30
    2.3.8 Limitations of the Approach .................................... 31
    2.3.9 Five-Color Grouping Scheme .................................... 31
References ................................................................. 32

3 Level and Trend of Social Cohesion .............................................. 35
  3.1 Overall Index of Cohesion .............................................. 35
    3.1.1 Most Recent Wave, 2009–2012 ................................... 36
    3.1.2 Overall Index Changes Over Time ............................... 37
  3.2 Domains of Cohesion ................................................... 37
    3.2.1 Social Relations .................................................. 37
    3.2.2 Connectedness .................................................... 39
3.2.3 Focus on the Common Good

3.3 Dimensions of Cohesion

3.3.1 Social Relations, Trust in People, Acceptance of Diversity

3.3.2 Identification, Trust in Institutions, Perception of Fairness

3.3.3 Solidarity and Helpfulness, Respect for Social Rules, Civic Participation

5 Macro-Level Causes and Effects of Social Cohesion

5.1 Determinants and Outcomes of the Overall Index

5.1.1 Wealth and Economic Situation

5.1.2 Income Inequality and the Welfare State

5.1.3 Demographics

5.1.4 Structural Modernization

5.1.5 Diversity

5.1.6 Culture and Values

5.1.7 Subjective Well-Being

5.2 Determinants and Outcomes of the Single Dimensions

5.2.1 Wealth and Economic Situation

5.2.2 Income Inequality and the Welfare State

5.2.3 Demographics

5.2.4 Structural Modernization

5.2.5 Diversity

5.2.6 Culture and Values

5.2.7 Subjective Well-Being

5.3 The Strongest Determinants of Social Cohesion

References
6 Social Cohesion, Values of Individuals, and Their Well-being
  6.1 Individual Values and Social Cohesion
  6.2 Social Cohesion and the Well-Being of Individuals
    6.2.1 Well-Being of Individuals Is Higher in More Cohesive Countries
    6.2.2 Cohesive Societies Are Good for Everyone
