

Contents

1 Selected Results from Algebra and Mathematical Optimization	1
1.1 Positive Semidefinite Matrices	1
1.2 Words and Polynomials in Non-commuting Variables	4
1.3 Sums of Hermitian Squares and Gram Matrices	5
1.4 Quadratic Modules and Semialgebraic Sets	8
1.5 Gelfand–Naimark–Segal’s Construction	10
1.6 Sums of Hermitian Squares and Positivity	12
1.7 Vanishing N_c Polynomials	13
1.8 Hankel Matrices and Flatness	16
1.9 Commutators, Cyclic Equivalence, and Trace Zero Polynomials ...	19
1.10 Cyclic Quadratic Modules and Trace-Positivity	20
1.11 Wedderburn Theorem	23
1.12 Curto–Fialkow’s Theorems	24
1.13 Semidefinite Programming	27
References	32
2 Detecting Sums of Hermitian Squares	35
2.1 Introduction	35
2.2 The Gram Matrix Method	35
2.3 Newton Chip Method	38
2.4 Augmented Newton Chip Method	40
2.5 Implementation	41
2.5.1 On the Gram Matrix Method	41
2.5.2 Software Package <code>NCSOSTools</code>	42
References	44
3 Cyclic Equivalence to Sums of Hermitian Squares	45
3.1 Introduction	45
3.2 The Cyclic Degree	46
3.3 The Tracial Newton Polytope	48
3.4 The Tracial Gram Matrix Method	49

- 3.5 Implementation 54
 - 3.5.1 Detecting Members of Θ^2 by `NCSOSTools` 55
 - 3.5.2 BMV Polynomials..... 56
- References 61
- 4 Eigenvalue Optimization of Polynomials in Non-commuting Variables** 63
 - 4.1 Introduction 63
 - 4.2 Unconstrained Optimization 64
 - 4.2.1 Unconstrained Optimization as a Single SDP..... 64
 - 4.2.2 Extracting Optimizers for the Unconstrained Case 66
 - 4.3 Constrained Eigenvalue Optimization
of Non-commutative Polynomials 68
 - 4.3.1 Approximation Hierarchy 68
 - 4.3.2 Extracting Optimizers 71
 - 4.4 Constrained Optimization over the Nc Ball and the Nc Polydisc ... 73
 - 4.4.1 Approximation Hierarchies Contain Only One Member 73
 - 4.4.2 Extracting Optimizers 77
 - 4.5 Implementation 79
 - 4.5.1 Application to Quantum Mechanics 82
 - References 85
- 5 Trace Optimization of Polynomials in Non-commuting Variables** 87
 - 5.1 Introduction 87
 - 5.2 Unconstrained Trace Optimization 87
 - 5.3 Constrained Trace Optimization 90
 - 5.4 Flatness and Extracting Optimizers..... 94
 - 5.5 Implementation 95
 - References 99
- List of Symbols** 101
- Index**..... 103

Optimization of Polynomials in Non-Commuting Variables

Burgdorf, S.; Klep, I.; Povh, J.

2016, XV, 104 p. 2 illus. in color., Softcover

ISBN: 978-3-319-33336-6
