## Contents

### Part I  The Foundations of Experimental Design Research

1. **An Introduction to Experimental Design Research**  
   Philip Cash, Tino Stanković and Mario Štorga  
   Page 3

2. **Evaluation of Empirical Design Studies and Metrics**  
   Mahmoud Dinar, Joshua D. Summers, Jami Shah and Yong-Seok Park  
   Page 13

3. **Quantitative Research Principles and Methods for Human-Focused Research in Engineering Design**  
   Mark A. Robinson  
   Page 41

### Part II  Classical Approaches to Experimental Design Research

4. **Creativity in Individual Design Work**  
   Yukari Nagai  
   Page 67

5. **Methods for Studying Collaborative Design Thinking**  
   Andy Dong and Maaike Kleinsmann  
   Page 83

6. **The Integration of Quantitative Biometric Measures and Experimental Design Research**  
   Quentin Lohmeyer and Mirko Meboldt  
   Page 97

7. **Integration of User-Centric Psychological and Neuroscience Perspectives in Experimental Design Research**  
   Claus-Christian Carbon  
   Page 113

### Part III  Computation Approaches to Experimental Design Research

8. **The Complexity of Design Networks: Structure and Dynamics**  
   Dan Braha  
   Page 129
9 Using Network Science to Support Design Research:
  From Counting to Connecting .................................. 153
  Pedro Parraguez and Anja Maier

10 Computational Modelling of Teamwork in Design .................. 173
  Ricardo Sosa

11 Human and Computational Approaches for Design
  Problem-Solving ................................................... 187
  Paul Egan and Jonathan Cagan

Part IV Building on Experimental Design Research

12 Theory Building in Experimental Design Research ............... 209
  Imre Horváth

13 Synthesizing Knowledge in Design Research ...................... 233
  Kalle A. Piirainen

14 Scientific Models from Empirical Design Research ............... 253
  John S. Gero and Jeff W.T. Kan
