Contents

1 PI3K-Akt-mTOR Signaling in Cancer and Cancer Therapeutics . . . 1
   Sameer S. Chopra and Lewis C. Cantley

Part I PI3K-mTOR Pathway in Cancers

2 The mTOR Complexes in Cancer Cell Metabolism ............... 29
   Thomas Lynch, Joseph G. Moloughney and Estela Jacinto

3 PI3K-AKT-mTOR Pathway Cooperates with the DNA Damage
   Repair Pathway: Carcinogenesis in Triple-Negative Breast
   Cancers and Beyond ........................................... 65
   Pradip De, Jennifer H. Carlson, Brian Leyland-Jones and Nandini Dey

4 The AKT-mTOR Signaling Pathway for Drug Response
   Prediction and Prognostic Signatures ....................... 109
   John Conor Moran, Elisa Baldelli, Emanuel F. Petricoin
   and Mariaelena Pierobon

5 Resistance to PI3K Pathway Inhibition .......................... 125
   Payal D. Shah and Sarat Chandarlapaty

Part II PI3K-mTOR Pathway in Cancer Medicine

6 Combination Therapies Targeting the PI3K/AKT/mTOR
   Pathways .......................................................... 151
   Aung Naing, Gordon B. Mills and Funda Meric-Bernstam

7 Phospho-Inositol-3-Kinase Activity and Dysregulation
   in Pediatric Leukemia and Lymphoma ........................ 181
   Charles B. Goodwin and Rebecca J. Chan

8 HER2 Signaling Network in Advanced Breast Cancer:
   Opportunities for Combination Therapies ..................... 231
   Nandini Dey, Brian Leyland-Jones and Pradip De
PI3K-mTOR in Cancer and Cancer Therapy
Dey, N.; De, P.; Leyland-Jones, B. (Eds.)
2016, XXIV, 294 p. 31 illus. in color., Hardcover
ISBN: 978-3-319-34209-2
