Contents

1 Electrophilic Amination for the Synthesis of Alkyl and Aryl Amines .................................................. 1
   1.1 Synthesis of Amines via C–N Bond Formation ............... 1
      1.1.1 Electrophilic Amination Reagents and Reactions ........ 3
      1.1.2 Direct Electrophilic Amination of C–H Bonds ............ 11
      1.1.3 Conclusions ..................................... 16
   References. ................................................ 18

2 Selective \(\alpha\)-Amination and \(\alpha\)-Acylation of Esters and Amides via Dual Reactivity of \(O\)-Acyloxylamines Toward Zinc
   Enolates .................................................... 25
   2.1 \(\alpha\)-Functionalization of Esters and Amides ................... 25
      2.1.1 \(\alpha\)-Amination of Carbonyl Compounds ................. 25
      2.1.2 \(\alpha\)-Acylation of Carbonyl Compounds ................. 31
      2.1.3 Zinc Enolates for \(\alpha\)-Functionalization of Carbonyl Compounds ................................... 32
   2.2 Results and Discussion .................................. 32
      2.2.1 Electrophilic Amination and Acylation of Esters and Amides via Zinc Enolates ....................... 32
      2.2.2 Initial Amination Studies Using the Reformatsky Reagent ........................................ 33
      2.2.3 Amination Studies Using Zn(tmp)$_2$ for Zinc Enolate Formation ......................................... 35
      2.2.4 \(\alpha\)-Acylation of Ester and Amide Zinc Enolates ........ 38
      2.2.5 Proposed Mechanism for the \(\alpha\)-Amination and \(\alpha\)-Acylation Reactions .......................... 41
   2.3 Conclusion ........................................... 43
      2.3.1 Supplemental Information .......................... 43
      2.3.2 Supplemental Information .......................... 46
   References. ................................................ 56
3 Copper-Catalyzed α-Amination of Phosphonates and Phosphine Oxides: A Direct Approach to α-Amino Phosphonic Acids and Derivatives

3.1 Significance of α-Amino Phosphonic Acids and Derivatives

3.2 Results and Discussion

3.2.1 Electrophilic Amination via Phosphonate-Derived α-Zincates

3.2.2 Amination Studies of Phosphonate-Derived α-Zincates

3.2.3 Mechanism Studies

3.2.4 Alternative Method for the α-Zincation of Phosphonates

3.2.5 α-Amination of Disubstituted Phosphonates

3.3 Conclusion

3.4 Supplemental Information

3.4.1 General Information

3.4.2 Initial Deprotonation of Phosphonates

3.4.3 Experimental Procedures

3.4.4 Characterization of Compounds

References

4 Copper-Catalyzed Electrophilic Amination of Heteroarenes and Arenes by C–H Zincation

4.1 Synthesis of Heteroaromatic and Aryl Amines

4.2 Electrophilic Amination for the Synthesis of Aryl Amines

4.2.1 Electrophilic Amination of Organometallics

4.2.2 Electrophilic Metal-Catalyzed C–H Amination

4.2.3 Limitations of Current Methods

4.3 Results and Discussion

4.3.1 Electrophilic Amination of Heteroarenes and Arenes by C–H Zincation

4.3.2 Amination Studies Using Zn(tmp)$_2$ for C–H Zincation

4.3.3 Amination Studies Using TmpZnCl•LiCl for C–H Zincation

4.4 Conclusion

4.5 Supplemental Information

4.5.1 General Information

4.5.2 Characterization of Compounds

References

Curriculum Vitae
Copper-Catalyzed Electrophilic Amination of sp2 and sp3 C–H Bonds
McDonald, S.L.
2016, XXIII, 144 p. 8 illus., Hardcover
ISBN: 978-3-319-38877-9
