Contents

Distinguished Carl Adam Petri Lecture

Reasoning About Discovery Clouds ........................................ 3
  Ian Foster

Invited Talks

From Actions, Transactions, and Processes to Services ............... 13
  Manfred Broy

Decidability Border for Petri Nets with Data: WQO Dichotomy Conjecture... 20
  Slawomir Lasota

Petri Net Synthesis

Characterising Petri Net Solvable Binary Words .......................... 39
  Eike Best, Evgeny Erofeev, Uli Schlachter, and Harro Wimmel

The Power of Prime Cycles .................................................. 59
  Eike Best and Raymond Devillers

Petri Net Synthesis for Restricted Classes of Nets ....................... 79
  Uli Schlachter

Tools

Renew 2.5 – Towards a Comprehensive Integrated Development
Environment for Petri Net-Based Applications .......................... 101
  Lawrence Cabac, Michael Haustermann, and David Mosteller

AB-QSSPN: Integration of Agent-Based Simulation of Cellular Populations
with Quasi-Steady State Simulation of Genome Scale Intracellular
Networks ................................................................................. 113
  Wojciech Ptak, Andrzej M. Kierzek, and Jacek Sroka

PetriDotNet 1.5: Extensible Petri Net Editor and Analyser for Education
and Research ........................................................................... 123
  András Vörös, Dániel Darvas, Vince Molnár, Attila Klenik, Ákos Hajdu,
  Attila Jámbor, Tamás Bartha, and István Majzik
Applications

Transforming CPN Models into Code for TinyOS: A Case Study of the RPL Protocol .................................................. 135  
*Lars Michael Kristensen and Vegard Veiset*

Realizability of Schedules by Stochastic Time Petri Nets with Blocking Semantics ......................................................... 155  
*Loïc Hélouët and Karim Kecir*

ABCD: A User-Friendly Language for Formal Modelling and Analysis ................................................................. 176  
*Franck Pommereau*

Health Monitoring of a Planetary Rover Using Hybrid Particle Petri Nets .............................................................. 196  
*Quentin Gaudel, Pauline Ribot, Elodie Chanthery, and Matthew J. Daigle*

Conformance Checking

Merging Alignments for Decomposed Replay .................................................. 219  
*H.M.W. Verbeek and W.M.P. van der Aalst*

Anti-alignments in Conformance Checking – The Dark Side of Process Models .......................................................... 240  
*Thomas Chatain and Josep Carmona*

Time and Stochastic Models

Probabilistic Time Petri Nets .................................................. 261  
*Yrvann Emzivat, Benoît Delahaye, Didier Lime, and Olivier H. Roux*

Efficient Decomposition Algorithm for Stationary Analysis of Complex Stochastic Petri Net Models .................................................. 281  
*Kristóf Marussy, Attila Klenik, Vince Molnár, András Vörös, István Majzik, and Miklós Telek*

Decidable Classes of Unbounded Petri Nets with Time and Urgency .................................................. 301  
*S. Akshay, B. Genest, and L. Hélouët*

Structural Methods

Structural Place Invariants for Analyzing the Behavioral Properties of Nested Petri Nets .................................................. 325  
*Leonid W. Dworzanski and Irina A. Lomazova*

Author Index .................................................. 345
Application and Theory of Petri Nets and Concurrency
37th International Conference, PETRI NETS 2016,
Toruń, Poland, June 19-24, 2016. Proceedings
Kordon, F.; Moldt, D. (Eds.)
2016, XVI, 345 p. 114 illus., Softcover
ISBN: 978-3-319-39085-7
