

Contents

Invited Papers

Propagation, Diffusion and Randomization in Cellular Automata.	3
<i>Guillaume Theyssier</i>	
What Automata Can Provide a Medium for Life?	10
<i>Tommaso Toffoli</i>	
A Brief Tour of Theoretical Tile Self-Assembly	26
<i>Andrew Winslow</i>	

Regular Papers

The Corona Limit of Penrose Tilings Is a Regular Decagon	35
<i>Shigeki Akiyama and Katsunobu Imai</i>	
The Group of Reversible Turing Machines	49
<i>Sebastián Barbieri, Jarkko Kari, and Ville Salo</i>	
Exact Discretization of 3-Speed Rational Signal Machines into Cellular Automata.	63
<i>Tom Besson and Jérôme Durand-Lose</i>	
An “almost dual” to Gottschalk’s Conjecture	77
<i>Silvio Capobianco, Jarkko Kari, and Siamak Taati</i>	
On Finite Monoids of Cellular Automata	90
<i>Alonso Castillo-Ramirez and Maximilien Gadouleau</i>	
Sum of Exit Times in Series of Metastable States in Probabilistic Cellular Automata	105
<i>E.N.M. Cirillo, F.R. Nardi, and C. Spitoni</i>	
Partial Reversibility of One-Dimensional Cellular Automata	120
<i>Ronaldo de Castro Corrêa and Pedro P.B. de Oliveira</i>	
Two-Dimensional Traffic Rules and the Density Classification Problem.	135
<i>Nazim Fatès, Irène Marcovici, and Siamak Taati</i>	
Constant Acceleration Theorem for Extended von Neumann Neighbourhoods	149
<i>Anaël Grandjean</i>	

Shrinking and Expanding Cellular Automata 159
Augusto Modanese and Thomas Worsch

An 8-State Simple Reversible Triangular Cellular Automaton
that Exhibits Complex Behavior 170
Kenichi Morita

Cellular Automata on Group Sets and the Uniform Curtis-Hedlund-Lyndon
Theorem 185
Simon Wacker

Author Index 199

Cellular Automata and Discrete Complex Systems
22nd IFIP WG 1.5 International Workshop, AUTOMATA
2016, Zurich, Switzerland, June 15-17, 2016,
Proceedings
Cook, M.; Neary, T. (Eds.)
2016, XVI, 199 p. 77 illus., Softcover
ISBN: 978-3-319-39299-8
