Contents

Full Papers

Understanding Procedural Knowledge for Solving Arithmetic Task by Externalization ................................................................. 3
Kazuhisa Miwa, Hitoshi Terai, and Kazuya Shibayama

Do Erroneous Examples Improve Learning in Addition to Problem Solving and Worked Examples? ..................................................... 13
Xingliang Chen, Antonija Mitrovic, and Moffat Mathews

Automatic Question Generation: From NLU to NLG ................................. 23
Karen Mazidi and Paul Tarau

Using Eye-Tracking to Determine the Impact of Prior Knowledge on Self-Regulated Learning with an Adaptive Hypermedia-Learning Environment ................................................................. 34
Michelle Taub and Roger Azevedo

Informing Authoring Best Practices Through an Analysis of Pedagogical Content and Student Behavior .............................................. 48
Matthew Roy and Rohit Kumar

Timing Game-Based Practice in a Reading Comprehension Strategy Tutor . . 59
Matthew E. Jacovina, G. Tanner Jackson, Erica L. Snow, and Danielle S. McNamara

Evaluation of the Formal Models for the Socratic Method .......................... 69
Nguyen-Thinh Le and Nico Huse

Stealth Assessment in ITS - A Study for Developmental Dyscalculia .......... 79
Severin Klingler, Tanja Käser, Alberto-Giovanni Busetto, Barbara Solenthaler, Juliane Kohn, Michael von Aster, and Markus Gross

Mastery-Oriented Shared Student/System Control Over Problem Selection in a Linear Equation Tutor ..................................................... 90
Yanjin Long and Vincent Aleven

Providing the Option to Skip Feedback in a Worked Example Tutor ............ 101
Amruth N. Kumar
Tell Me How to Teach, I’ll Learn How to Solve Problems. 111
Noboru Matsuda, Nikolaos Barbalios, Zhengzheng Zhao,
Anya Ramamurthy, Gabriel J. Stylianides, and Kenneth R. Koedinger

Scale-Driven Automatic Hint Generation for Coding Style 122
Rohan Roy Choudhury, Hezheng Yin, and Armando Fox

Estimating Individual Differences for Student Modeling in Intelligent Tutors from Reading and Pretest Data 133
Michael Eagle, Albert Corbett, John Stamper, Bruce M. McLaren,
Angela Wagner, Benjamin MacLaren, and Aaron Mitchell

Building Pedagogical Models by Formal Concept Analysis 144
Giuseppe Fenza and Francesco Orciuoli

Predicting Learning from Student Affective Response to Tutor Questions 154
Alexandria K. Vail, Joseph F. Grafsgaard, Kristy Elizabeth Boyer,
Eric N. Wiebe, and James C. Lester

Integrating Real-Time Drawing and Writing Diagnostic Models: An Evidence-Centered Design Framework for Multimodal Science Assessment 165
Andy Smith, Osman Aksit, Wookhee Min, Eric Wiebe, Bradford W. Mott,
and James C. Lester

The Bright and Dark Sides of Gamification 176
Fernando R.H. Andrade, Riichiro Mizoguchi, and Seiji Isotani

Behavior Changes Across Time and Between Populations in Open-Ended Learning Environments 187
Brian Gauch and Gautam Biswas

Are Pedagogical Agents’ External Regulation Effective in Fostering Learning with Intelligent Tutoring Systems? 197
Roger Azevedo, Seth A. Martin, Michelle Taub, Nicholas V. Mudrick,
Garrett C. Millar, and Joseph F. Grafsgaard

 Intervention-BKT: Incorporating Instructional Interventions into Bayesian Knowledge Tracing 208
Chen Lin and Min Chi

Short Papers

“i-Read”: A Collaborative Learning Environment to Support Students with Low Reading Abilities 221
Nizar Omheni and Ahmed Hadj Kacem
Integrating Support for Collaboration in a Computer Science Intelligent Tutoring System .................................................. 227
Rachel Harsley, Barbara Di Eugenio, Nick Green, Davide Fossati, and Sabita Acharya

Wheel-Spinning in a Game-Based Learning Environment for Physics .............. 234
Thelma D. Palaoag, Ma. Mercedes T. Rodrigo, Juan Miguel L. Andres, Juliana Ma. Alexandra L. Andres, and Joseph E. Beck

Using Multi-level Modeling with Eye-Tracking Data to Predict Metacognitive Monitoring and Self-regulated Learning with CRYSTAL ISLAND .................................................. 240
Michelle Taub, Nicholas V. Mudrick, Roger Azevedo, Garrett C. Millar, Jonathan Rowe, and James Lester

The Mobile Fact and Concept Training System (MoFaCTS) ......................... 247
Philip I. Pavlik Jr., Craig Kelly, and Jaclyn K. Maass

Coordinating Knowledge Integration with Pedagogical Agents:
Effects of Agent Gaze Gestures and Dyad Synchronization ....................... 254
Yugo Hayashi

An Investigation of Conversational Agent Interventions Supporting Historical Reasoning in Primary Education ................................. 260
Stergios Tegos, Stavros Demetriadis, and Thrasyvoulos Tsiatsos

Impact of Question Difficulty on Engagement and Learning ...................... 267
Jan Papoušek, Vit Stanislav, and Radek Pelánek

Are There Benefits of Using Multiple Pedagogical Agents to Support and Foster Self-Regulated Learning in an Intelligent Tutoring System? .... 273
Seth A. Martin, Roger Azevedo, Michelle Taub, Nicholas V. Mudrick, Garrett C. Millar, and Joseph F. Grafsgaard

Can Peers Rate Reliably as Experts in Small CSCL Groups? ..................... 280
Ioannis Magnisalis, Stavros Demetriadis, and Pantelis M. Papadopoulos

Peer Review in Mentorship: Perception of the Helpfulness of Review and Reciprocal Ratings ...................................................... 286
Oluwabunmi Adevoyin, Roberto Araya, and Julita Vassileva

Motivational Gamification Strategies Rooted in Self-Determination Theory for Social Adaptive E-Learning .................................. 294
Lei Shi and Alexandra I. Cristea

Adaptive Training of the Metacognitive Skill of Knowledge Monitoring in Intelligent Tutoring Systems ........................................... 301
Tiago Roberto Kautzmann, Talvany Carlotto, and Patrícia A. Jaques
Persuading an Open Learner Model in the Context of a University Course: An Exploratory Study
Blandine Ginon, Clelia Boscolo, Matthew D. Johnson, and Susan Bull

Blinded by Science?: Exploring Affective Meaning in Students’ Own Words
Sarah E. Schultz, Naomi Wixon, Danielle Allessio, Kasia Muldner, Winslow Burleson, Beverly Woolf, and Ivon Arroyo

A Framework for Parameterized Design of Rule Systems Applied to Algebra
Eric Butler, Emina Torlak, and Zoran Popović

Cognitive Tutors Produce Adaptive Online Course: Inaugural Field Trial.
Noboru Matsuda, Martin van Velsen, Nikolaos Barbalios, Shuqiong Lin, Hardik Vasa, Roya Hosseini, Klaus Sutner, and Norman Bier

Optimizing Pattern Weights with a Genetic Algorithm to Improve Automatic Working Memory Capacity Identification
Jason Bernard, Ting-Wen Chang, Elvira Popescu, and Sabine Graf

Stratified Learning for Reducing Training Set Size
Peter Hastings, Simon Hughes, Dylan Blaum, Patricia Wallace, and M. Anne Britt

Combining Worked Examples and Problem Solving in a Data-Driven Logic Tutor
Zhongxiu Liu, Behrooz Mostafavi, and Tiffany Barnes

NDLtutor: An Automated Conversational Agent to Facilitate Metacognitive Skills in Fully-Negotiated OLMs.
Raja M. Suleman, Riichiro Mizoguchi, and Mitsuru Ikeda

Concept Maps Similarity Measures for Educational Applications.
Carla Limongelli, Matteo Lombardi, Alessandro Marani, Filippo Sciarrone, and Marco Temperini

Can Adaptive Pedagogical Agents’ Prompting Strategies Improve Students’ Learning and Self-Regulation?
François Bouchet, Jason M. Harley, and Roger Azevedo

Automatic Extraction of Prerequisites Among Learning Objects Using Wikipedia-Based Content Analysis
Carlo De Medio, Fabio Gasparetti, Carla Limongelli, Filippo Sciarrone, and Marco Temperini
Contents XVII

Using Electroencephalogram to Track Learner’s Reasoning in Serious Games ................................................................. 382
Ramla Ghali, Claude Frasson, and Sébastien Ouellet

Behavior and Learning of Students Using Worked-Out Examples in a Tutoring System .................................................. 389
Nick Green, Barbara Di Eugenio, Rachel Harsley, Davide Fossati, and Omar AlZoubi

The Frequency of Tutor Behaviors: A Case Study ............................................. 396
Vincent Aleven and Jonathan Sewall

Towards an Effective Affective Tutoring Agent in Specialized Education .... 402
Aydee Liza Mondragon, Roger Nkambou, and Pierre Poirier

Embedding Intelligent Tutoring Systems in MOOCs and e-Learning Platforms ...................................................................... 409
Vincent Aleven, Jonathan Sewall, Octav Popescu, Michael Ringenberg, Martin van Velsen, and Sandra Demi

Using Cloze Procedure Questions in Worked Examples in a Programming Tutor ................................................................. 416
Amruth N. Kumar

The Effect of Friendship and Tutoring Roles on Reciprocal Peer Tutoring Strategies .............................................................. 423
Michael A. Madaio, Amy Ogan, and Justine Cassell

CRISTAL: Adapting Workplace Training to the Real World Context with an Intelligent Simulator for Radiology Trainees ........ 430
Hope Lee, Amali Weerasinghe, Jayden Barnes, Luke Oakden-Rayner, William Gale, and Gustavo Carneiro

Posters

A System for Gamifying Ubiquitous Learning Situations Supported by Multiple Technologies ............................................. 439
Alejandro Ortega-Arranz, Juan A. Muñoz-Cristóbal, Alejandra Martínez-Monés, Miguel L. Bote-Lorenzo, and Juan I. Asensio-Pérez

Combining Speech-Acts and Socio-Historical Theories to Monitor and Analyze the Cognitive Evolution of Students on VLE’s Records .... 441
Gustavo Schwarz, João C. Gluz, and Liliana M. Passerino

Incorporating Student Choice in E-learning ........................................... 443
Avi Segal, Naor Guetta, Amir Taboul, Guy Shani, and Yaakov (Kobi) Gal
Towards a Mobile Python Tutor: Understanding Differences in Strategies Used by Novices and Experts

Geela Fabric, Antonija Mitrovic, and Kourosh Neshatian

Modeling Negative Affect of Novice Programming Students using Keyboard Dynamics and Mouse Behavior

Larry A. Vea and Ma. Mercedes T. Rodrigo

What Is More Important for Student Modeling: Domain Structure or Response Times?

Jiří Řihák and Radek Pelánek

Evaluating Affect in a Learning Environment for Java

Ramón Zatarain-Cabada, Maria Lucía Barrón-Estrada, Francisco González-Hernández, and Carlos A. Reyes-García

Implicit Social Networks for Social Recommendation of Scholarly Papers

Shaikhah Alotaibi and Julita Vassileva

A Context-Based Similarity Algorithm for Enhancing Learning Scenarios Reuse

Mariem Chaabouni, Mona Laroussi, Claudine Piau-Toffolon, Christophe Choquet, and Henda Ben Ghezala

Towards the Recommendation of Resources in Coursera

Carla Limongelli, Matteo Lombardi, and Alessandro Marani

Triangle Block Model for Bridging Conceptual Representation to Numerical Representation in Arithmetic Word Problems: A Brief Report of Practical Use by Fourth Grade Students

Tsukasa Hirashima, Kazutoshi Furukubo, Yusuke Hayashi, Sho Yamamoto, and Kazushige Maeda

POLARISQL: An Online Tutoring System for Learning SQL Language

Soraya Chachoua, Jamal Malki, and Pascal Estraillier

Empirical Evaluation of Intelligent Tutoring Systems with Ontological Domain Knowledge Representation: A Case Study with Online Courses in Higher Education

Ani Grubišić, Slavomir Stankov, Branko Žitko, Suzana Tomaš, Emil Brajković, Tomislav Volarić, Daniel Vasić, and Ines Šarić

Adaptive Testing by Bayesian Networks with Application to Language Assessment

Francesca Mangili, Claudio Bonesana, Alessandro Antonucci, Marco Zaffalon, Elisa Rubegni, and Loredana Addimando

On the Evaluation of the Expert and the Learner Models of Logic-Muse Tutoring System ................................................................. 506
Roger Nkambou, Ange Adrienne Nyamen Tato, Janie Brisson, Clauvice Kenfack, Serge Robert, and Pamela Kissok

Tools for Improving Teachers’ Daily Tasks: Does It Really Help? ........ 509
Fábio Goulart Andrade, Júlia Marques Carvalho da Silva, and Maurício Covolan Rosito

A Brief Overview of Logic-Muse, an Intelligent Tutoring System for Logical Reasoning Skills ......................................................... 511
Clauvice Kenfack, Roger Nkambou, Serge Robert, Ange Adrienne Nyamen Tato, Janie Brisson, and Pamela Kissok

Pilot Study with RALL-E: Robot-Assisted Language Learning in Education . 514
Ning Wang and W. Lewis Johnson

Adapting Exercise Selection to Learner Self-esteem and Performance .... 517
Juliet Okpo, Matt Dennis, Kirsten Smith, Judith Masthoff, and Nigel Beacham

Do Summaries Support Learning from Post-problem Reflective Dialogues? . . . . 519
Sandra Katz, Patricia Albacete, and Pamela Jordan

Social Interaction with Intelligent Tutoring Systems: An Investigation of Power and Related Affect ..................................................... 521
Katharina Roetzer

Efficiency vs. Immersion: Interface Design Trade-offs for an Exploratory Learning Environment ...................................................... 523
Toby Dragon, Mark Floryan, Grayson Wilkins, and Thomas Sparks

Dynamic Generation of Dilemma-Based Situations in Virtual Environments . 526
Azzeddine Benabbou, Domitile Lourdeaux, and Dominique Lenne

Young Researchers Track

An Implementation Architecture for Scenario-Based Simulations ........... 531
Raja Lala, Johan Jeuring, and Jordy van Dortmont

A Student-Directed Immersive Intelligent Tutoring System for Language Learning ................................................................. 534
Jun Seong Choi and Jong H. Park

How to Present Example-Based Support Adaptively in Intelligent Tutoring Systems ................................................................. 538
Xingliang Chen, Antonija Mitrovic, and Moffat Mathews
The Automatic Generation of Knowledge Spaces from Problem Solving Strategies
Ivica Milovanović and Johan Jeuring

Using Multi-Channel Data to Assess, Understand, and Support Affect and Metacognition with Intelligent Tutoring Systems
Michelle Taub and Roger Azevedo

AMNESIA, a Dynamic Environment for Progressive Assessment of Cognitive Functions
Asma Ben Khedher and Claude Frasson

Comparisons of Different Types of Feedback of Linear Equation Aide (LEA): A Mobile Assisted Learning Application on Linear Equations
Rex P. Bringula, Jan Sepli De Leon, Bernadette Anne Pascual, Kharl John Rayala, Kevin Sendino, and Marc Rodin Ligas
